ERKLÄRUNG DER TAFEL.

Taf. II

Die von vorn eröffnete Brusthöhle. Ansicht des eröffneten Herzbeutels, des Herzens; der aufgeschnittenen Lungen; der großen Gefäße etc. etc.

I. Knochen und Knorpel.

- A. (1) Die durchsägten oberen Rippen beider Seiten (costae)
- B. (2) die durchsägten Schlüsselbeine (claviculae)
- C. der Schildknorpel (cartilago thyroidea)
- D. die Luftröhre (trachea)

II. Muskeln

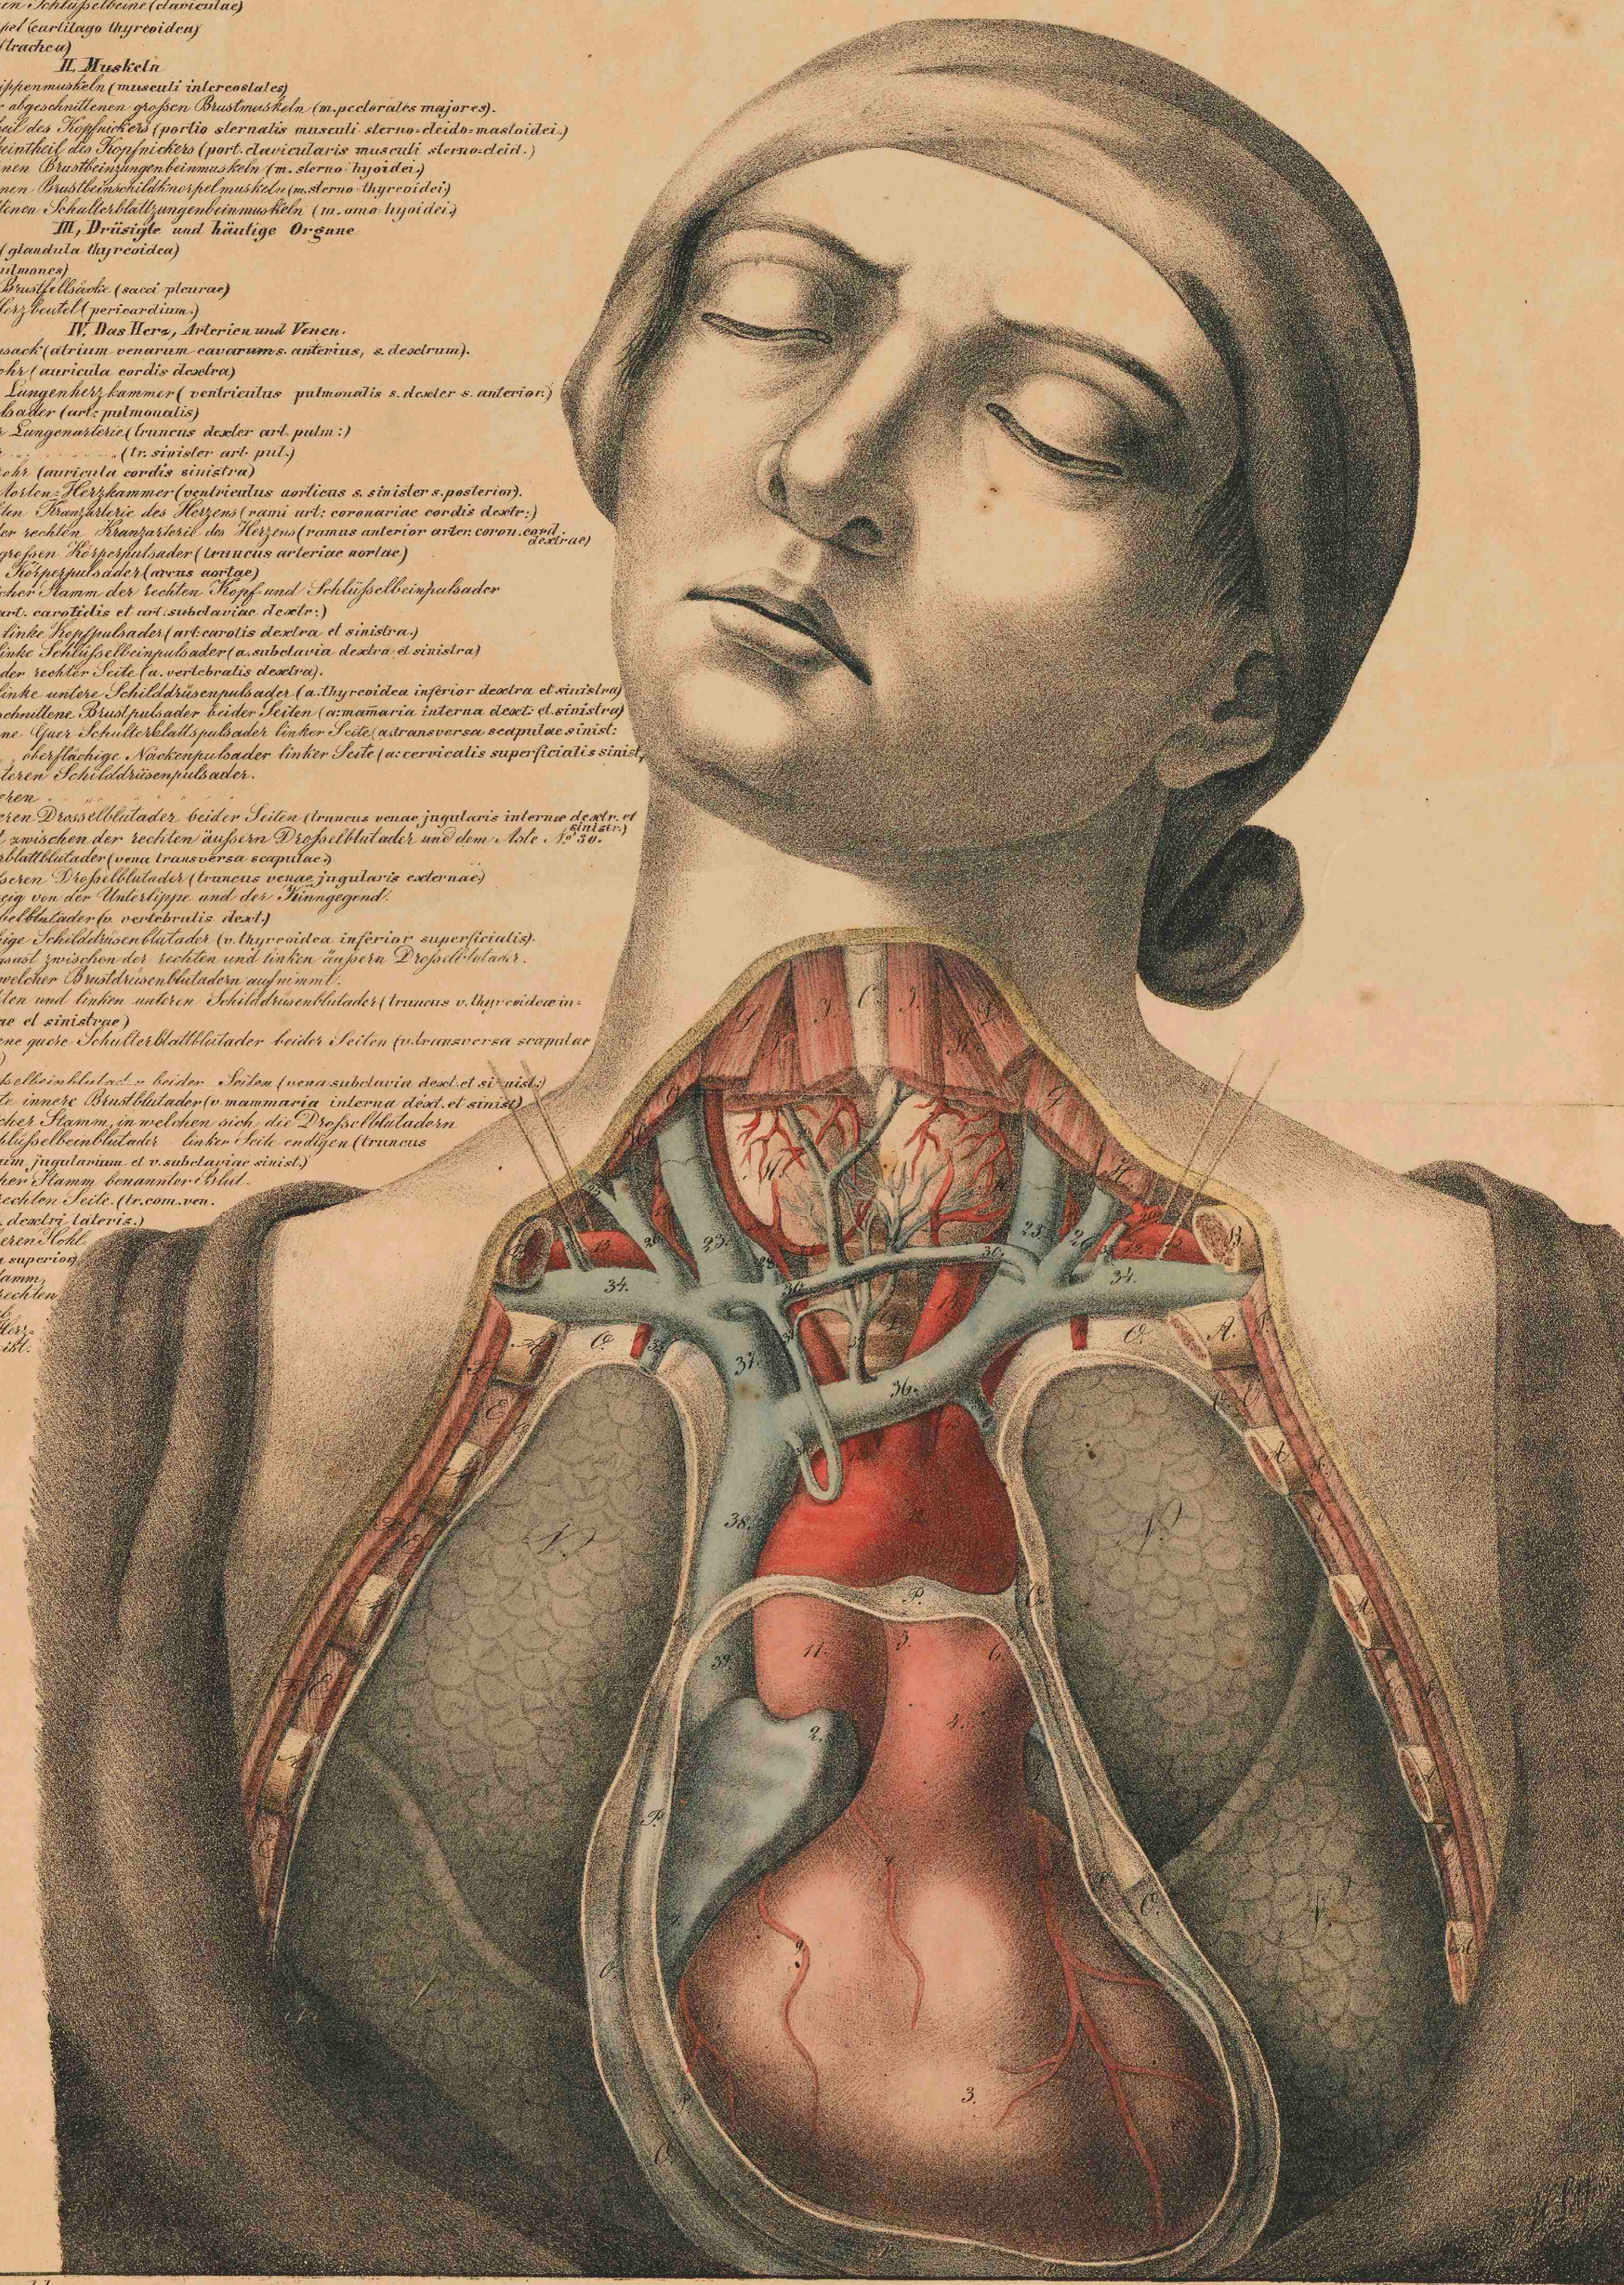

- E. (3) die Zwischenrippenmuskeln (musculi intercostales)
- F. (4) die Hände der abgeschnittenen großen Brustmuskeln (m. pectorales majores)
- G. (5) der Brusttheil des Kopfmuskels (portio sternalis musculi sterno-clavicularis)
- H. (6) der Schlüsseltheil des Kopfmuskels (portio clavicularis musculi sterno-clavicularis)
- I. (7) die abgeschnittenen Brustbeinmuskeln (m. sterno-hyoidei)
- K. (8) die abgeschnittenen Brustschilddrüsenmuskeln (m. sterno-thyroidei)
- L. (9) die abgeschnittenen Schulterblattmuskeln (m. uno hyoidei)

III. Drüsen und häutige Organe

- M. (10) die Schilddrüse (glandula thyroidea)
- N. (11) die Lungen (pulmones)
- O. (12) die geöffneten Brusthöhlen (sacci pleurae)
- P. (13) der geöffnete Herzbeutel (pericardium)

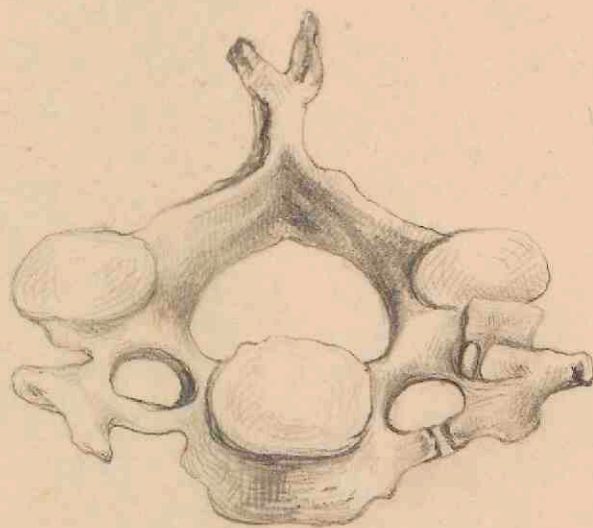

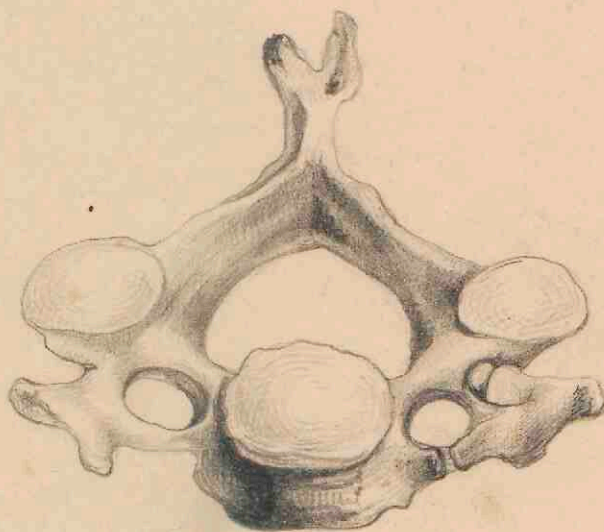

IV. Das Herz, Arterien und Venen.

- 1. der Hohlvenenstock (atrium venarum cavarum s. anterior, s. dextrum)
- 2. das rechte Herzohr (auricula cordis dextra)
- 3. die rechte obere Lungenherzkammer (ventriculus pulmonalis s. dexter s. anterior)
- 4. die Lungenpulsaer (art. pulmonalis)
- 5. rechter Ast der Lungenarterie (truncus dexter art. pulm.)
- 6. linker Ast der Lungenarterie (tr. sinister art. pulm.)
- 7. das linke Herzohr (auricula cordis sinistra)
- 8. die linke obere Lungenherzkammer (ventriculus aorticus s. sinister s. posterior)
- 9. Zweige der rechten Kranzarterie des Herzens (rami art. coronariae cordis dextr.)
- 10. Vorderer Ast der rechten Kranzarterie des Herzens (ramus anterior arter. coron. caput. dextr.)
- 11. der Stamm der großen Körperpulsaer (truncus arteriae aortae)
- 12. der Bogen der Körperpulsaer (arcus aortae)
- 13. gemeinschaftlicher Stamm der rechten Kopf- und Schlüsselbeinpulsaer (tr. communis art. carotidis et art. subclaviae dextr.)
- 14. die rechte und linke Kopfpulsaer (art. carotidis dextra et sinistra)
- 15. die rechte und linke Schlüsselbeinpulsaer (a. subclavia dextra et sinistra)
- 16. die Wirbelpulsaer rechter Seite (a. vertebrales dextrae)
- 17. die rechte und linke untere Schilddrüsenpulsaer (a. thyroidea inferior dextra et sinistra)
- 18. die innere abgeschnittene Brustpulsaer beider Seiten (a. mammaria interna dextr. et sinistra)
- 19. die abgeschnittene Quer-Schulterblattpulsaer linker Seite (a. transversa scapulae sinistra)
- 20. die oberflächliche Nackenpulsaer linker Seite (a. cervicalis superficialis sinistra)
- 21. Zweige der unteren Schilddrüsenpulsaer
- 22. dito oben
- 23. Stamm der inneren Drosselblutader beider Seiten (truncus venae jugularis interna dextr. et sinistra)
- 24. Verbindungsast zwischen der rechten äußeren Drosselblutader und dem. 23.
- 25. die quere Schulterblattblutader (vena transversa scapulae)
- 26. Stamm der äußeren Drosselblutader (truncus venae jugularis externae)
- 27. Muskelvenenast von der Unterlippe nach der Kinngegend
- 28. die rechte Wirbelblutader (a. vertebrales dextrae)
- 29. untere oberflächliche Schilddrüsenblutader (a. thyroidea inferior superficialis)
- 30. Ein Verbindungsast zwischen der rechten und linken äußeren Drosselblutader
- 31. Verbindungsast, welcher Brustdrüsenblutadern aufnimmt
- 32. Stamm der rechten und linken äußeren Schilddrüsenblutader (truncus v. thyroidea inferior dextra et sinistra)
- 33. die abgeschnittene quere Schulterblattblutader beider Seiten (v. transversa scapulae dextra et sinistra)
- 34. die untere Schlüsselbeinblutader beider Seiten (vena subclavia dextra et sinistra)
- 35. linke und rechte innere Brustblutader (v. mammaria interna dextra et sinistra)
- 36. gemeinschaftlicher Stamm, in welchen sich die Drosselblutadern und die untere Schlüsselbeinblutader linker Seite endigen (truncus communis venarum jugularium et v. subclaviae sinistra)
- 37. gemeinschaftlicher Stamm beider Drosselblutadern auf der rechten Seite (tr. com. ven. jug. et ven. subcl. dextrae lateris.)
- 38. Stamm der oberen Hohlvene (vena cava superior)
- 39. Drosselblutadenstamm, welcher in den rechten Venenstock hinauf steigt und von Herzbeutel umhüllt ist.
