Grafieken Nos. 63, 64 en 65.
 In deze grafieken is met een dikke volgetrokken zwarte lijn omgeven de resultante van de beweging in de verschillende leeftijdsklassen.
 In iedere leeftijdsklasse is verder onderscheiden het vestigings- en vertrekovershot naar de beroepsgroepen, waardoor men dus voor iedere leeftijdsgroep bij mannen en vrouwen kan zien hoe het tusschen de dikke volgetrokken zwarte lijn besloten totale vestigings- of vertrekovershot tot stand komt.

No. 88.

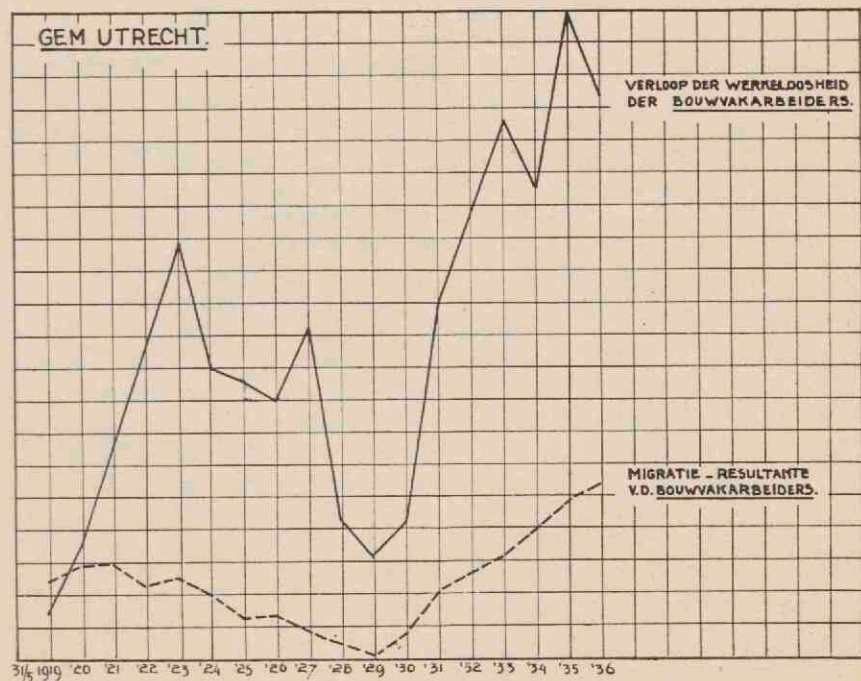

In deze grafieken is uitgegaan, bij het vestigingsoverschot in een bepaalde beroeps-groep, van het hoogste vestigingsoverschot in de voor-crisisperiode (1925—1929 hausse-periode.) Op die hoogte is een stippellijn getrokken voor de crisisperiode 1929—1935; al wat boven die stippellijn ligt is gearceerd en is dus een extra-vestigingsoverschot gedurende de crisisjaren boven het hoogste vestigingsoverschot in de voorafgegaane hausse-periode. Evenzoo is in deze grafieken een stippellijn getrokken op de hoogte van het laagste vertrekeverschot in een bepaalde beroeps-groep in de hausse-periode. De vermindering van dit vertrekeverschot in de crisisjaren (extra-afname van het vertrekeverschot) is vol zwart gekleurd. Staat het vertrekeverschot over in een vestigingsoverschot dan is het boven de nullijn weer gearceerd.
