--	--

The first part of the book is devoted to a description of the  
 various species of plants which are found in the  
 country. The author has been very particular in  
 his descriptions, and has given many interesting  
 particulars of their habits and properties. He  
 has also given a list of the medicinal plants  
 which are used in the country, and has  
 described their uses and effects. The second  
 part of the book is devoted to a description of  
 the various species of animals which are found  
 in the country. The author has been very  
 particular in his descriptions, and has given  
 many interesting particulars of their habits  
 and properties. He has also given a list of  
 the medicinal animals which are used in the  
 country, and has described their uses and  
 effects. The third part of the book is devoted  
 to a description of the various species of  
 minerals which are found in the country. The  
 author has been very particular in his  
 descriptions, and has given many interesting  
 particulars of their habits and properties. He  
 has also given a list of the medicinal  
 minerals which are used in the country, and  
 has described their uses and effects.

The second part of the book is devoted to a description of the various species of animals which are found in the country.

The first part of the book is devoted to a description of the various  
 species of plants which are found in the country. The author has  
 been very particular in his descriptions, and has given many  
 interesting particulars concerning the habits and properties of  
 the several kinds. He has also taken notice of the several  
 diseases which are common to the country, and has given a  
 full account of the manner in which they are contracted, and  
 the best method of curing them. The second part of the book  
 contains a description of the several kinds of animals which  
 are found in the country, and a full account of their  
 habits and properties. The third part of the book is devoted  
 to a description of the several kinds of minerals which are  
 found in the country, and a full account of their  
 habits and properties. The fourth part of the book is devoted  
 to a description of the several kinds of fossils which are  
 found in the country, and a full account of their  
 habits and properties. The fifth part of the book is devoted  
 to a description of the several kinds of metals which are  
 found in the country, and a full account of their  
 habits and properties. The sixth part of the book is devoted  
 to a description of the several kinds of stones which are  
 found in the country, and a full account of their  
 habits and properties. The seventh part of the book is devoted  
 to a description of the several kinds of shells which are  
 found in the country, and a full account of their  
 habits and properties. The eighth part of the book is devoted  
 to a description of the several kinds of insects which are  
 found in the country, and a full account of their  
 habits and properties. The ninth part of the book is devoted  
 to a description of the several kinds of birds which are  
 found in the country, and a full account of their  
 habits and properties. The tenth part of the book is devoted  
 to a description of the several kinds of beasts which are  
 found in the country, and a full account of their  
 habits and properties.

To the Hon. Secy of the Interior  
 Wash D.C.  
 I have the honor to acknowledge  
 the receipt of your letter of the  
 11th inst. in relation to the  
 application of J. M. Smith for  
 a patent for an improvement in  
 the mode of constructing  
 a certain class of bridges  
 and in reply to inform you  
 that the same has been  
 referred to the proper  
 authorities for their consideration  
 and will be reported to you  
 in due season.
