Preface to the Fourth Edition.

—(o)—

Four years have passed since *CEADTA CAINNTE GRAMADAIGE* was first placed in the hands of Irish students. It has had a very extensive circulation, three large editions having been exhausted in a little over three years. Since last autumn the book has, unfortunately, been out of print, but the inconvenience thus caused to many students will, in some measure, be compensated for by the fact that a larger and, it is hoped, more helpful edition is now available.

But little change has been made in the **Irish Lessons**, and, so far as these are concerned, the present book can be used in classes by the side of the last edition. A new lesson, on Indirect Speech, has been included, as this construction causes considerable difficulty to many elementary students.

With the object of making the **Explanatory Grammar** portion of the book, *a complete explanation of the whole body of Modern Irish Grammar*, that part has been entirely re-written, and has been enlarged by more than half. Within its pages can now be found as much information concerning the essentials of Irish grammar as experience has proved to be necessary for the student of the language. Only grammatical experts will require more, and the book has not been compiled for such. To facilitate classwork, the Explanatory Grammar has, in addition, been arranged in numbered sections; and, for the first time in a grammar of modern Irish, a **Subject-Index** is given.

For purposes of revision, a **Summary of Grammar** has been appended. This includes complete paradigms of the Noun, Article, Adjective, and Verb, and also outlines of the Analysis of Sentences. As the latter is the first published attempt treating of the analysis of Irish sentences generally, the author will be glad to receive any suggestions which may tend towards its improvement.

It is no longer necessary to defend the method of language teaching on which this book is based, but it may be well to point out that Accidence, which deals with changes in the forms of words, and Syntax, which deals with their relation to other words and the reason for such changes, are here treated of together. That the form and the function of the word must be learnt at the same time is a principle which underlies the method adopted in all up-to-date language text-books. Grammars of a past age usually attempted to discuss accidence and syntax separately.

The terminology adopted in the Explanatory Grammar is (so far as suited to Irish) that recommended by the International Committee on the Grammatical Nomenclature of German, French, English, Latin, and Greek. The Irish Grammatical Terms used in the Lessons were sanctioned at a conference of Principals of the Gaelic Colleges.

CEADTA CAMNTE GRAMADAIGE, with a first edition of only about one hundred and forty pages, now contains over two hundred and twenty pages (about forty of which consist of matter not included in previous editions). It has reached the maximum size consistent with usefulness as a text-book, and will not, therefore be further enlarged.

Notes on Contents.

—(o)—

The student is recommended to consult, in the first instance, the Tables of Contents at pp. 9-II, and at p. 128, and thus endeavour to obtain a general idea of the contents and order of the whole book before proceeding to study same in detail.

The book contains:—

(A) Irish Lessons (pp. 15-124);

(B) Explanatory Grammar, etc., chiefly in English, (pp. 128-224).

(A) IRISH LESSONS.

There are one hundred conversational grammar lessons, exclusively in Irish. These have been composed and arranged on a definite plan to include the fundamental facts of the entire grammar of modern Irish. The student who masters these one hundred lessons should, consequently, have a sound, practical knowledge of the whole grammatical construction of the spoken Irish language.

For purposes of study the lessons may be considered to be grouped as follows:—

Lesson Groups.	<i>PART I.</i>	<i>Lessons.</i>	<i>PART II.</i>	<i>Lessons.</i>
(a) Regular Verbs	...	1-29	(c) Noun, Article, Adjective	... 51-78
(b) Irregular Verbs	...	30-50	(d) Numerals, Pronouns, &c.	... 79-91
		(e) Subjunctive and Autonomous	...	92-100

The majority of students will find it advisable to work Parts I. and II. concurrently—*i.e.*, to include Lessons I and 51 in the first day's (or first two days') study, and thus onwards, completing, *e.g.*, groups (a) and (c) at about the same time—and the book has been planned accordingly.

Progress. Intelligent students of about twelve years of age and upwards who have learned Irish for a year or so, will probably be able to work through groups (a) and (c) within twelve months. The Irish in these groups, *i.e.*, (a) and (c), is, on the whole, probably easier than that of any simple Irish text published. Students whose course of Irish lessons does not extend over the entire year should aim at studying in their first session's work (say, of seven or eight months) the Past, Future, and Present-Habitual Tenses, and Imperative Mood (pp. 15-34), and the Noun and Article (pp. 67-86).

Such students will require about three years to study the whole book. Those who work uninterruptedly at their Irish studies throughout the year will, even though they may have been only elementary students when commencing, be able to study the book in two years. Fairly advanced students, including those preparing for the examinations of the Middle and Senior Grades (Intermediate), Matriculation and Arts (University), and Teacher's Certificate, who may not require to study the earlier portions in detail, will probably be able to read the entire book within a year.

Most students find the Subjunctive Mood and the Autonomous Form difficult, and hence the lessons dealing with these, group (e), have not been included with the other lessons on the verb.

(B) EXPLANATORY GRAMMAR.

This section follows the order of the one hundred Irish Lessons in (A), explaining the leading grammatical feature of each. The explanatory grammar relating to one lesson should always be carefully studied in connexion with that lesson before the student proceeds to the next. *E.g.*, page 15 and page 129 (Past Tense), should be studied before commencing page 16, and, similarly in Part II., pp. 68 and 152 (Gen. case, sing., 1st decl.), should be studied before attempting page 69.

Many important grammatical facts which could not be conveniently included with the conversational lessons of **Grammar of Modern Irish.** (A) are dealt with in the Explanatory Grammar, the aim being to make the latter section, (B), of the book, as far as practicable, a **complete but easy grammar of modern Irish.** The following portions thereof may, owing to their relative difficulty, be postponed until the book is being studied a second time, *viz.*, (1) matter enclosed within square brackets, []; (2) formation of irregular verbs (§§ 228-244); (3) notes on the article (§ 246); and (4) analysis of sentences (pp. 205-209). The notes on **Analysis** are intended for those who know Irish fairly well, and particularly for teachers of the language.

In this portion are set out, in clear tabular form, and *for revision purposes*, full declensions of the Noun, Article and **Summary of Grammar.** Adjective, and complete conjugation of the Regular Verb, and of *deáim*, etc. For summary of the conjugation of the other irregular verbs, the elementary student should consult pp. 64, 65, and § 99, and more advanced students (in addition) p. 121 and § 242.

**Subject-
Index.**

This is an alphabetically arranged index to practically every feature of modern Irish grammar. An Irish student desirous of obtaining information on any grammatical point will, on consulting this index, be referred to the section of the Explanatory Grammar where, it is hoped, his difficulties may be solved.

The book concludes with a list of Irish Grammatical Terms (pp. 216-218) and Vocabulary (pp. 219-224) of the more difficult words in the Lessons.

(A) AND (B): GENERAL.

Exercises. Included with practically every Lesson are short Direct Method exercises (Αὐθαγὴν Cleáctá). These cover the whole ground-work of Irish construction, and it is essential to the student's progress that he work each and every one of them. They form an important aid to free composition in Irish, and have been found more really helpful to students than the usual translation exercises.

Revision. In learning Irish, or any language, one can make no real progress without *frequent and regular revision*. The matter in each lesson, and the general plan of the book, with its summaries at definite intervals, have been arranged to facilitate, and, if possible, to ensure, frequent revision. At certain stages of the Explanatory Grammar, *Revision Questions* are included. These questions should be answered in writing, and examples of each grammatical point referred to should be given, and always in sentences.

Spelling. sc-, sġ-: These are about equally common in modern Irish books (e.g., rġíob, rġíob; ıarġ, ıarġ). The spelling rc, rp, rġ, is used in this book, and in Father Dinneen's Dictionary.

sin: The dem. adj. rın, is, in M., pronounced rın when used after broad sounds, and in such position is frequently spelled rın. Similarly, annrın is, in M., pronounced annrın.

ar, őr: These poss. adjs. are frequently spelled ár, őr.

M., C., U., standing, respectively, for Munster, Connacht, and Ulster usage, denote the few provincial variants which it has been found necessary to give in this book. Such variants are not always confined to the districts thus indicated.

EXPLANATORY GRAMMAR.

FIRST PART.

THE VERB.

(I.) REGULAR VERBS.

Lesson I.—PAST TENSE (I.)

Do óúñ ré Δ leáðar.

1. The Verb is the most important word in a sentence (Latin, *verbum*, word: Irish, *briathar*); and in Irish, it is placed at the beginning of its sentence or clause. It is the part of speech by means of which we state something, ask a question, or give a command.

2. The form of the verb used in commanding or requesting a person to perform an action [the Imperative Mood, second person, singular] is the stem, or simplest form. In the sentence (a) *óúñ do leáðar*, *óúñ* is an example of this form.

3. In (b) *do óúñ ré Δ leáðar*, *do óúñ* is an example of the Past Tense. Tense is the form (or inflexion) which a verb takes to express change of *time*, past, present, or to come. On comparing the forms of the same verb in (a) and (b), we notice in the Past Tense the particle *do* before the stem. $\left. \begin{array}{l} \text{Óúñ} \\ \text{Do óúñ} \end{array} \right\}$

When the first letter of the stem is an aspirable consonant (*b, c, d, f, s, m, p, r, or t*), it is aspirated after this particle (*óúñ, fúiró*) *Do* becomes *O'* with verbs in which the initial letter of the stem is a vowel, or *r* (*o'éiríς, o'fás*).

4. Pronunciation. Before aspirable consonants, *Do* is frequently omitted colloquially. In answering questions, and in slow, deliberate speech, *do* is usually pronounced, but never with stress of voice.

Lesson 2.—PAST TENSE (II.)

An úin ré a leabhar? Do úin. Níon úin.

5. Question and Answer. Note (a) that commencing the question is the interrogative particle An; (b) that a negative answer commences with Níon, and an affirmative with Do; and (c) that the verb used in the question is repeated in the answer.

When the sense requires it, the particle Ná (Interrogative Negative) is used instead of An (Ná rúir?)

Lesson 3.—PAST TENSE (III.)

Mícheál: "Dúbadar t. Sur úin p. a leabhar."
Donnchadh: "Dúbadar s. Ná úin o. a leabhar."

6. Micheal tells us what Tadhg said (in the affirmative form); Donnchadh, what Seaghan said (negative form). Notice the use of the conjunction Sur in reporting affirmative, and of the conj. ná in reporting negative statements. Sur, or ná as required, must be used, in the Past Tense, before every sentence thus reported. In such (*dependent*) clauses, the actual words of the speaker quoted are not used.

The student should carefully note the distinction between direct and indirect (or reported) speech. In the latter, a different form of the particle is used and, as will be seen in later lessons, the verb sometimes takes a different form. E.g.,

	Tadhg: "P. closed his book." "Do úin p. a leabhar."	} Direct Speech.
	Seaghan: "D. did not close his book." "Níon úin o. a leabhar."	
<i>Main Clause.</i>	<i>Dependent Clause.</i>	} Indirect or Reported Speech.
Tadhg said	that P. closed his book.	
Dúbadar t.	Sur úin p. a leabhar.	
Seaghan said	that D. did not close his book.	
Dúbadar s.	Ná úin o. a leabhar.	

Note that in such dependent clauses the conj.—which is frequently omitted in English, e.g., "I knew (that) it was he"—must, in Irish, always appear and be placed immediately before the verb. The main clause may be a statement (as in this Lesson); or a command or request (as in Lessons 9 and 10.)

7. Particles. In Irish, certain particles ("little parts" or words which cannot, now, be conveniently assigned to any part of speech) are used with the verb. They vary in form for some tenses. In the Past, the interrogative particle An combines with ro, resulting in ar. Similarly, ro affixed to the negative particle ní — níon; to the conj. so ("that," affirm.), —sur; to the conj. ná or nac ("that," neg.), —ná; to the adverb cá ("where"), —cár. None of these particles, etc., ever gets voice stress or emphasis.

Lessons 4, 5. -PAST TENSE (IV.)

8. Person,	SINGULAR.	PLURAL.
1st.	ṪO ṪÚNAṪ.	ṪO ṪÚNAMAṪ.
2nd.	ṪO ṪÚNAṪ.	ṪO ṪÚNABAṪ.
3rd.	ṪO ṪÚN.	ṪO ṪÚNABAṪ.

9. Padruig tells us what he himself did (ṪO ṪÚNAṪ)—*i.e.*, First Person. Tadhg, speaking to Padruig, tells him what he (Padruig) did (ṪO ṪÚNAṪ)—*i.e.*, Second Person; and so on. Hence, the verb can, by an ending, show the pronoun (I, you, we, ye, they). The forms of the verb with pronominal endings (the synthetic forms) are a source of great beauty and strength to the language. In some districts the forms ṪO ṪÚN MÉ, ṪÚ, etc. (analytic) have recently come into use.

10. Pron. The *ṛ* in —MAṪ and —BAṪ is pronounced slender in Munster, and is frequently so written, *viz.*, —MAṪṛ, —BAṪṛ.

[In, *e.g.*, ṪO CUIṪEṪAṪ, *e* (slender glide) is inserted before —AṪ, because CUIṪ ends slender.

ṪO ṪÚNAṪ: *Δ* (broad glide) is inserted before —Ṫṛ, because ṪÚN ends broad.]

The synthetic forms of Ṫ'OPCAṪ are pronounced Ṫ'OPCAṪAṪ; —MA(*ṛ*)Ṫ, —BA(*ṛ*)Ṫ, —EṪAṪ; *i.e.*, as if from a stem in —ṪṢ (as ÉṪṪṢ); and, generally, where the synthetic forms are in use, the pronominal endings affixed to stems of two syllables ending in *Ṫ*, *m*, *n*, *ṛ*, *ṛ*, or *ṫṢ*, not preceded by a long vowel, are usually pronounced —ṪAṪ, etc. When endings for person, etc., are affixed, such stems in —Ṫ, —*n*, —Ṫṛ, —Ṫṛ, are syncopated or shortened, as Ṫ'OPCAṪ.

REVISION QUESTIONS. (A)

—————(o)—————

(All examples must be in Irish, and in complete sentences.)

—————
Revise Lessons 1 to 5.
—————

1. Why is the Verb so called ?
2. What is meant by Tense ?
3. How is the Past Tense (a) affirmative, (b) negative, of a Verb formed ?
4. Give examples of Past Tense showing the use of (a) ṪṪṪ, (b) *n*AṪ.
5. What are the pronominal endings of the verb in this tense ?
6. When are the endings —EṪAṪ and —AṪAṪ affixed to the stem of a verb in the Past ?
7. What particles, conjunctions, etc., are used with this tense ?

(Lesson 6.—DIRECTION (I.)

11. In this lesson are introduced some commonly used adverbs, showing changes to denote (1) rest in, (2) motion to, and (3) motion from, a place.)

Lessons 7, 8.—**IMPERATIVE MOOD.**

12. The Imperative Mood is the mood of *command* or request, or the like. The mood of the verb in Lessons 1 to 5 is the Indicative, which merely *indicates* as an actual fact, or asks a question. There are also moods of wish, doubt, etc., which will be dealt with in subsequent lessons. The form of the verb used to express each change of meaning, *i.e.*, the *manner* in which the statement is made, is called a **mood** of the verb.

13.	Person.	SINGULAR.	PLURAL.
	1st.	(<i>ṡúnaim.</i>)	<i>ṡúnaimír.</i>
	2nd.	<i>ṡún.</i>	<i>ṡúnairṡ.</i>
	3rd.	<i>ṡúnairṡ.</i>	<i>ṡúnairṡír.</i>

Notice the various pronominal endings, in the singular and plural (*i.e.*, denoting the pronoun, or person—first, second, etc.), and further that the endings are different from those in the Past Tense. In the third person, I ask, or order, that Padruig (Padruig and Seaghan, etc.) do certain actions, but, in expressing my desire, I do not address Padruig (or Padruig and Seaghan, etc.) directly. The imperative first person sing., is rarely used.

14. Pron. 2 SG.: stems in *-iṡ* or *-irṡ* are prond. *-iṡ* in M., as *éiríṡ, ruiṡ*; in C., and U. these, *e.g.*, are *éirí, rui*.

3 SG.: ending *-(e)airṡ* is prond. *-uē* in M., as *ṡúnuē*; in C., and U. as *e.g.*, *ṡúnú*, but as *-(u)ir* before a pronoun beginning with *r*.

	East M.	West M.	C. & U.
2 PLU.: stems in <i>-iṡ</i> , as <i>e.g.</i> , <i>éiríṡ</i>	<i>éiríṡ</i>	} <i>éiríṡ</i>	} <i>éiríṡ</i>
or <i>irṡ</i> , as <i>e.g.</i> , <i>ruiṡ</i>	<i>ruiṡ</i>		
stems in <i>-ir</i> , etc., as <i>e.g.</i> , <i>orclairṡ</i>	<i>orclairṡ</i>		
Other stems,	as <i>e.g.</i> , <i>ṡúnairṡ</i>	<i>ṡúnairṡ</i>	<i>ṡúnairṡ</i>

The *-m*- of 1 plu., and the *-o-* of 3 plu., are broad in C. and U. when the stem ends in a broad vowel, as *ṡúnaimuir, ṡúnairṡuir*.

In M., an old form of 1 plu., in *-am* (*éiríṡeam, etc.*) is frequently used.

Lesson 9.—VERBAL NOUN. (I.)

Θυβραιτ λειρ Δ λεαβαρ το ούναο. (A)
 Θυβραιτ λειρ ρυιόε. (B)

15. A Verbal Noun is the name of an action (or state). The words ούναο and ρυιόε (in A and B), being names of actions, are Verbal Nouns.

16. You will observe that in sentences as A above, the Verbal Noun is at the end of its phrase (the verb itself, ούν being transitive in these cases); and that in such sentences as B, the verbal noun commences the phrase in which it occurs (the verb itself, ρυιό, e.g., being intransitive).

17. In ούν το λεαβαρ, the verb ούν is transitive, because the action passes on to or affects λεαβαρ (the object). Συιό is intransitive, because the action does not affect any object. We can say εαο το ούν ρέ? but not εαο το ρυιό ρέ?

18. Ending. As a general rule, when the stem is:—(I.) a word of one syllable the verbal noun is formed by adding αο (ούν, ούναο); (II) a word of two syllables ending in ις, the verbal noun ends in υςαο (βαλις, βαλιςαο). Note various forms as you meet them in reading.

19. Pron. Το in such phrases as...α λεαβαρ το ούναο is a preposition, and is usually pronounced, and frequently written, Δ. When the preceding word ends in a vowel, this preposition is frequently omitted before consonants (αν εατα 'ξεαρηαο), and it often takes the form of Δ ο (Δ ο'οραιιτ) before vowels. The ending -υςαο is pron. ύ (somet. ύ-ύ. The ending -αο is pron. ύ in C., & U., and Δ (unstressed) in M.

20. Notice that the imper. mood in direct speech, as "Ούν το λεαβαρ," becomes the verbal noun }
 in indirect speech, as, } Θυβραιτ λειρ Δ λεαβαρ το ούναο.

Lesson 10.—VERBAL NOUN (II.)

"Νά ούν αν ρυινεός." "Νά ρυιό."
 Θυβραιτ λειρ Ξαν αν ρυινεός το ούναο. ...Ξαν ρυιόε.

21. Νά (negative particle) is placed before the Imperative Mood form when a negative order, or request, is made (Νά ούν...). With the corresponding verbal noun, the preposition Ξαν is used to express negation, (...Ξαν αν ρυινεός το ούναο).

Lesson 11.—VERBAL ADJECTIVE.

Τά αν λεαβαρ ριμ ούντα αςατ.

22. As a Verbal Noun is the name of an action, so a Verbal Adjective describes the condition or state of an object as affected by the action (Τά αν εοιρνεατ μύετα...). The Verbal Adjective thus defines or qualifies its noun.

23. It is formed by adding τε or τα to the stem, according as the final consonant of same is slender or broad (βαλιςτε, ξεαρηετα). If the final con. of the stem is a dental, i.e., ο, η, τ, λ, or ρ; or if the stem is a monosyllable ending in ε, ο, ε, or ξ, the τ of this ending is not aspirated (ούντα; ιτε).

REVISION QUESTIONS. (B)

—(o)—

Revise Lessons 7 to 11.

1. What is meant by the Imperative Mood of a verb ?
2. Give the pronominal endings of the verb in this mood.
3. What is a Verbal Noun ? Give examples of four Verbal Nouns with different endings.
4. Define transitive and intransitive verbs, and give examples.
5. Give examples of (a) a Verbal Noun commencing, and (b) of a Verbal Noun ending the phrase in which it occurs.
6. Give examples of the use of $\eta\acute{\alpha}$ before the Imper. Mood and of $\xi\alpha\eta$ before a Verbal Noun or phrase.
7. How is a Verbal Adjective formed ?
8. When is the τ of the ending not aspirated ?

Lesson 12.—FUTURE TENSE (I.)

24. We are told what Padruig *did* yesterday ($\text{Ὁ}^{\prime}\epsilon\iota\mu\iota\zeta\ \rho\acute{\epsilon}\dots$, Past Tense), and what he *will do* to-morrow ($\text{Ἔ}\rho\epsilon\acute{\omicron}\acute{\sigma}\acute{\alpha}\iota\omicron\ \rho\acute{\epsilon}\dots$, Future Tense). The particle οο (with the resulting aspiration) does not appear in the future form: the verb shows by means of a termination the change to denote future tense. Notice the two ways of forming the future from the stem: $\text{Ὅ}\mu\eta\text{-}\rho\text{-}\acute{\alpha}\iota\omicron$, $\text{ο}\rho\epsilon\iota\text{-}\acute{\omicron}\acute{\sigma}\text{-}\acute{\alpha}\iota\omicron$; it is formed in the latter manner, as a rule, when the stem is a word of two or more syllables ending in a slender consonant ($\epsilon\iota\mu\text{-}\iota\zeta$, $\text{ο}\rho\text{-}\acute{\alpha}\iota\iota$), and in the former manner for all other verbs ($\text{ο}\acute{\upsilon}\eta\eta$, $\text{κο}\iota\mu\epsilon\acute{\alpha}\omicron$).

25. Verbs of the $\text{-}\rho\text{-}$ future belong to the First Conjugation.
Verbs of the $\text{-}\acute{\omicron}(\acute{\epsilon})\text{-}$ " " " Second Conjugation.

By "Conjugation" is usually meant a tabulated summary, or *joining together*, of all the inflexions of a verb, *i.e.*, of the various changes in form to express tense, person, etc.

26. The following two classes of verbs belong to the 2nd conjugation: verbs of two or more syllables (a) ending in $\text{ι}\zeta$ (or $\text{υ}\iota\zeta$) as $\epsilon\iota\mu\iota\zeta$, $\text{ce}\alpha\eta\eta\iota\zeta$, or

(b) ending in $\text{ι}\iota$, $\text{ι}\mu$, $\text{ι}\eta$, $\text{ι}\rho$, or $\text{ι}\eta\zeta$ not preceded by a long vowel.

E.g., 1st conj., $\text{ο}\acute{\upsilon}\eta\eta\text{-}\rho\text{-}\acute{\alpha}\iota\omicron$, $\text{κο}\iota\mu\epsilon\acute{\alpha}\omicron\text{-}\rho\text{-}\acute{\alpha}\iota\omicron$.

2nd conj., $\epsilon\iota\mu\text{-}\epsilon\acute{\omicron}\acute{\sigma}\acute{\alpha}\iota\omicron$, $\text{ce}\alpha\eta\eta\text{-}\acute{\omicron}\acute{\sigma}\acute{\alpha}\iota\omicron$; $\text{ο}\rho\epsilon\iota\text{-}\acute{\omicron}\acute{\sigma}\acute{\alpha}\iota\omicron$.

27. Pron. The -**ŏc**- of these verb is prond. -**ŏ**- in M., and South C.; but usually -**ŏh**- in North C. and U.

The -**p**- has now, practically, become **h**. When the final letter of the stem is **b**, **o**, or **s**, it becomes, under the influence of the **h** sound, **p**, **t**, or **c**, respectively. E.g., **rcuabpao**, **ptaopao**, **teapao** are prond. **rcuapao**, **ptapao**, **teapao**. Phonetically, this change in pron. is termed unvoicing. **l**, **m**, **n**, and **p** are also unvoiced (*i.e.*, prond. **hl**, etc.) under similar conditions. The breath consonants **p**, **t**, **c**, **f**, **p**, can suffer no such change. In a few districts, the -**p**- is still fully prond. when the final letter of the stem is a vowel, as **ŏi-pao**; or an aspd. con., as **caic-pao**.

In C. & U., the first plural is -**ŏcamuro** or -**camuro**. In **m**., the ending -**ro** is (as usual with -**ro** or -**rs** in M.) prond. -**rs**, but with -**ŏ** silent before pronouns. An old ending of 1st plu. in -**am** (**ŏimeŏcam**, etc.) is still common in M.

Lessons 13, 14.—FUTURE TENSE (II. & III.)

28. Person.	SINGULAR.	PLURAL.
1st.	ŏunpao .	ŏunpaimio .
2nd.	ŏunpaip .	ŏunpairo (pio) .
3rd.	ŏunpairo .	ŏunpairo .

Padruig tells us what he will do to-morrow (**ŏunpao**); and **Tadhg**, addressing **Padruig**, tells him what he (**Padruig**) will do (**ŏunpaip**), and so on. Note the endings of the various synthetic forms in the future tense.

In the 3rd plu., both the synthetic form of the verb and the nominative are, in M., still commonly used in all tenses, as **ŏipro na comuiprain ŏ**. **ŏ'ŏirpŏeapao na pip**. **Tairo piao anpao**.

29. Particles. **an**, **so**, **nac**, or **ca** eclipses an initial con., and prefixes **n**- to an initial vowel. In M., **na**, which does not affect an initial con., but prefixes **n**- to an initial vowel, is used instead of **nac** (= "that", neg.) The **n** of the interrog. **an** is *not* prond. It is represented by eclipsis of initial con., and by **n**- before initial vowel of verb.

The interrog. **an** is fully prond. in **ip** sentences, as **an (ip) ŏ rim ŏ?** **an (ip) teapao ŏ rim?** Elsewhere it becomes **a'**.

Lesson 15.—FUTURE TENSE (IV.)

ŏeipim so ŏunpairo pŏ a teapao.
ŏubapc so ŏunpairo pŏ a teapao.

30. This lesson shows the form of the future used in dependent or subordinate clauses (*vide* § 5 and 6), such as after the conjunction **so** (or **na**, **nac**). Note the important difference between the form after **ŏeipim** (or, **ip ŏois** **uom**, etc.) *present*, as **ŏeipim so ŏunpairo pŏ a teapao**, and that after **ŏubapc** (or, **ŏa ŏois** **uom**, etc.) *past*. The form of the future tense in a dependent clause following a verb in the *past* tense is called the **Secondary Future**; as **ŏubapc so ŏunpairo** (Sec. Fut.) **pŏ a teapao**.

In English, too, there is a similar difference in construction: He says, he thinks, etc., (that) he *will*. He said, he thought, etc., (that) he *would*.

REVISION QUESTIONS. (C)

—(o)—

Revise Lessons 12 to 15.

1. What is meant by the Future Tense of a verb ?
 2. How is the Future Tense formed ?
 3. Define "Conjugation."
 4. Give examples of verbs belonging (a) to the 1st, (b) to the 2nd conjugation.
 5. What are the pronominal endings in the Future Tense ?
 6. What particles, conjunctions, etc., are used with this tense ?
 7. How do these particles, etc., affect the initial letter of the verb ?
 8. Give examples of the Secondary Future.
-

(Lesson 16.—TIME.)

31. Note that the names of the days of the week when used as nouns are $\Delta\eta$ $\lambda\upsilon\alpha\eta$, etc., and when used in adverbial phrases are $\Theta\iota\alpha$ $\lambda\upsilon\alpha\iota\eta$, etc. ; also, that we reckon Monday as the beginning of the week.)

(Lesson 17.—DIVISIONS OF THE YEAR.)

32. Note that we reckon Spring from St. Brigid's Day (1 Feb.), and thus onwards for the other seasons.)

Lesson 18.—PRESENT-HABITUAL TENSE (I.)

$\Theta\acute{\upsilon}\eta\lambda\eta\eta$ $\rho\acute{\epsilon}$ Δ $\lambda\epsilon\alpha\delta\alpha\iota\tau$ $\zeta\omicron$ $\mu\iota\eta\tau\iota\epsilon$.

33. The *form* of the verb in this lesson is sometimes called the Present (Indicative) ; but in *function* it is the **Present-Habitual**. It denotes repeated or customary action in present time (what takes place), and an appropriate adverbial phrase ($\zeta\omicron$ $\mu\iota\eta\tau\iota\epsilon$, ι $\zeta\omicron\sigma\acute{\iota}\eta\eta\mu\iota\tau\omicron\upsilon\epsilon$, etc.) is expressed or understood.

In verbs which express a mental action as $\tau\upsilon\iota\zeta\epsilon\alpha\eta\eta$, $\Delta\iota\mu\zeta\epsilon\alpha\eta\eta$, (a) action in the present and (b) habitual action are expressed by the same form as (a) $\tau\upsilon\iota\zeta\epsilon\alpha\eta\eta$, $\Delta\iota\mu\zeta\epsilon\alpha\eta\eta$ $\rho\acute{\iota}$ $\acute{\epsilon}$ ($\Delta\eta\sigma\iota\tau$) ; ... (b) $\eta\upsilon\alpha\iota\tau$ $\beta\iota\omicron\eta\eta$ $\rho\acute{\epsilon}$ $\Delta\zeta$ $\lambda\epsilon\alpha\delta\alpha\iota\tau$ $\delta\tau$ $\delta\tau\omicron$. English has a similar usage.

Lesson 19.—PRESENT-HABITUAL TENSE (II.)

34. **Particles.** The initial consonant of the verb is eclipsed after $\Delta\eta$? $\eta\alpha\acute{\epsilon}$? $\text{C}\acute{\alpha}$? — $\zeta\omicron$, — $\eta\alpha\acute{\epsilon}$; and aspirated after $\eta\eta$, $\text{C}\alpha\text{?}$? $\text{C}\iota\alpha$? $\eta\upsilon\alpha\iota\tau$.

[The particles, etc., used with the Fut., Pres.-Hab., Past-Hab., and Concl.

are :— $\Delta\eta$, $\eta\eta$, $\zeta\omicron$, $\eta\acute{\alpha}$ ($\eta\alpha\acute{\epsilon}$), $\text{c}\acute{\alpha}$; and with the Past are :— $\Delta\tau$, $\eta\iota\omicron\tau$, $\zeta\upsilon\tau$, $\eta\acute{\alpha}\tau$, $\text{c}\acute{\alpha}\tau$].

Lesson 20, 21.—PRESENT-HABITUAL TENSE (III.)

35. Person.	SINGULAR.	PLURAL.
1st.	ὑὀνάιμ.	ὑὀνάιμιῶ.
2nd.	ὑὀνάιπ.	ὑὀνάιπ (πιῶ).
3rd.	ὑὀνάι.	ὑὀνάιῶ.

These lessons show the synthetic forms of the verb in the Pres.-Hab. tense.

36. **Pron.** The pronominal endings of ὀρκαίτ (and similarly of all verbs in -πι etc., *vide* § 10) are prond. as if the stem ended in ιξ, as ὀρκαίμ, etc. The plu. ending in C. and Ū. is -αμιοῶ. The synthetic forms in the 2 sg. are becoming rare, βίονπ τῶ, ἐπιγεαππ τῶ, etc., being more frequent.

37. This form of the verb is used after μά (if) in referring to future time. The verb in a μά clause is indicative mood, as the supposition is treated as a fact. Μά βίονπ πέ αππιο ἰ μβάρκαδ (I assume he will be) ἐπίρεαῶ ἐ. The neg. form of μά is μνα (eclipsing). Μνα is frequently prond. μαμα, somet. μπ(α).

(Lesson 22.—DIRECTION (II.))

38. [“ The Celts, like the rest of the Indo-Europeans determined their orientation by looking at the rising sun. Hence, the East was regarded as ‘ before,’ the West as ‘ behind,’ the South as ‘ right,’ and the North as ‘ left.’ ”—WHITLEY STOKES. *Eriu*, III., 13].

Note that ὀ, in ὀ ὀεαπ etc., is not the prep. — “ from,” but the modern form of the older ὀο, or πῶ — “ towards.”)

Lesson 23.—PAST-HABITUAL TENSE (I.)

ὀ ἐπιγεαῶ ῶ. απ α πέ α ἰοξ γκαδ μαππιοπ αππιοῶ.

39. The Present-Habitual Tense describes what takes place (usually, seldom, often, every morning, etc.) The Past-Habitual describes what “used” to take place at some period of time in the past (every morning, etc. of last week, last year, when he was young, etc.) Contrast, *e.g.*, the form used to describe what Tomas does every morning now (Present-Habitual) with what he did, or was accustomed to do every morning when he was young (Past-Habitual). This is sometimes termed the Imperfect Tense.

Lessons 24, 25.—PAST-HABITUAL TENSE (II.)

40. Person.	SINGULAR.	PLURAL.
1st.	ῶο ὄύναινη.	ῶο ὄύναμιρ.
2nd.	ῶο ὄύνητα.	ῶο ὄύνησὸ (ῖβ).
3rd.	ῶο ὄύνησὸ.	ῶο ὄύνησῶιρ.

These lessons show the synthetic forms of the verb in the Past-Hab. tense.

41. **Particles.** ῶο aspirates the initial con. of the stem in affirm. sentences, otherwise the particles are used as for the pres.-hab. Note that ῶο does not appear after *ní*, etc., but in the past tense (Less. 2) *ῖ(o)* takes the place of ῶο after particles. E.g., ῶο ὄύνη, *níorí* ὄύνη (past); but ῶο ὄύνησὸ, *ní* ὄύνησὸ (past-hab.)

42. **Pron.** The 3 sg. ending *-(e)σὸ* is prond. *-uç* in M., and *ú* (unstressed) in C. and U. The asp. of *-τ-* of 2 sg. ending generally follows the rule given for asp. of *τ* in *-τα* or *-τε*, *vide* § 23.

REVISION QUESTIONS. (D)

————(o)————

Revise Lessons 18 to 21, and 24, 25.

1. What do the Habitual Tenses, Present and Past, express?
2. Give the pronominal endings of the verb for each of these two tenses.
3. What particles, conjs., etc., are used with the Habitual Tenses?
4. When is the conjunction *μά* used?
5. Give examples of the 3 sg. pres., pres.-hab., past, past-hab., fut. and sec. fut., of the verb *τῠις*, (*a*) affirm., and (*b*) neg.

Lesson 26.—CONDITIONAL MOOD (I.)

Ὅά μβέσὸ β. ἀνηρο, ὀ'έιρεὸσάσὸ ῖέ.....

43. The **Conditional Mood** is used when we say what would happen if something else—improbable, or not a fact—took place. Such sentences usually contain (I.) a condition, and (II.) a consequence or result. The form of the verb used in (II.), *i.e.* the main clause of the sentence, is the Conditional Mood (Ὅ'έιρεὸσάσὸ, ῶο *λέιςρεσὸ*, etc.)

44. [Compare with the same form (Secondary Future) in Lesson 15. Ὅυδμετ *σο* *η-έιρεὸσάσὸ* βάσμετ...etc. The sense is different, however, as may be seen by comparing Lessons 15 and 26, and it is, therefore, incorrect to consider the Conditional Mood and the Secondary Future Tense as being the same. The form is the same, but it has two distinct functions. Cf., ὁά βῠinneὸις, ὀ βῠinneὸις, in which the same form (βῠinneὸις) is used for the dual no. and dat. case.]

Lessons 27, 28.—CONDITIONAL MOOD (II.)

45. Person.	SINGULAR.	PLURAL.
1st.	ὄο ὀύνφαινη.	ὄο ὀύνφαιμιρ.
2nd.	ὄο ὀύνφά.	ὄο ὀύνφάθ (ριθ).
3rd.	ὄο ὀύνφάθ.	ὄο ὀύνφάθιρ.

These lessons show the synthetic forms of the verb in the Cond. Mood. ὀύνφαινη, etc., are also the synthetic forms for the sec. fut., *vide* § 30.

46. **Particles.** The Particles, etc., used are the same as those in the past-hab.

47. **Pron.** The remarks on pron. of -(e)αθ and -ιμιρ in § 14; and on -όε- and -φ- in § 27 apply here. In M., the 2 sg. Cond. ending of both conjugations is always prond. -φά.

[In M. and parts of South C., *all verbs*, regular and irregular, have a fully sounded, broad -φ- in

(a) 2 sg. cond., as ὀ'έιμεφά, ὄο ὀύνφά, ὄο λέιξφά, ὄο-έιφά;

(b) fut. autonomous, as έιμεφαιρ, λέιξφαιρ, έιφαιρ; and

(c) cond. autonomous, as ὄο η-έιμεφ(α)ιθε, ὄο λέιξφ(α)ιθε, ὄο έιφ(α)ιθε. *Vide* § 221, and p. 186 note 1.

With these three exceptions, the -φ- of the fut. and cond. has now, practically, become -η- in all districts.]

REVISION QUESTIONS. (E)

—(o)—

Revise Lessons 26 to 28.

1. When is a verb in the Conditional Mood ?
2. Give examples showing the difference in meaning between verbs in this mood and in the sec. fut. tense.
3. Give the pronominal endings of the verb in the Cond. Mood.
4. What interrog. particles are used in the Past, Past-Hab., Pres.-Hab., Fut., and Cond. ?
5. What particles (if any) are used, (a) affirm. and (b) neg., in answering questions ?
6. With what forms of the verb are ζο, νά (or ναέ), ζυφ and νάφ used ? Give examples of each.
7. Give the particles which (a) aspirate, (b) eclipse an initial consonant.

Lesson 29.—SUMMARY OF TENSES AND MOODS.

48. This Lesson gives the various synthetic forms of the verb (Cυιφτιμ an example) in the Imperative and Conditional Moods; and, in the Past, Future, Present-Habitual, and Past-Habitual Tenses, Indicative Mood.

(II.) IRREGULAR VERBS.

Lesson 30.—THE COPULA. (I.) PRESENT TENSE.

(1)	(2)	(3)
(1r)	μῦντεοῖρ	μῖρε.
Ἄν (,,)	ῥαῖα	ἰ ῖρ?

49. You will observe that in the column headed (3) is the *subject* of each sentence, *i.e.*, what we are speaking about (μῖρε, ἰ ῖρ, etc.). In (2) some information, the *predicate*, (μῦντεοῖρ, ῥαῖα, etc.) is given, or sought, concerning the subject. In (1) is some form of ἴρ—expressed or understood—which serves as *copula*, connecting subject and predicate.

50. When the copula is used with either of the conjs. ῥο or ναὶ in the dependent clause of a sentence, its form changes. *E.g.*,

ἰς μῦντεοῖρ μῖρε.	ἢ ῥοῖαίρ με.
<i>Main Clause.</i>	<i>Dependent Clause.</i>
I say	that I am a teacher.
Ἐῖρμ	ῥη μῦντεοῖρ μῖρε.
I say	that I am not a pupil.
Ἐῖρμ	ναὶ ῥοῖαίρ με.

In such sentences (a) ῥη and (b) ναὶ act as dependent forms of ἴρ, (a) affirm. and (b) neg., respectively. ῥη is a shortened form of ῥηαβ. -αβ is expressed only when the first word of the predicate begins with a vowel (...ῥηαβ ἄλμν...); but if the first word of the predicate is a noun, or a phrase, beginning with a vowel, αβ is frequently omitted (...ῥη ἕλλη ἰ. ...ῥη ἄς οὐτ ἄδαίε ἀτάμ.) After the negative ἢ and the interrogative Ἄν, ἴρ is omitted.

Lesson 31.—(II.) PRESENT TENSE.

(1)	(2)	(3)
(1r)	μῖρε	Ἄν μῦντεοῖρ.

In this lesson, also, the order of words is Copula, Predicate, Subject.

51. Lesson 30.

1. ἴρ, followed by a common noun, adj., prepn., or prepl. pron.
2. The information given, or sought, is of a general nature.
We tell, or ask, *what* the person or thing is.

3. I see a man approaching at a distance, and, not recognising him, say ἴρ ῥεαρ ἕ (or ῥεαρ ἴρ εἰς ἕ). Here the information (ῥεαρ) is indefinite, inasmuch as I do not *identify* the subject (ἕ). I say what he is, not who he is: I classify. We may call these **Classification Sentences**, and in these, ἴρ is followed by an **Indefinite Pred.**

52. Lesson 31.

1. ἴρ, followed by a *personal pron*
2. The information given, or sought, is particular and definite.
We tell, or ask, *who* (or *which*) a person (or thing) is.
3. As the man comes nearer, I identify him, and say
ἴρ ἕ ἰαμ Ὁ Ὀόμναῖι ἕ.

Such sentences may be called **Identification Sentences**, and in these, ἴρ is followed by a **Definite Predicate**.

53. We use the Copula, then, (I.) to classify, (II.) to identify: it couples together two words, or two phrases, or a phrase and a clause, which, in affirmative sentences, stand for the same person or thing. The classification or identity may be denied or affirmed.

ANALYSIS.

54. When the Copula classifies—when we tell or ask, etc., *what* a person or thing (including notion or idea) is—the pred. is indefinite. Here the predicate is a class in which the subject is included. ἵρ μῦντεδῖρ (pred.) μῖρε (subj.); i.e., I am one of the body (or class) known as teachers: I am a teacher. E.g.,

I.	Copula.	Predicate.	Subject.
(1)	ἵρ	βορσα	ἐ ρῖν.
(2)	ἵρ	ζαεθεαί	ἀν ρεαρ ρῖν.
(3)	ἀν (,,)	cuimín teat	ἐ ?
(4)	ἡδέ	βρεάδ ἀν λά	ἀν λά ἰ ποῖν.
(5)	ἵρ	μαῖτ ἀν ρῦθ	ciatl do beit ἄς ουine.

In answering questions which contain the Copula, the neuter pronoun εἶθ may be used to take the place of any Indefinite Predicate. εἶθ is also used to emphasise an Indefinite Predicate, as ἀμαθῶν ἵρ εἶθ ἐ.

55. When the Copula exactly identifies one thing with another (when one—the other), as when we say, or ask, *who* (or *which*) a person (or thing) is, both subject and predicate are definite, as in the following:—

II.	Copula.	Predicate.	Subject.
(1)	ἵρ	μῖρε	Seáδῶν.
(2)	ἵρ	ἰ εἶρε	ἀρ ὀτῖρ ρεῖν.
(3)	ἵρ	ἐ ἀν ραζαρτ	(ἀν ουine) ὀθ βαῖρτ ἐ.
(4)	ἵρ	ἐ mo τεαθαρ-ρα	(ἀν ρῦθ) ἀτά ἀρ ἀν ὑπλάρ.
(5)	ἵρ	ἐ τεαθαρ ἀν caitín ρῖν	(ἀν τεαθαρ) ἀτά ἄζαμ.

56. Note that a def. pred. must be either a personal pronoun standing alone, as (1); or a personal pronoun followed by a definite noun, as in (2), (3), (4), (5). A definite noun may be a proper noun, as in (2); a noun preceded by a def. art., as (3); a noun preceded by a poss. adj. (4); or a noun followed by a def. noun such as the def. noun in (2), (3), or (4) above in the gen. case (5). In (2), (3), (4) and (5), the pronoun after ἵρ is required to complete the definite predicate.

Without this pronoun, a proper noun as pred. would be indefinite: it would not identify or *define*, and hence would become an indefinite noun. ἵρ ὀómnatl ἐ could only mean, "He is a Daniel." Cf., "a Daniel come to judgment." In such sentences as ἵρ ὀómnatl ἀτά μαρ ἀινμ ἀῖρ, ὀómnatl, i.g., is used merely as a *name*: it does not identify the subject.

57. [In all statements, affirm. or neg., the predicate follows the Copula. In the following examples, and in similar apparent exceptions to this law, the pred. is usually represented by $\acute{\epsilon}$ (or $\iota\alpha\omicron$) immediately after the Copula, as :—

	<i>Copula.</i>	<i>Proleptic Predicate.</i>	<i>Subject.</i>	<i>Real Predicate.</i>
(1)	" $\iota\tau$	$\acute{\epsilon}$	$\alpha\tau\eta\mu \alpha \beta\acute{\iota} \alpha\tau\eta$	' $\eta\acute{\alpha}$ $\xi\acute{\epsilon}\lambda\omicron\eta\alpha.$ '
(2)	$\iota\tau$	$\acute{\epsilon}$	$\mu\upsilon\omicron \upsilon\omicron \beta\acute{\iota} \alpha\eta\eta$	' $\eta\acute{\alpha}$ $\mu\alpha\theta\eta\alpha \mu\acute{\iota}\alpha\theta\alpha\eta\iota !$
(3)	" $\iota\tau$	$\acute{\epsilon}$	($\alpha\eta \mu\upsilon\omicron$) $\iota\tau \mu\acute{\alpha}\theta\alpha$ $\lambda\epsilon\iota\tau \alpha\eta \mu\acute{\iota}\xi$	$\xi\omicron \upsilon\beta\eta\epsilon\iota\epsilon\tau\omicron \mu\acute{\epsilon} \tau\acute{\alpha}.$ '
(4)	$\iota\tau$	$\acute{\epsilon}$	$\mu\omicron \tau\upsilon\alpha\tau\eta\mu$	$\xi\omicron \upsilon\beta\eta\iota\tau \alpha\eta \sigma\epsilon\alpha\tau$ $\alpha\zeta\alpha\tau.$
(5)	$\iota\tau$	$\acute{\epsilon}$	$\mu\omicron \upsilon\alpha\tau\alpha\mu\alpha\tau$	$\xi\upsilon\mu\alpha\delta \alpha\eta\lambda\alpha\upsilon\omicron \alpha\tau\acute{\alpha} \mu\acute{\epsilon}$ $\alpha\tau \alpha \mu\acute{\epsilon}\alpha\delta\alpha\tau.$

The real predicate is thus placed at the end of the sentence (a) for effect, as (1) and (2); and (b) when the pred. part contains a verb, as (3), (4), and (5).

Note that in (4) and (5) the pron. $\acute{\epsilon}$ refers, not to the nouns $\tau\upsilon\alpha\tau\eta\mu$, $\upsilon\alpha\tau\alpha\mu\alpha\tau$, but to the clauses $\xi\omicron \upsilon\beta\eta\iota\tau\dots$, $\xi\upsilon\mu\alpha\delta\dots$]

Lesson 32.—(III.) PAST TENSE.

53. The form of the Copula in the Past Tense is $\upsilon\alpha$. $\upsilon\alpha$ usually aspirates the initial consonant of the following word ($\upsilon\alpha \xi\acute{\alpha}\epsilon\theta\epsilon\alpha\lambda\dots$), and appears as υ' before initial vowels. In affirmative sentences it is often preceded by $\upsilon\omicron$, if the following word begins with a vowel, as $\upsilon\omicron \upsilon'\acute{\epsilon}\dots$

59. $\iota\tau$ has, now, no special form in use for the future tense, the present tense form, with suitable context, being employed.

Lesson 33.—(IV.) CONDITIONAL MOOD.

60. The form of the Copula in the Cond. Mood is $\upsilon\alpha\upsilon$, which usually aspirates initial cons. and appears as υ' before initial vowels or ϕ .

[The Subjunctive Past of the Copula is also $\upsilon\alpha\upsilon$: Less. 93.]

61. The following is a Summary of the preceding forms of the Copula :—

<i>Particles.</i>	<i>Present.</i>		<i>Past.</i>		<i>Cond.</i>	
	Before vowels,	cons.,	vowels, or ϕ	cons.,	vowels, or ϕ	cons.
		$\iota\tau$	($\upsilon\omicron$) υ'	$\upsilon\alpha$ (asp.)	($\upsilon\omicron$) υ'	$\upsilon\alpha\upsilon$ (asp.)
$\alpha\eta$		$\alpha\eta$	$\alpha\eta\upsilon'$	$\alpha\eta$ (,,)	$\alpha\eta\upsilon'$	$\alpha\eta$ (,,)
$\eta\acute{\iota}$	$\eta\acute{\iota} \eta$ -	$\eta\acute{\iota}$	$\eta\acute{\iota}\omicron\upsilon\upsilon'$	$\eta\acute{\iota}\omicron\upsilon\upsilon$ (,,)	$\eta\acute{\iota}\omicron\upsilon\upsilon'$	$\eta\acute{\iota}\omicron\upsilon\upsilon$ (,,)
$\xi\omicron$	$\xi\upsilon\mu(\alpha\upsilon)$	$\xi\upsilon\mu$	$\xi\upsilon\mu\upsilon'$	$\xi\upsilon\mu$ (,,)	($\xi\upsilon\mu\upsilon'$, $\xi\omicron \mu\upsilon'$)	$\xi\upsilon\mu$ (,,) $\xi\omicron \mu\upsilon\alpha\upsilon$ (,,)
$\eta\alpha\acute{\epsilon}$		$\eta\alpha\acute{\epsilon}$	$\eta\alpha\acute{\epsilon}\upsilon'$	$\eta\alpha\acute{\epsilon}$ (,,)	($\eta\alpha\acute{\epsilon}\upsilon'$, $\eta\alpha\acute{\epsilon} \mu\upsilon'$)	$\eta\alpha\acute{\epsilon}$ (,,) $\eta\alpha\acute{\epsilon} \mu\upsilon\alpha\upsilon$ (,,)

REVISION QUESTIONS. (F)

—(c)—

Revise Lessons 30 to 33.

1. When is the Copula used ?
 2. What is meant by (a) Predicate, (b) Subject in an 1st sentence ?
Give examples.
 3. Give examples of (a) Identification, and (b) Classification sentences.
 4. Give four examples of definite nouns.
 5. What forms of the Copula are used in the (a) pres., (b) past, (c) condit?.
-

ΑΥΔΙΜ.

- (a) **ΤΑ** ἄν ἐστὶν ἴσα ὄρκα.
 (b) **ΤΑΙΜ** ἕο μαῖτ. **ΤΑ** οἶα ἰδίωτη.

Lesson 34—(I.) PRESENT TENSE.

32. The Copula (ἴρ) classifies or identifies. We use it to tell, or ask, Who or What a person is ; What or Which a thing is ; also negatively in such sentences.

33. The Verb **τᾶ** expresses (a) position ; also (b) condition (which is not necessarily transient or changeable). We use it to tell or ask Where or How a person or thing is ; also to tell Where or How a person or thing is not.

The historic form of **τᾶ** is **ατᾶ**. The initial **α** is not pron. except in relative clauses, ...**ἄν** ἑαυθάρ **ατᾶ** ἀστᾶτ-ῖα.

64. Dependent Forms.

In the Present Tense, a special form of this Verb, *viz.*, **ῖν**, is used:—

- (1) after the interrogs., ἄν ? ἠᾶ ? ἠᾶ ?
- (2) " neg. particles, **ἠῖ**, **ῖα** (U.) ;
- (3) " conjs., **ἕο**, **ἠᾶ**, **ἠᾶ**, **ἠᾶ** ;
- (4) " adverb, **ῖα** ?
- (5) " relative governed by a prep., as **ῖν ἔ ἄν ἄτῖ 1 ἠ-ᾶ**
ῖν **ῖν** **ῖν** (1 ἠ-ᾶ here—"in which")
- (6) " compound relative, as **ῖν ἄ ῖν** ἄν (ᾶ here—"all that").

This is called the *Dependent Form*. The student should carefully note when this is used, as other irregular verbs also have dependent forms for certain tenses and moods, used under similar conditions to the above. The form (**τᾶ** in this lesson) used without, or *free* from the influence of, these particles is called the *Absolute Form*.

65. Pron. The -m- of 1 plu. is broad in C. and U.; *viz.* **τᾶμῖν**. In the 3 plu., both the synthetic form of the verb and the nominative are still frequently used in M., as, **τᾶῖν** ῖν, **τᾶῖν** ἠᾶ ῖν ἄν.

Lesson 35. { (II.) IMPERATIVE MOOD.
(III.) VERBAL NOUN.

66. The forms in the Imper. Mood are from the stem $\beta\acute{\iota}$ with pronominal endings $-\acute{\iota}\mu\acute{\iota}\tau$, etc., as in Less. 7. *Vide* § 14 for pron. of $\beta\acute{\iota}\omicron\upsilon$, etc.

67. Note that $\beta\epsilon\acute{\iota}\tau$ occurs, in the nom. and accus. cases, without $\omicron\omicron$. The prepn. $\omicron\omicron$ (prond. Δ) should be used before $\beta\epsilon\acute{\iota}\tau$ only when it governs the latter in the dat. *Vide* § 117.

Lesson 36. (IV.) PAST TENSE.

68. The Past Tense of $\tau\acute{\alpha}$, namely $\omicron\omicron \beta\acute{\iota}$, is formed (like the examples of Lesson 1) from the Imperative Mood $\beta\acute{\iota}$, by prefixing $\omicron\omicron$, with aspiration of the initial consonant.

69. Note that the endings for person and number (the synthetic forms) are as in Lesson 4. In the various tenses and moods, the pronominal endings of the irregular verbs are the same as those of the regular verbs.

70. In the Past Tense, also, there is a special, or Dependent Form ($\mu\acute{\alpha}\iota\upsilon$) after particles, etc. *Vide* § 64. $\mu\acute{\alpha}$ is followed by the Absolute Form: $\mu\acute{\alpha} \beta\acute{\iota}$, $\mu\acute{\alpha} \tau\acute{\alpha}$.

71. Particles. The particles in the Past, and for all forms of this verb, are $\Delta\eta$, $\eta\acute{\iota}$, etc., as in the present tense, Less. 34. [$\omicron\omicron$, as in Less. 2, forms part (viz., $\mu\acute{\alpha}$ -) of $\mu\acute{\alpha}\iota\upsilon$.]

72. Pron. The endings $-\mu\acute{\alpha}\tau\eta$ and $-\theta\acute{\alpha}\tau\eta$ are prond. in M. as if written $-\mu\acute{\alpha}\tau\eta\mu$, $-\theta\acute{\alpha}\tau\eta\mu$. $\mu\acute{\alpha}\iota\upsilon$ is prond. $\mu\epsilon\upsilon$ in M., $\mu\omicron\upsilon$ and $\mu\acute{\alpha}\beta\alpha$ in C., and $\mu\omicron$ (\omicron with short sound of \omicron in $\iota\omicron\eta$) in U. In U., $\eta\acute{\iota} \mu\acute{\alpha}\beta$ and $\acute{\epsilon}\alpha \mu\acute{\alpha}\beta$ ($-\eta\acute{\iota} \mu\acute{\alpha}\iota\upsilon$) are in use.

Lesson 37. { (V.) PRESENT-HABITUAL TENSE
(VI.) PAST-HABITUAL TENSE.

73. Note (1) that with a verbal noun, $\tau\acute{\alpha}$ is used to describe an action actually in progress ($\tau\acute{\alpha}\iota\mu \acute{\alpha}\varsigma \lambda\acute{\epsilon}\gamma\epsilon\alpha\mu$); (2) $\beta\acute{\iota}\mu$, to describe habitual or repeated action, or state, in the present ($\beta\acute{\iota}\mu \acute{\alpha}\varsigma \lambda\acute{\epsilon}\gamma\epsilon\alpha\mu \zeta\acute{\alpha}\acute{\epsilon} \lambda\acute{\alpha}$, $\eta\mu\acute{\iota}\varsigma \beta\acute{\iota}\mu \acute{\alpha}\rho \rho\omicron\iota\iota$); and (3) $\omicron\omicron \beta\acute{\iota}\mu\eta$, to describe habitual or repeated action, or state, in the past ($\omicron\omicron \beta\acute{\iota}\mu\eta \acute{\alpha}\varsigma \eta\mu\acute{\iota}\tau\epsilon \zeta\acute{\alpha}\acute{\epsilon} \lambda\acute{\alpha}$, $\eta\mu\acute{\iota}\varsigma \beta\acute{\iota}\omicron\tau \eta\mu\acute{\iota}\lambda\epsilon\alpha\theta$).

This is the only verb which has separate forms to express the actual present, $\tau\acute{\alpha}$, and the present-habitual, $\beta\acute{\iota}\mu\eta$.

LESSON 38. (VII.) FUTURE TENSE.

74. The 3rd sg. Future Tense of $\tau\acute{\alpha}$ is $\theta\acute{\epsilon}\iota\theta$. Unlike $\tau\acute{\alpha}$ and $\theta\omicron$ $\theta\acute{\iota}$, it has no special form after the particles ($\alpha\eta$? $\eta\acute{\iota}$, etc.)

$\alpha\eta$ $\mu\acute{\beta}\acute{\epsilon}\iota\theta$...? $\left\{ \begin{array}{l} \theta\acute{\epsilon}\iota\theta. \\ \eta\acute{\iota} \theta\acute{\epsilon}\iota\theta. \end{array} \right.$

75. Note, as in Lesson 15, that the Simple Future form follows a verb in the present tense, as $\theta\epsilon\iota\mu\eta\mu$ ($\xi\omicron$ $\mu\acute{\beta}\acute{\epsilon}\alpha\theta$...); and the Secondary Future, a verb in the past tense, as $\theta\upsilon\theta\alpha\mu\tau$ ($\xi\omicron$ $\mu\acute{\beta}\acute{\epsilon}\mu\eta\eta$...).

76. Pron. In Munster, the $\acute{\epsilon}$ in all these forms is pronounced short, thus:— $\beta\acute{\epsilon}\alpha\theta$, etc., and $\xi\omicron$ $\mu\acute{\beta}\acute{\epsilon}\mu\eta\eta$ etc., and is sometimes so written; and $\theta\acute{\epsilon}\iota\theta$ is pronounced $\beta\acute{\epsilon}\xi$ (slender ξ) but with θ silent before pronouns, as $\theta\acute{\epsilon}\rho\theta$ $\rho\acute{\acute{\epsilon}}$, *prond. be $\rho\acute{\acute{\epsilon}}$* .

A medial θ - (as $\theta\acute{\epsilon}\iota\theta\acute{\epsilon}\alpha\theta$, etc.; $\theta\acute{\iota}\theta\eta\mu$, etc.) should not appear in the synthetic forms of any tense or mood of this verb.

Lesson 39.—(VIII.) CONDITIONAL MOOD.

77. This is the mood of the verb in the consequence or main clause of a sentence in which a condition is expressed (which is usually impossible or unlikely to be fulfilled). The condl. or subordinate clause is preceded by $\theta\acute{\alpha}$ or $\mu\eta\alpha$. *Vide* § 43.

[The form in the $\theta\acute{\alpha}$ clause of a sentence is Subjunctive Past (Less. 93). Th. Subj. Past and Cond. of this verb have the same form, viz., $\beta\acute{\epsilon}\alpha\theta$. *Vide* § 214.]

78. Note that the Cond. Mood has the same form, including the pronominal endings, as that of the Secondary Future Tense but that the function is different.

79. Pron. *Vide* § 14 as to pron. of 3 sg. ending,—(e) $\alpha\theta$. In M., the 2 sg. cond. is usually *prond. $\theta\epsilon\rho\acute{\alpha}$* .

REVISION QUESTIONS. (G)

—(o)—

Revise Lessons 34 to 39.

1. State briefly, the distinction between the use of $\eta\acute{\iota}$ and $\tau\acute{\alpha}$.
2. Give examples of $\tau\acute{\alpha}$ used to express (a) position, (b) condition.
3. When is the Dependent Form used.
4. Give examples of the Dependent Forms, present and past, of this verb.
5. What particles, etc., are used with this verb?
6. Give the forms of the 1 sg. in the various tenses and moods of this verb.

Lesson 40.—INDIRECT NARRATION (or, REPORTED SPEECH).

ῥᾶσφαις: "α ῥ., τὰμ δὲ εἶπτεαὶ λέει. Ὀυαίρεαὶ εὐ. Συο"
 Οειρ ρ. le S. ῥο^a ὄφρui^b ré δὲ ε. leir.^d ῥο mbuaiρῶ ré^d é. Συοε.^e
 Ουδαιρ ρ. le S. ῥο ηαιῶ^e ré δὲ ε. leir. ῥο mbuaiρεαῶ^e ré é. Συοε.

80. The dependent clauses of reported speech (§ 6) usually follow verbs or clauses of *saying, thinking, and soon*, as Ουδαιρ ρέ . . . , μεαραιμ . . . , ἱρ é mo τυαιρμ . . . , βαὸ ὀόιῤ leir . . . , etc. Note that:—

(a) Such dependent clauses are introduced by the *conjunctions*, ῥο. ηᾶ, or ηᾶῤ; or, ῥυη, ηᾶη, as required.

(b) When the verb has a *dependent form* (§ 64), such form is used after these conjunctions.

(c) The *imperative mood* in direct speech becomes the *verbal noun* in indirect (or, reported) speech. Vide § 20.

(d) Change of *person, etc.*, may be necessary when direct speech is transposed to indirect speech (or narration).

SEQUENCE OF TENSES.

(e) When the verb in the main clause is in the *past tense*, the following changes occur:

Direct Speech.

Indirect Speech.

1. Present tense, as "τᾶ . . ." changes to Past tense, as, (. . . ῥο) ηαιῶ . . .
2. Future tense, as "buaίρῶ . . ." " Secondary Future (§ 30) as, (. . . ῥο m) buaίρεαῶ . . .
- [3. Præs. Subj., as "(. . . ῥο ο) τείρεαο . ." " Secondary Pres. Subj. (§ 210) as (. . . ῥο ο) τείριη . . .]

Lesson 41.—QUESTION AND ANSWER.

81. As to the form of sentence to be used in answering questions, note that:—

(a) The particle **Ἄη** (neg. ηᾶῤ) begins every question, except those with the Interrogatives, Cά, CιΔ, Cιοννυρ, Cαῤαιμ, Cαο, etc. In the past tense, and cond. of 1S, the interrogative particle is **Ἄη** (from ἄη and ηο): negative, ηᾶη.

(b) The word which follows **Ἄη** (or ηᾶῤ, Ἄη, or ηᾶη), in the question is (1) the first word of the answer; or, as the sense requires, (2) follows Οο, or ηἷ, or 1S in the answer.

(c) The verb used in the question is repeated in the reply.

OTHER IRREGULAR VERBS.

Lesson 42.—(I.) PAST TENSE.

82. The irregular Verbs of the Past Tense (3 sg.) are:—

(a) Ruῤ, εῤῤ, φυαιρ, ῥάιηῤ;

(b) Οο-εuaiρῶ, Οο-ῥονηαιρ, Οο-εuaiρῶ, Οο-ηηηηη, Ἄουδαιρ.

Pron. The prefixes, Οο-, Ἄ (printed in heavy-faced type in b) have long been an integral part of these verbs. When commencing sentences, these prefixes are frequently omitted colloquially, but in relative clauses they are pronounced Ἄ, as Ἄη ρεαρ Ἄ ῥονηαιρ é. The forms of the irregular verbs are explained at length at pp. 182-193.

83. Note that the synthetic forms of these verbs have the usual terminations for person, viz., -αρ, -ιρ, —; -μαρ, -θαρ, -ουαρ. (*i.e.*, ρυσαρ, ρυσαρ, etc., as in § 8). In Munster the following older forms of 1 sg., viz., τάνας, οο-όννας, ουουαρτ and οο-ουατα are more frequently used than the terminations in -αρ.

84. Particles. Historically, the particles, etc., which, when necessary, accompany the irregular verbs given in this lesson, *i.e.*, in the past tense, are:— αν, νί, σο, etc., not αρ, νίορ, ζυρ, etc. Colloquially, these latter particles (*i.e.*, combinations with ρο) are, however, frequently found with many of these verbs. *E.g.*, (a) αρ, νίορ, ζυρ, etc. are, in C. and U., used with ουουαρτ (as αρ ουουαρτ ...?), and in M., before -ουατο (as, αρ ουατο ...?); (b) often, in most districts, before ρυς, τυς, τάνις, ουατατο; but nowhere before ρυαρ, ραα.

In the Pres.-Hab., Past-Hab., Fut., and Concl., the particles used are αν, νί, σο, etc.

85. [The particles combined with ρο are used

- (a) in the past indicative, including the autonomous form (§ 216), of regular verbs (νίορ ουατ. νίορ ουατατο.);
- (b) in the present subjunctive neg. of all verbs (νάρ τυσαρ) *Vide* § 208;
- (c) With the copula: frequently, viz., with σο in the pres., as ζυρ(αβ); in interrog., neg., and dependent clauses or sentences in past and cond. *vide* § 61; and in the pres. subj.]

Lesson 43.—(II.) PAST TENSE—continued.

86. Οο-ουατο, οο-όννας, and οο-ρυννε have Dependent Forms, (*viz.*, ουαατο, ραα, and ουαρρνα respectively), after the particles νί, αν, etc. *Vide* Dependent Forms, § 64.

87. Pron. In the following lists of colloquial variants, 3 sg., νί (or νίορ) is used as an instance of the particles, etc., which are followed by the Dependent Form of the verb.

M.	C.	U.
νί ουουαρτ	νίορ (ο)ουουαρτ	νίορ (ο)ουουαρτ
οέιν (οειν), ρυνν(ε)	ρυννε	ρυνν(ε)
νίορ οέιν, νί "	νί ουαρρνα(το)	{ ουα ουαρρ νί ουαρρ
όννας	τάνας, όννας	τάνας
νί ραα(το)	νί ραα(το)	{ ουαν ραα(το) νί ραα(το)
ουατο	ουατο (ρυατο)	ουατο (ρυατο)
νίορ ουατο	νί ουαατο	{ ουα ουαατο νί ουαατο
νί(ορ) ουαατο		
τάνις	τάνις	τάνις

Lesson 44.—(III.) PRESENT-HABITUAL TENSE.

88. Many of the irregular verbs are inflected regularly for this tense. The synthetic forms end in **-ιμ, -ιη, —; -ιμίς, —, and -ις**, as in the regular verbs; *Vide* § 35.

99. Pron.

M.	C.	U.
τυζανν, βειρεανν	βειρεανν	βειρ(εανν)
ζειβεανν, παζανν νί παζανν	ζειβεανν νί παζανν	ζειβ(εανν) νί παζανν
ὄεινεανν νί ὄεινεανν	ζηνί(ονν), ὄιονανν νί ὄεανανν, νί ὄιονανν	{ ζηνί(ονν) νί ὄεανανν νί ἄεανανν
κλοιρεανν	κλουινεανν	κλουινεανν
έιονν	ρεϊκεανν, έιονν	'τέϊ
ταζανν, τιζεανν	τιζεανν, τις	τις(εανν)

(There are similar variants in the Past-Hab. forms, with ending **-ὄ**.)

Lesson 45. (IV.)—PAST-HABITUAL TENSE.

90. The endings in the Past-Hab. are as for the regular verbs: *Vide* § 40 viz., analytic forms in **-ὄ**, and synthetic forms **-(α)ιηνν, ἔ(ε)ἄ, —; -(α)ιμίρ, —, -(α)ιδίρ**.

91. Pron. The colloquial variants are as in the preceding lesson, with ending **-ὄ** instead of **-νν**, viz., **τυζαὸ**, etc.

[This is also the form of the verb in the Subj. Past (Less. 93) as, "Ὅα ὄταζαὸ ἀν ἑμῶν καὶ ἀναλλ ταρ ἐλαὸ... ὄο βεαὸ..."]

Lesson 46.—(V.) FUTURE TENSE.

92. The synthetic forms have the usual terminations of this tense, viz.: **-(ε)αὸ, -(α)ιη, —, -(α)ιμίς, —, -(α)ις**. Verbs with **-ρ-** or **-όϕ-** in 3 sg., have, respectively, **-ρ-** or **-όϕ-** before these endings. After verbs of the past tense, there is a **Secondary Future** form, as in § 30.

93. Pron.

M.	C.	U.
ταδαρφαὸ, βεαρφαὸ	βεαρφαὸ	βεαρφαὸ, βειρριὸ
νί ταδαρφαὸ	νί τιυβρφαὸ	νί ταδαρριὸ
νί φαϊζιὸ*	νί φαϊζιὸ*	νί φαϊζιὸ*
κλοιρριὸ	κλουιρριὸ	κλουιρριὸ
έϊρριὸ	ρεϊρριὸ	'τέϊρριὸ

(There are similar variants in the Concl. forms, with ending **-αὸ**.)

Lesson 47.—(VI.) **CONDITIONAL MOOD.**

94. The synthetic forms have the usual terminations of this mood, viz.: -(α)ἴη, -(ε)ἄ, —; -(α)ἴμην, —, -(α)ἴδι, Vide § 45. Verbs with -ρ- or -όε-, in 3 sg. have, respectively, -ρ-, or -όε- before these endings. Note the following 2 sg. forms ὄο-ξεύετα, ní ρειξεύετα, ραξεύετα (ραόετα), and ní τιυβύετα

95. **Pron.** In M., the ending of the 2 sg. Condl. of *all verbs*, i.e. and irreg., is prond. -ρἄ. Other colloquial variants are as given in preceding lesson, but with condl. instead of future endings (-αὐ, 3 sg. condl.; -ιὐ, 3 sg. fut.)

Lessons 48, 49.—(VII.) **SUMMARY.**

96. In these lessons is given a summary of the forms of the preceding six lessons on these irregular verbs, 1 sg.

Note that the verbs (ὄο-)βεινῶ, (ὄο-)ξεύω, (ὄο-)έω, (α)βεινῶ have **Dependent Forms** in the Pres.-Hab., Past.-Hab., Fut., and Condl. In the Pres.-Hab. and Fut., the prefixes (*i.e.* ὄο- or α in brackets) are not pronounced, and need not be written, except when the verb occurs in a relative clause, as ...αὐ ἦτο ὄο-ξεύω ἡμῶ. In such clauses, ὄο is pronounced α.

Lesson 50.—(VIII.) **VERBAL NOUN AND IMPERATIVE MOOD.**

97. Compare with Lessons 9 and 10 on the verbal noun. The Imperative is formed regularly, as in Less. 7, except τάρ and τάραι. The 1 sg., 3 sg., and 1 plu., 2 plu., 3 plu. of τάρ are formed from τάρ- (*e.g.*, τάραιμην). The corresponding forms of τάραι are from τάρ (*e.g.*, τάραιμην).

REVISION QUESTIONS. (H)

----- (o) -----

Revise Lessons 42 to 50.

1. Give, with examples, the irregular verbs which have **Dependent Forms** in the Past Tense.
2. (a) Name four verbs which have **Dependent Forms** in the other tenses.
(b) Give the stems from which are derived the **Absolute and Dependent Forms** in respect of each of these four verbs.
3. What is the general rule as to the pronominal endings of the irregular verbs in all tenses and moods?

*Often written βρ- in accordance with the v (M.) or w (C., U.) pron. of the initial syll. Cf., ἡμῶ, and ní ἡμῶ: prond. ἡμῶ, ní ἡμῶ.

IRREGULAR VERBS (Continued).

98. In the various tenses and moods, the *pronominal* (or *personal*) endings are the same in the irregular as in the regular verbs. *E.g.*,

βυαί-ιμ, βειπ-ιμ; βυαί-εαρ, πυσ-αρ.

99. Verbal Stems. Some of the verbal stems in the tense and mood inflexion of the irregular verbs are of different formation from the corresponding verbal stems in the great bulk of verbs in the language. (*E.g.*, πασ-, *irreg.*; ούπ-, *reg.*) In this sense only can the former class of verbs be called irregular. [A = Absolute Form; D = Dep. Form.]

Verb	Verbal Stem in			
	Imper.	Past	Present- and Past-Hab. (asp.)	Future, and Condl. (asp.)
1. βειρίμ	βειπ-	πυσ-	βειπ-	βέαρπ-
2. βειρίμ	τυς- (ταβαίπ 2 s.)	έτυς-	A. { βειπ- τυς- (M.) D. τυς-	{ βέαρπ- ταβαίπ- (M.) τιυβπ- ταβαίπ- (M.)
3. βειρίμ	αβπ- (αβαίπ 2 s.)	ουβπ- (ουβαίπ 3 s.)	A. { βειπ- D. { αβπ-	{ βέαρπ- αβπός-
4. ζαβαίμ	ζαβ-	ζαβ-	ζαβ-	ζεός-
5. ζειβίμ	πασ-	πυαίπ-	A. ζειβ- D. πασ-	ζεός- πυίς-
6. ζήίμ	οέιν-	A. { πίνν- οέιν- (M.) D. { οεαίπ- οέιν- (M.)	{ ζήνι- οέιν-	οεαίπ-
7. κλοισίμ	κλοιπ-	έκυαλ-	κλοιπ- (κλουίν-)	κλοιπ- (κλουίπ-)
8. όίμ	πειο-	A. όονναο- (όονηαίο, 3s) D. παιο-	εί- πειο-	είπ- πειοπ-
9. τέιζίμ	τέις-	A. έυ- D. οεαός-, έυ-	τέις-	πασ- (πας-)
10. τιζίμ	τας- (ταίπ, 2 s.)	έάν(ας)- (τάιμης 3 s.)	τας- (τις-)	τιοοπ-
11. ατάίμ	βί-	A. βί- D. παβ- (παίβ 3 s.)	βί- <i>Pres.</i> : A. τά-; D. πυίλ-	βέ- (be-)

12. COPULA. (*vide* § 61) *Pres.*, ις; *Past*, βα; *Condl.*, βλός. [ίοραίμν, etc.]
13. ιτίμ. This verb is irregular only in *fut.* and *condl.*, as ίοραο, etc.;

100.

DEFECTIVE VERBS.

1. πέσθαίμ ('I can') has no *imper.* 2. έάρτα ('happened'), and 3. ράιμης (past tense of πύίμ, *obs.*, = 'I reach'). are now frequently used, impersonally, in all tenses and moods, except *imper.*; as έάρτόεαο, μά ράιμ-ίγεαμν, etc. 4. πεσθαίρ (*I s.*, 'I know,' 'I knew') has the inflexions of the *past tense*, and is used only negatively and interrogatively. 5. αρ [αρσα, ορς] ('says,' 'said') is used only when the exact words of the speaker are quoted.

SECOND PART.

THE NOUN.

101. A Noun is a name (Lat., *nomen*; Ir. *ainm*).

It may be the name of:

- (1) a person or place, *i.e.*, a Proper Noun (Ταὐός, ἒιρη).
- (2) (a) a class, *common* to a number of persons or things, *i.e.*, a Common Noun (περ, τῖν)
(b) an action, or state, *i.e.*, a Verbal Noun (βυαλαὸ, ριυδα, βειτ)
(c) a quality or feeling (considered as taken *apart* from the object which possesses it: Lat., *abs* from, *tractus* drawn) *i.e.*, an Abstract Noun (ῖτε, περς)
(d) a number of objects considered as a unit, *i.e.*, a Collective Noun (ορεαμ, τυτ).

Lesson 51.—GENDER.

102. In Modern Irish, all nouns, even the names of things without life, are either masculine or feminine. We may infer the following general rules as to the gender of Irish nouns:—

MASCULINE.

1. Nouns denoting the male sex are of the masculine gender.

This will include such nouns as ὀότῖν, showing names of occupations followed by men.

FEMININE.

1. Nouns denoting female sex are feminine.

This will include such nouns as βανατῖα, showing names of occupations followed by women.

As regards other nouns:—

- | | |
|---|--|
| <ol style="list-style-type: none">2. Nearly all nouns ending in a broad consonant are masculine.3. Diminutives ending in -ῖν are of the same gender as the noun from which they are derived. | <ol style="list-style-type: none">2. But nouns ending in -ός are feminine.3. Except masculine nouns in -ῖν, nearly all nouns ending in a slender consonant are feminine.4. Names of most countries, and of rivers, are feminine. |
|---|--|

[It may also be noted that abstract nouns in -άτ (derived from other nouns, or from adjs.), and abstract nouns formed from the gen. sing. fem. of adjs., are feminine.]

DECLENSIONS.

—(o)—

Lesson 52.—GENITIVE CASE, SINGULAR. FIRST DECLENSION.

(1r) $\xi\alpha\pi\pi\acute{\upsilon}\nu$ é $\rho\acute{\iota}\nu$.
Sin é ceann an $\xi\alpha\pi\pi\acute{\upsilon}\nu$.

103. Case is the relation which a noun or pronoun bears to other words in the sentence : its relation, *e.g.*, to verbs or to other nouns.

In the above (and similarly in other instances) the position of the noun, *ceann*—being before the noun $\xi\alpha\pi\pi\acute{\upsilon}\nu$ —and its relation thereto, caused the latter noun to be in the **Genitive Case**. The noun $\xi\alpha\pi\pi\acute{\upsilon}\nu$ (nominative case in the first sentence, and genitive, $\xi\alpha\pi\pi\acute{\upsilon}\nu$, in the second) changed its appearance slightly to show its change of case. English nouns, also, sometimes change their endings to denote the possessive case ('genitive case' is the more correct term). Compare, *e.g.*,.....the boy's head. In Irish any noun may be in the genitive case; and the noun in the genitive ($\xi\alpha\pi\pi\acute{\upsilon}\nu$) is said to be governed by the preceding noun (*ceann*).

104. Notice that **í** has been inserted before the final consonant (showing that this con. has been attenuated, or made slender) to form the genitive case of the nouns in this lesson. All Irish nouns, do not, however, form the genitive by attenuation, and it is convenient, in studying Irish, to classify nouns according to the manner in which they form the genitive singular. These classes (there are usually five recognized) are called **Declensions**. The particular class of nouns with which we are concerned in this lesson are of the **First Declension**.

By "Declension" is meant a summary of all the inflexions of a noun, *i.e.*, of the changes in form which a noun undergoes in respect of number and case.

105. First Declension nouns ($\xi\alpha\pi\pi\acute{\upsilon}\nu$, etc.) are (a) all *masculine*; and (b) in the nom. case sing., they end in a *broad consonant*. In the genitive case, note the change in form, *viz.*, (c) **í** before the final consonant, and, where the initial letter of the noun (in the genitive case) is an aspirable consonant, it is aspirated after the article, **An** (...ceann an $\acute{\xi}\alpha\pi\pi\acute{\upsilon}\nu$). Note, also, that **τ**- is not prefixed to the genitive case of a **masculine** noun whose initial letter is a vowel (...láir an upláir), but is prefixed to the genitive of a **masculine** noun whose initial letter is **ρ** (... ρ iom an τ - ρ uirócin). The initial aspirable con. of a proper noun in the gen case is aspirated, as ...leabhar $\acute{\xi}$ ea $\acute{\xi}$ áin. You will observe that in such genitive phrases as the above, *the article is used only once, usually before the last noun.*

106. Vowel Changes. The change in form for the gen. sometimes involves a change in the vowel or vowels preceding the final consonant.

In the 1st decl., the following changes may occur:—

<i>Nom. Sing.</i>	<i>Gen. Sing.</i>
-εΔ- (as <i>ceann</i>)	-ι- (as <i>cinn</i>)
-έΔ-, or -eu- (as <i>béat</i>)	-έι- (as <i>béil</i>)
-ιΔ- (as <i>ιαρ</i>) generally	-έι- (as <i>έιρ</i>)
-ο- (as <i>cnoc</i>)	-ου- (as <i>cnuc</i>)
-ίο- (as <i>ρίοι</i>)	-ί- (as <i>ρί</i>)

In words of more than one syll.	}	-Δς. (as <i>βΔςΔς</i>)	-	-Δις. (as <i>βΔςΔις</i>)
		-εΔς. (as <i>κοιτεΔς</i>)		-ις. (as <i>κοιτις</i>)

Lesson 53.—GENITIVE CASE, SINGULAR. SECOND DECLENSION.

...ὄΔ *ceann* ηΔ *caitce* ριν.

107. The nouns dealt with in this lesson (*caitce*, etc.) form the genitive case in a different manner from that of the nouns in the last less. Consequently, the nouns *caitce*, etc., belong to another declension. Notice (a) that they are *feminine nouns ending in a consonant*; (b) that they form the genitive by adding *e*; (c) that the form of the article before the genitive is *ηΔ*, which form does not aspirate the initial consonant of the noun, but prefixes *η-* to the gen. sing. of fem. nouns whose initial letter is a vowel (...*βαρη ηΔ η-ορθόγυε*).

[In *ορθόγυε*, etc., the *ι* shows that the consonant *γ* has a slender sound, resulting from the addition of *e*.]

108. Vowel Changes. These may occur as in the 1st decl., viz., *έΔ* to *έι*, etc.; but nominatives of more than one syll. in *-εΔς* give gens. in *-ις* (*caiteΔς*, *caitις*), and those in *-Δς* give gens. in *-ις*.

Lesson 54.—GENITIVE CASE, SINGULAR. THIRD DECLENSION.

...μας *ρειρμεδρη* μιρε.

109. Note that the majority of the nouns in this lesson (*ρειρμεδρη*, etc.) are (a) *personal nouns ending in a slender consonant, and masculine*; and (b) that they form the genitive by adding *Δ*.

[As the addition of *Δ* makes the consonant broad, the vowel *ι*, a sign that the consonant is slender in *βυαδαίι*, etc., must be omitted in the genitive, as *βυαδαίΔ*, *ζαβάΔ*, etc.]

The 3rd decl. includes the following nouns:—

- (1) Personal nouns in *-δρη*, *-ύρη*, *-έρη* (masc.)
- (2) Nouns in *-έτ* (Derived nouns in *-Δέτ*, fem.)
- (3) Most monosyllabic nouns in *-έ*, *-έ*, *-ς*.

(4) Verbal nouns in *-άι*, *Δέτ*, *Δαίαν(τ)*. Excepting these latter, the gen. sing. of verbal nouns has, generally, the same form as that of the verbal adj. (Less. 11)

110. In all declensions, the form of the art. in the gen. sing. is *an* (asp.) before masc. nouns, and *na* before feminine nouns.

111. Vowel Changes. These are the reverse of those in the 1st and 2nd decls. [In the latter decls. the attenuation of the final con. makes the preceding vowel sound slender, and hence -*ea-* to -*i-*, etc.; in the 3rd decl. the broadening of the final con. makes the preceding vowel broad, and hence -*i-* to -*ea-*, etc.]

Nom. Sing.	Gen. Sing.
-i-, or -io- (as <i>mic</i> , <i>ciot</i>)	-ea- (as <i>peata</i> , <i>ceata</i>)
-ei- (as <i>ceimn</i>)	-ea- (as <i>ceanna</i>)
-u-, or -ui- (as <i>uic</i> , <i>puil</i>)	-o- (as <i>oeta</i> , <i>poia</i>)

Lesson 55.—GENITIVE CASE, SINGULAR. FOURTH DECLENSION.

...bean an fáobaire.

112. Observe (*a*) that 4th decl. nouns are nearly all masculine; (*b*) that they end in a vowel or *in*; and (*c*) that there is no change in the end of the word to denote the genitive case. There is the usual aspiration after *an* [...*baire an fáobaire*].

Some feminine nouns belong to this declension. [These latter are chiefly nouns derived from the gen. sing. fem. of adjectives, as *gáile*, *áinne*.]

[When -*in*-*beas* in a diminutive, the diminutive form is rarely used in the gen. sing. Thus, *ceimín* (nom.), but *Sin í cor na ceimne bise*.]

Lesson 56.—GENITIVE CASE, SINGULAR. FIFTH DECLENSION.

...clann mo comuirsiáin.

113. Note (*a*) that the majority of 5th decl. nouns are feminine; (*b*) that they usually end in a vowel, or in -*in* or -*il*; and (*c*) that they form the genitive by adding -*n*, -*inn*, -*o*, or -*c* (all broad) to the nominative.

Lesson 57.—GENITIVE GOVERNED BY VERBAL NOUN.

Táim ag rithiú an páiréir seo.

114. The words *rithiú*, etc., in such sentences as the above are nouns in Irish, and, consequently, they govern a following noun in the genitive case.

Compare {*Lár na fuinneóige*.
.....*túnao na fuinneóige*.

115. The genitive form of the noun follows *éin* (-*oo-éin*), *ceiméall*, *comr*, *ceanna*, *dála*, *fan* (-“along”). Prepositional phrases such as *ar tí*, *ar éir*, *ar ion*, *i n-áice*, *i n-áirí*, are followed by the genitive, because the words *éir*, *áirí*, etc., in such phrases as [these, are nouns.

ΣΤΗΛΕ ΑΝ ΠΑΙΡΕΔΗ ΤΟ.

116. The **Accusative** is the case of a noun or pronoun governed by a transitive verb. In the above sentence, *παίρεδαι* is acc. case governed by the transitive verb *στηλε*. In Modern Irish the accusative and nominative cases of a noun have the same form.

The preps. *τοῖν* (in the sing., when it does not mean 'including'), *σαν*, *ρεᾶς*(*αι*), and *μαρ* (when it means 'like') govern a following noun or pronoun in the accusative case.

117. [Verbal Nouns. It is important that the student regard these as nouns in every sense, in Irish. Many of them are inflected for number and case. Note the different cases of the verbal nouns in the following:—

I. <i>Ὁδὸ ματὶς ἕνιομ ριυβαλ</i> (1)	...	(1) subject <i>nom.</i> to <i>Ὁδὸ</i> .
<i>ἵρ ἐ τεᾶετ</i> (2) <i>ἀν τ-ρεᾶσαι</i> ἐ	...	(2) predicate " " <i>ἵρ</i> .
<i>Ῥάιμις λειρ βεῖτ</i> (3) <i>ἀνν</i>	...	(3) <i>nom.</i> to <i>Ῥάιμις</i> .
<i>ἵρ ματὶς λειρ βεῖτ</i> (4) <i>ᾶς</i> <i>εἰνντ</i>	...	(4) subj. <i>nom.</i> to <i>ἵρ</i> .
II. <i>Ῥυς ρέ ἀνα βυαῶδ</i> (5) <i>ὀδ</i>	...	(5) <i>acc.</i> gov'd. by <i>Ῥυς</i> .
<i>Ῥά ρέ σαν βεῖτ</i> (6) <i>αι</i> <i>ροῖνναι</i>	...	(6) " " prepn. <i>σαν</i> .
<i>Ῥά ρέ τοῖν βεῖτ</i> (7) <i>εἰτοῖτᾶ</i>	...	(7) " " " <i>τοῖν</i> .
III. <i>Ῥάιμις ἀν λυετ ἑανᾶννα</i> (8) <i>ρῖαιρ</i>	...	(8) <i>gen.</i> gov'd. by <i>λυετ</i> .
<i>Ῥῖν βεῖτ</i> (9) <i>ᾶς</i> <i>μαῖᾶδ</i> <i>ρῖμ-ρα</i>	...	(9) " " <i>Ῥῖν</i> .
<i>Ῥάιμις ρέ</i>	(9) " " <i>Ῥῖν</i> .
" <i>ᾶς</i> <i>τυλλεᾶν ρῖᾶ</i> <i>ἱ</i> <i>ἡ-ἰοῖᾶδ</i>	...	(10) " " <i>ἰοῖᾶδ</i> .
<i>βεῖτ</i> (10) <i>ρῖμῖᾶ</i> <i>ῖοῖᾶοῖν</i> "	...	(10) " " <i>ἰοῖᾶδ</i> .
IV. <i>Ὀυδαιρτ ρέ ἕνιομ ροῖαλ ῖο</i>	...	(11) <i>dat.</i> gov'd. by <i>ῖο</i> .
<i>ρῖοῖᾶδ</i> (11)	...	(11) <i>dat.</i> gov'd. by <i>ῖο</i> .
<i>Ῥά ροῖαλ ᾶῖᾶν</i> <i>λε</i> <i>ῖᾶδ</i> (12) <i>λεᾶτ</i>	...	(12) " " <i>λε</i> .
<i>Ῥά Ῥᾶδῖς ᾶς</i> <i>ρῖυβαλ</i> (13)	...	(13) " " <i>ᾶς</i> .
<i>Ῥά ρέ</i> <i>λε</i> <i>βεῖτ</i> (14) <i>ἀνν</i>	...	(14) " " <i>λε</i> .
<i>Ὁδὸ ματὶς λειρ ᾶρῖᾶᾶδ ῖο</i> <i>βεῖτ</i> (15)	...	(15) " " <i>ῖο</i> .
<i>ᾶρῖᾶ</i>	(15) " " <i>ῖο</i> .

It is the function of the different *prepositions* (*ῖο*, *λε*, *ᾶς*, *αι*, *ρῖ*, etc.) to point out the varying relations which a verbal (or other) noun, gov'd. by a prepn., bears to the preceding noun or pronoun.

Note from above examples that the prepn. *ῖο* (or its colloquial form,

a) must not be used before *βεῖτ* when the latter is

(a) *nom.* case (3), (4) ;

(b) *acc.* gov'd. by a prepn. (6), (7), or by a verb ;

(c) *gen.* gov'd. by a prepn. (9), or by a noun (10), or

(d) *dat.* gov'd. by any prepn. other than *ῖο* (14).]

Lesson 58.—GENITIVE CASE, SINGULAR. SUMMARY.

118. This lesson gives, for revision purposes, a summary of the *gen.* case, *sing.*, five declensions. (There are a few nouns whose genitives are irregular. Note instances as they occur in Reader).

REVISION QUESTIONS. (I)

—(o)—

Revise Lessons 51 to 58.

1. Give examples of the classes into which nouns may be divided.
2. State the few chief rules for determining the gender of Irish nouns.
3. What is meant by the Case of a noun ?
4. Give examples of nouns in the Genitive Case.
5. How is the gen. case sing. formed from the nom. sing. in the 1st, 2nd, 3rd, 4th, 5th decls.?
6. Give examples of the changes which nouns may undergo initially in the gen. sing.
7. State a general rule which would help one to determine the decl. of a noun in the nom. sing.
8. Give examples of nouns in the Accusative Case.
9. What is the case of a noun gov'd. by a verbal noun ? Give examples.

Lesson 59.—PLURAL NUMBER, NOMINATIVE CASE.

...nΔ cārúir.

119. Number indicates whether we are speaking of one object or more. When a noun indicates one object it is in the singular number ; when it indicates more than one, (except nouns preceded by *dhá*, 'two,' as in Less. 61) it is in the plural number.

120. Note the three chief ways in which Irish nouns form their plurals :—

(a) In the first declension, by *attenuating* the final consonant (cārúir, cārúir), which latter is the same form as in the genitive singular.

(b) In other declensions (except the fifth), by adding **Δ** to nouns ending in a broad consonant (lámh, lámhΔ; uéir, oéirΔ), and **í** to nouns ending in a slender consonant or in a vowel (buadachí, crúirí; cārúirí), (exception: rúir, rúirí, etc., in second declension).

The plural ending *-í* is sometimes written *-íde*. (e.g., cailíní or cailíníde). Nouns ending in *-íde* in nom. sing. form the plu. in *-íde* (céiliríde, céiliríde).

(c) In the fifth declension, compare the forms of the gen. sing. and nom. plu., as :—

Gen. Sing.

Nom. Plu.

Most nouns in *-c* (as cātachíreac) end in *-cΔ* (as cātachíreacΔ).

“ “ *-nn* (as uilleann) “ *-nna* (as uilleanna).

“ “ *-n* { (as comúirí) } or “ *-in* (as comúiríin).
 “ “ { (as ionúirí) } “ *-ne* (as ionúiríne).

“ “ *-o* (as cārúirí) “ *-íde* (as cārúiríde).

(There are some irregular plurals. Note instances as they occur).

Lesson 60.—PLURAL NUMBER, GENITIVE CASE.

...λεάδαρη να ηζαγγούν.

121. We may infer the following general rules for the genitive plural:—

- (a) If the nom. sing. ends in a broad con. (ζαγγούν, ορθός), the gen. plu. has the same form as the nom. sing.
 (b) If the nom. sing. ends in a slender con. (βυαδάιλλ), or in a vowel (κάριτσ), the gen. plu. has the same form as the nom. plu., but,
 (c) In the 5th decl., the gen. plu. has the same form as the gen. sing.

122. The form of the article is **η**, (a) after which the initial consonant of the following noun is eclipsed, if it is an eclipsable consonant (...εαινητ να μβυαδάιλλι), and (b) **n**- appears before an initial vowel (...ηνηνε να n-ορθός).

Lesson 61.—DUAL NUMBER.

...ὄά βυinneόις.

123. Irish nouns have three numbers:—the singular (κάριτσ, βυinneός); the plural (κάριτςαί, βυinneόζα); and the dual when the noun is preceded by ὄά (ὄά κάριτσ, ὄά κάριτσ ὄεας, ὄά βυinneόις). ὄά aspirates an initial aspirable consonant (ὄά κάριτσ).

124. Feminine nouns ending in a broad consonant (κορ, βυinneός) have this consonant attenuated in the dual number (ὄά κορρ, ὄά βυinneόις). Note these examples, 5th decl.:—ὄά ὄεαρηαρη, ὄά υιλλιρη ὄεας. The ending of the noun has the same form in the dual number and in the dative sing. (ὄ'η βυinneόις, ὄά βυinneόις): *vide* next lesson.

Lesson 62.—DATIVE CASE (I.) SINGULAR NUMBER.

...ὄ'η βυinneόις.

125. In Irish, the case of a noun which follows a *preposition* is (except the few preps., *ḃun*, *ζαν*, etc., in Less. 57) the prepositional, or **Dative Case**.

126. (a) Feminine nouns ending in a broad consonant (ορθός) have this consonant attenuated in the dative case (...ρε'η ορθόις). Otherwise, there is, except in the 5th decl., no change in the ending of the noun in the dative. In the 5th decl., the dative sing. is formed by attenuating the ending -n, -nn, or -o of the gen. sing. (...ας μο ὀμουρηαρη); but 5th decl. nouns with nom. sing. in -tl, -rl, or -rn suffer no change (terminally) in the dat. sing. (...αρη αν ηιαζαί).

Attenuation of a final broad con. may produce *vowel changes* as in § 106. *E.g.*, nom. -ia-, or -éa-, as ζρηαν, ρρηεαν; dat. sing. -éi-, as ζρηéι, ρρηéιμ.

127. Note (b) that nouns whose initial letter is an eclipsable consonant (c, s, t, v, p, b, f) suffer **eclipsis** of this consonant after any of the following prepositions + an, viz. αρη, ας, ὀ, αρη, τειρη, ἔαρη (τςαρη), ρε (ρςαοι, or ρςα), ροιμή, um, τρηé (as, ...αρη αν ηιαζαί). In U, aspn. is the rule in such cases. The preposition *ι*, without the article, eclipses (... ι μβορςα).

Lesson 63.—DATIVE CASE (II.) SINGULAR NUMBER.

...ó ħumneóġs.

128. In this lesson, is shown aspiration of the initial consonant after the prepositions, *tré, ó, ar, de, do, fé, nom, um* and *tar*, without the article (...*tré ħóirre*), and also after *oo'n** (*oo an*) and *oe'n.** *ar* denoting state or condition, as *ar buite, ar reáclán*, does not aspirate.

[In Old Ir., some preps. + article occurring in a sentence (a) conveying an idea of motion towards governed in the acc., with eclipsis; but (b) gov'd. in the dat., with aspn., when denoting rest. This rule would be represented in Modern Irish as follows:—

(a) *Do éuir ré an peann irteácl in ran mborca.*

(b) *Tá an peann irteġ in ran borca.*

This distinction between the accusative of motion (ecl.) and the dative of rest (asp.) has now, practically, disappeared.]

Lesson 64.—DATIVE CASE (III.) PLURAL NUMBER.

...ar na cátaoirteácláib.

129. The ending of a noun in the Dative Plural is **-áib, -ib,** or **-íb.**

When the nom. plu. ends,	in a slender con. or in á,	e,	í,
the dat. plu. ends,	in áib,	ib,	íb.

Notice that (unlike the gen. plu.) the initial con. of a noun in the dat. plu. is not affected after the article (...*teir na cáitínib*). The form of the nom. plu. is sometimes (especially in the 1st decl.) used instead of that of the dat. plu.

Lesson 65.—VOCATIVE CASE. SINGULAR.

á Séamuir!

130. A noun is in the **vocative case** when it represents the person or thing addressed (*á Séamuir*), and is preceded by the particle **á**, which aspirates the initial consonant. Excepting nouns of the first declension, the vocative singular has the same form as the nominative singular. In the first declension, which includes most masculine Christian names ending in a broad consonant, the vocative singular has the same form as the genitive singular. {*...teádar Séamuir.*
á Séamuir!

Masculine Christian names not of the 1st decl. are not inflected (terminally) in the voc. sing. *E.g.,* *áoú,* 3rd decl. (gen. sing., *áoúá*), has voc. **á** *áoú!* Similarly, *á Úonncaó!*

131. VOCATIVE PLURAL.

...á cáirve.

(a) If the nom. plu. ends in a slender con. (as *fir, comuirran*), the voc. plu. " **á** (as *á feara, á comuirrana*)

(b) If the nom. plu. ends in **á, e,** or **í** (as *brósa, cáirve, cáitíní*), the voc. plu. " **á, e,** or **í** (as *á brósa, á cáirve, á cáitíní*)

*In Kerry, *eclipsis* after *oo'n*, or *oe'n*, is the rule.

Lessons 66, 67.—DECLENSION OF THE NOUN. SUMMARY.

132. In this summary are included all the cases of the Irish noun (nominative, accusative, genitive, dative and vocative) in both singular and plural numbers.

(Lesson 68.—FAMILY RELATIONSHIP.

133. Notice that Ó (or Ua),—grandson, male descendant, has gen. sing. Uí; and Mac, — son, male descendant, has (when part of surname) gen. sing. Mhic. Ni is from inġean and Uí (genitive of Ó, or Ua). Níc (or Níic) is from Ní Mhic. Uí, Mhic, Ní, Níc aspirate the following con. Note the h- before a vowel in the masc. as, Uaóis Ó h-(¹)Óġáin. h- after Ní is incorrect; Máire ní Ó., not Máire Ní h-Ó.

Inġean Uí (or Inġean Mhic)—Miss; Dean Uí (or Dean Mhic)—Mrs. Mac Uí Úrúain (or An Úrúainac)—Mr. O'B. An Cárrúac—Mr. MacC.)

REVISION QUESTIONS. (J)

—(o)—

Revise Lessons 59 to 67.

1. What is meant by Number? Give examples.
2. Show, with examples, how the Nom. Plu. is formed in the 5th decl.
3. Give the general rule for forming the Nom. Plu. in (a) the 1st decl. and in (b) the 2nd, 3rd, and 4th decls.
4. When is a noun in the Dual Number?
5. Give examples of nouns (a) in the Dative Sing., and (b) in the Dative Plu.
6. When is the initial con. of a noun (a) aspirated, and when (b) eclipsed in the Dative?
7. What nouns are inflected terminally in the Dual Number and in the Dat. Sing.
8. What nouns form the Dat. Plu. (a) in -aib, (b) in -ib, (c) in -ib?
9. Give, with examples, the three ways of forming the Gen. Plu.
10. When is a noun in the Vocative Case?
11. Show how nouns are inflected in the Voc., sing. and plu.
12. What is the case of a noun gov'd. by (a) a transitive verb, (b) a prepn., (c) another noun? Give examples.

[(1) This h- is a remnant of an old *nom. masc.* (**avias*, gen., *aví*)
The aspn. of *ř* between vowels gave (*ř*-)h.]

THE ARTICLE.

—(o)—

Lessons 69, 70.—DECLENSION OF THE ARTICLE.

134. The definite article (Δn or $n\Delta$) agrees with the noun in gender, number and case. There is no indefinite article.

135. The various ways in which the article may affect the initial letter of a following noun are :—

Aspiration		after the article	{ (Δn) in the genitive case, singular, masculine. (Δn) in the nom. and acc. cases, sing., fem.
Eclipsis	"		{ (Δn) in the dative case, singular, masc. and fem. ($n\Delta$) in the genitive case, plural, masc. and fem.
η —	}	before vowels.	"
η —			"
τ —			"
τ —			"
		before ρ	{ ($n\Delta$) in the genitive case, plural, masc. and fem. ($n\Delta$) in nom., acc., and dat., plu., masc., fem. ($n\Delta$) in the genitive case, sing., fem. (Δn) in the nom. and acc. cases, sing., masc. (Δn) in the gen. sing. masc., nom. acc. sing. fem.

136. [The above changes of the noun are really inflexions of the article, carried forward from the end of the article to the initial of the noun. τ - before masc. nouns beginning with a vowel is, historically, an ending of the article (O. Ir., $\tau n\tau$). τ - before ρ ($\Delta n \tau$ - ρ úit, etc.) is due to *aspiration* of ρ (ρ - η), and the consequent unvoicing of τ of the article (O. Ir., $\tau n\tau$)].

137.

SUMMARY.

		SINGULAR.		PLURAL.	
		con.,	vowel,	con.,	vowel.
Nom. and Acc.	{	<i>Masc.</i> Δn	$\Delta n \tau$	}	}
	<i>Fem.</i> Δn (asp.*)	Δn	$n\Delta$ h-		
Gen.	{	<i>Masc.</i> Δn (asp.*)	Δn	}	}
	<i>Fem.</i> $\eta\Delta$	$n\Delta$ h-	$n\Delta$ (ecl.) $n\Delta$ h-		
Dat.		Δn (ecl.)	Δn		$n\Delta$ h-

*In these cases τ - appears before an initial ρ .

REVISION QUESTIONS. (K)

—(o)—

Revise Lessons 69 and 70.

1. When are the forms (a) Δn , (b) $n\Delta$, of the article used?
2. Give examples of the various initial changes which a noun undergoes after the article (a) Δn , and (b) $n\Delta$.
3. When is the initial con. of a noun aspirated after the article?
4. When is the initial con. of a noun eclipsed after the article?
4. After the article, when does each of the following appear before the noun :— τ - ; η - ; η - ?

THE ADJECTIVE.

(o)

NOMINATIVE CASE.

(o)

Lesson 71.—SINGULAR NUMBER.

138. The Adjective (Lat. *adjectivus*; Ir., *ADJADÉT*) is so called because it is 'added to' the noun to limit its meaning, to qualify it.

139. The adjective usually follows the noun in Irish. When the adjective follows its noun attributively, it agrees with the noun in gender, number, and case, and is inflected accordingly.

140. Its initial consonant is aspirated if the noun is fem. (...*bean* *éirín*).

If the final consonant of the noun be *o*, *n*, *t*, *l*, or *r*, and the initial consonant of the adjective be *o*, or *t*, the initial of the adjective, for phonetic reasons, resists aspiration (...*bean* *oib*).

In *Bean éirín ir eab Máire*, *éirín* is used *attributively*, and hence its initial con. is aspirated in this case. In *Tá an bean rin éirín*, *éirín* is used *predicatively*, and hence is not inflected. The predicative use of the adjective is only rarely permissible. *Tá an cáirta ro bán*, e.g., should be *cáirta bán ir eab é reo*, or, *tá dāt bán ar an gcáirta ro*.

PLURAL NUMBER.

141. If the noun is plural and in any case except the genitive, the adjective following, if used attributively and ending in a consonant, takes the plural ending, viz., —*e*, or —*a* (...*na mná éiríne*; ...*na bpróza oibá*).

142. Adjectives ending

- (I.) in a broad consonant form the plural by adding *a* (*oib*, —*a*);
- (II.) in a slender consonant form the plural by adding *e* (*éirín*, —*e*);
except those
- (III.) in —*amát*, which form the plural in —*amta* (*mírneamta*);
- (IV.) in a vowel suffer no change in the plural (*bpróza oibé*).

143. Plural nouns in nom. case, ending in a slender con., aspirate the initial consonant of a following attributive adjective. (*ir éiríne*). An adjective which qualifies a noun in the dual number has its initial con. aspirated, and is otherwise inflected as if qualifying a noun in the plu. (*tá bpróiz móra*).

Lesson 72.—GENITIVE CASE. SINGULAR NUMBER.

144. There are four declensions of the adjective, determined by the form of the ending in the nom. sing.:—

(I.) In the first declension, *i.e.*, adjectives ending in a broad consonant (ουβ), the genitive singular of the adjective is formed

- (a) by *attenuation* (ουιβ) if the noun is masculine ;
 (b) by *adding e* (ουιβε) if the noun is feminine.

(II.) In the second declension, *i.e.*, adjectives ending in a slender consonant (ουιν), except those in -αηαι, the gen. sing. of the adj. is formed

- (a) by *adding e* if the noun is *feminine* (...λεαδαρ να ηηδ ουινε) ;
 (b) if the noun is *masculine*, there is *no change* (...λεαδαρ αν ηηρ ουιν) except aspiration of the initial consonant.

(III.) In the third declension, *i.e.*, adjectives ending in -αηαι, the genitive singular of the adjective, following a masculine or feminine noun, ends in -αηαια (...λειρραηαια).

(IV.) In the fourth declension, *i.e.*, adjectives ending in a vowel (ουρθε), there is *no change*, terminally, in the gen. sing.

Or, combining (I.) and (II.) above, we might say that the gen. sing. of the adj. (a) ends in a slender con. if the noun is masc. { ...αιε αν ηατα ουιβ.
 and (b) is formed by adding e if noun is fem. { ...αιε να ηηριζε ουιβε.
 { ... ,, ,, ηηδ ουιν.
 { ... ,, ,, ηηδ ουινε.

In the gen. sing. of masc. adjs., *vowel changes* may occur as in § 106, and in the gen. sing. of fem. adjs., as in § 108.

Lesson 73.—DEGREES OF COMPARISON.

145. When we compare two or more things, as to the degree in which they possess the same quality, the form of the adjective used is inflected to express the varying relations. The **comparative** is used in comparing one thing with another, the **superlative** in comparing one thing with *all* others of a certain class or series.

146. The adjective has the same form in (λαριρε) the comparative and (λαριρε) superlative. Note that ηηδ follows the comparative in complete sentences. Except in sentences containing the Copula, the word ηηρ precedes the comparative (Τα ηη ηηρ λαριρε ηηδ...)

147. The comparative (or superlative) is formed, regularly, from the positive (or simple form of the adjective) by adding e to the latter, making the final consonant slender, and sometimes shortening the word (syncope) as in λαρι(ι)ρε. Note that this ending is similar in form to that of the gen. sing. fem. of the adjective ; and that *vowel changes* may occur as in § 108. In such sentences as ...αν ηηδαιη ηη λαριρε, ηη contains the relative

148. Adjectives ending in a vowel suffer, as a rule, no change for comparison, and those ending in -αηαι, form the comparative (and superlative) in -αηαια (...ηηρ λειρραηαια...) (There are some irregular comparisons which should be noted as they occur).

Lessons 74, 75.—DECLENSION OF THE ADJECTIVE. SUMMARY.

The inflexions of the adj. in the nom. (and acc.) sing., and nom. (and acc.) plu. are dealt with in Lesson 71; and of the gen. sing. in Less. 72; these, being the most frequently occurring, are the most important forms.

149. The initial con. of the dat. sing. of an adj. is generally aspirated or eclipsed under the same circumstances as the dat. sing. of a noun. Vide § 127, 128. (In some districts the initial con. of an adj. in the dat. is always aspd., and, in others, it suffers no change).

If the final con. of a fem. adj. is broad, (i.e., an adjective of the 1st decl. qualifying a feminine noun) this con. is attenuated in the dat. sing. (... $\sigma\omicron'$ n $\eta\eta\eta\alpha\omicron\iota$ $\upsilon\eta\zeta$).

150. In the dat. plu. and voc. plu., the adj. is not affected initially, but a or e is added, as in the nom. plu. (... $\lambda\epsilon\iota\tau$ na $\rho\epsilon\delta\rho\alpha\iota\upsilon$ $\upsilon\upsilon\beta\alpha$,... α $\rho\epsilon\delta\rho\alpha$ $\upsilon\upsilon\beta\alpha$! ... α $\iota\omicron\eta\alpha$ $\beta\iota\eta\eta\epsilon$!)

151. In the voc. sing., the initial con. of the adjective is aspd. (exceptions as in § 140); and in the 1st decl. masc., the final con. is attenuated (... α $\rho\eta\eta$ $\upsilon\eta\zeta$! but, ... α $\beta\epsilon\alpha\eta$ $\upsilon\epsilon\alpha\zeta$!)

Vowel changes as in § 106 may occur in the final syll. of an adj. in the voc. sing., masc. and dat. sing. fem.

152. In the gen. plu., the initial con. of the adj. is eclipsed, but it has otherwise the form of the nom. sing. (... $\zeta\lambda\omicron\eta$ na $\upsilon\eta\epsilon\alpha\eta$ $\eta\upsilon\upsilon\beta$,... α $\lambda\acute{\alpha}\eta$ $\beta\alpha\eta$ $\eta\upsilon\upsilon\beta$)

Note that an adjective (or noun) following a noun in the gen. plu. has its initial consonant eclipsed, even when the noun in the gen. plu. is not preceded by the art., as α $\lambda\acute{\alpha}\eta$ $\beta\alpha\eta$ $\eta\upsilon\upsilon\beta$, $\rho\iota\upsilon\alpha\zeta$ $\rho\epsilon\alpha\eta$ $\zeta\omicron\eta\eta\eta\alpha\epsilon\tau$.

REVISION QUESTIONS. (L)

—(o)—

Revise Lessons 71 to 75.

1. What is an adjective?
2. When is an adjective inflected?
3. Give examples of (a) attributive, and (b) predicative adjectives.
4. Give the four classes into which adjs. are divided according to ending.
5. How do adjs. form the plural in the nom., acc., dat., and voc.?
6. How is the gen. sing. of adjs. formed in the 1st, 2nd, 3rd, and 4th declensions?
7. When is the initial con. of an adj. (a) aspirated, and (b) when eclipsed?
8. Give examples of vowel changes in the final syllable of an adj. in (a) dat. sing. fem., (b) voc. sing. masc., (c) gen. sing. fem., and (d) gen. sing. masc.
9. How are adjectives inflected for comparison?

Lesson 76.—POSSESSIVE ADJECTIVES.

(I.)

153. Although *mo*, *do*, *a*, *ar*, *bur* take the place of the gen. case of the personal pronouns (*Cf.*, *ar mo ron*), they are now really **possessive adjectives**. They cannot, like 'mine,' 'thine,' etc., in Eng., stand apart from the nouns to which they refer. Such pronominal functions are, in Irish, discharged by the prepositional pronouns *nom*, *teac*, etc.

154. *Mo*, *do*, and *a* (his) aspirate an initial consonant (when aspirable).

A (her) does not affect initial con., but prefixes *n-* to vowels.

Ar, *bur*, and *a* (their) eclipse initial consonant (when eclipsable) and prefix *n-* to vowels.

(II.)

155. (*1 n-a fearam*). The possessive adjective is used in this idiom (and also before such words as *coidaob*, *ruibe*, *luige*, *duircaet*, *comnuibe*) usually to denote positions of rest, or state or condition.

(III.)

156. (*1 n-a fear*). This is another idiomatic use of the possessive adjective (meaning literally that he is in his manhood) to denote attributes of the subject. Such attributes are not necessarily changeable, as *ca an t-actair 1 n-a dia*.

157. "*1r fear e'* states the fact of his manhood as far as it is a thing which he has in common with all men.

"*ca re 1 n-a fear*" states the fact of his manhood as far as that manhood is a thing which attaches exclusively to himself as an individual.*"

Lesson 77.—(IV.) POSSESSIVE ADJECTIVES BEFORE A VERBAL NOUN.

158. In Lesson 57, we saw that the verbal noun governs the following noun in the genitive case (...*duinab na fuinneoige*). But we cannot say, e.g., *ca re as bualaob me* (just as we cannot say *ar ron me*). In such cases the appropriate possessive adjective (*mo* in this instance) is placed before the verbal noun, e.g., *ca re as mo (a'm') bualaob*. Similarly, we cannot say *ca re as bualaob i*, but *ca re as a bualaob*; and in like manner for the other possessive adjectives.

"There is a great fundamental principle involved here. In Irish, a transitive action, the instant it passes from the agent *belongs* to the object. Once a blow is given it belongs, from that out, to the person who has got it. It is his blow. If I am striking *him*, I am engaged in *his* striking. On that principle, the action belongs to the person who gets it, not to the person who gives it. The verbal noun is the name of the action. Hence the object of the action possesses the thing expressed by the verbal noun. Hence it is in the genitive case depending on the verbal noun*."

* *An t-actair reabair o laozairne.*

PROLEPSIS.

159. *Ἀν ἔφυλ ἄ φιορ ἄστᾶτ ἄτῶ ἔ ἀν ῥᾶζᾶρ ἀιμῖρε βῆαρ ἄστᾶινη ἰ μβᾶρᾶτ?* The *ἄ* here, also, is a possessive adjective, and refers to the part of the sentence, *ἄτῶ ἔ...ἰ μβᾶρᾶτ?* Because it thus represents or anticipates the clause following, this is said to be a **Proleptic** use of the possessive *ἄ*.

160. [Other instances of prolepsis are :—

(1) *᾿ῶ᾿ ἄ μῆρῶ | ἄιηητ ᾿ῶ βῖ ἀιζε, ηῖορ ἔιμῖζ λειρ.*

ἄ represents the gen. case of *ἄιηητ...ἀιζε*. A clause or a phrase cannot be gov'd. in the gen. case; its gen. is here represented by the possess. adj. *ἄ* (of *᾿ῶ᾿*) before the noun *μῆρῶ*.

This use of *ἄ* always occurs with *verbal nouns of saying, thinking, and such like* (*ἄ ῥᾶῶ, ἄ ῖνῆαρ, ἄ φῖαρῖμῖζε, etc.*) *when followed by a phrase or clause*. Contrast *...ἄστ ῥᾶῶ ἡ ἀ βῖαρῖρεᾶᾶ*, with *ἄἰμ ᾿᾿ᾶ ῥᾶῶ λῆατ ζῶ μβῆρῶ φῆαρῖᾶιηη ἀηη*.

(2) *᾿ῶ βῖ ῥῆ ᾿ῶ᾿ φῖαᾶᾶβ ὀρμ | ἀιρῖᾶᾶᾶ ᾿ῶ ἄβᾶιρτ ᾿ῶ.*

The proleptic pron. *ῥῆ* represents the phrase *ἀιρῖᾶᾶᾶ...᾿ῶ*

(3) *ἡρ ἔ ῖο ἄἡιρμ | ζῶ ἔφυλ ἀη ἄῆαρ ἄστᾶτ.*

ἔ is proleptic predicate, representing the clause *ζῶ...ἄστᾶτ*.

(4) *᾿ῶᾶ ῖῶρ ἀη ἄρῖᾶᾶ ἔ | ᾿ῶᾶ ᾿ῶᾶᾶᾶ ἀη φῆαρῖᾶιηη ἰ ᾿ῶηη.*

ἔ is proleptic subject, representing the clause *᾿ῶᾶ...ἰ ᾿ῶηη.*

Lesson 78.—DEMONSTRATIVE AND INDEFINITE ADJECTIVES.

161. When the **Demonstrative Adjectives**, viz. *ῖο* (or, when the last preceding vowel is slender, *ῖῆῶ*) *ῖηη, ᾿ῶ*, are used with a noun, the article must be expressed (*ἀη φῆαρ ᾿ῶ, ἀη ᾿ῶηη ῖῆῶ, ἀη ᾿ῶηη βῶᾶτ ῖῶ*.) The article of itself rarely defines: a demon. adj., or a qualifying clause, etc., expressed or understood, is usually required after the noun. *ῖηη ἔ ἀη ἄᾶᾶᾶ, ῖηη ἑ ἀη φῖηηηῶᾶ* are incomplete, unless we are referring to some particular book, or window, previously referred to or defined, *ἀη ἑ. ᾿ῶ ἄᾶηηηηῖᾶᾶ, ἀη ῖ. ᾿ῶ ἔῖῖῖῖ*.

162. **Indefinite Adjective** is the term generally applied to such adjectives as *ἔῖῖηη, ἔηη, ἄῖῖῖῖ, etc.*, which have a vague and indefinite reference to their nouns. The **Distributive Adjectives**, such as *ζᾶᾶ, ἡηη, ζᾶᾶ ἡηη, ζᾶᾶ ᾶῶη, ζᾶᾶ ῖῆ* may also be termed indefinite.

Lesson 79.—NUMERALS (I.)—CARDINAL.

Uses of the Numerals:—

163. In (I.), ΔΟΗ, ὄό, etc., the *cardinal numbers*, we have simply the name of the number itself. These names are rarely used alone, but are learnt as a basis for other uses of Irish numerals. Hence, the term 'cardinal numbers' which implies that these are the *hinge* or pivot of the numeral system.

164. (II.) Δ η-ΔΟΗ, Δ ὄό, etc., is the form of the numeral used in counting consecutively. When denoting the order in which things are taken, this form of the numeral may be used (e.g., τεαταναό Δ ὀειό) as an alternative to that in § 165.

Lesson 80.—NUMERALS (III.)—ORDINAL.

165. (III.) An ordinal numeral is used as an *adjective* to denote the *order* (1st, 2nd, etc.) which the objects referred to hold in a numerical series.

Note (a) the usual termination, viz., —*μάθ*, and (b) the position of the noun:—

(1)	(2)	(3)	(1)	(2)	(3)				
ΔΗ	ρέμάθ	λά	ὀείας	ΔΗ	τ-ΔΟΗμάθ	λά	ὀείας	ΔΗ	φίόθ.

166. The initial of *οείαθ* (1st) is *aspd.* after the article. *Οείαθ* and *τρεαφ* aspirate the initial *con.* of the following noun. The other ordinals prefix *η-* to vowels. After the art. *ΔΗ*, *τ-* appears before *ΔΟΗμάθ*, *οείαθ*, and *ΔΟΗ*.

Lesson 81.—NUMERALS (IV.)

πόσα. ὄά πόσα. τρι πόσαί.

167. (IV.) In this lesson, the numerals are used as *adjectives* denoting the number of objects.

Notice (a) that in this case *ΔΟΗ* (—'one') is *not* used before the noun;

(b) that *ὄό* and *οείαφ* become *ὄά, οείτρε*, when denoting number of objects: when following *ΔΗ*, or any word ending in a dental, the *ο* of *ὄά* is not *aspd.*, as *ΔΗ ὄά φίλ*;

(c) that *ρεάτ, οείτ, ναοί, and ὀειό* eclipse, and that *ΔΟΗ* and *ὄά* aspirate, *ὄά* being followed by the dual form of the noun (*ὄά οηῶόίς*, as in Lesson 61); and

(d) that the position of the noun in compounds is immediately after the name of the digit (*ὄά πόσα ὀείας*); and, further, that in such cases an attributive adjective immediately follows its noun. E.g., *ρεάτ τεάβαιφ μόρα ὀείας, ὄά βυη βάνα ὀείας*; but the more usual construction is, e.g., *ρεάτ ζοηη ὀείας ὀε τεάβαιθ μόρα*.

168. The singular form of the noun is used after the numerals when the objects are considered not as separate units but collectively. When the noun is thus in the *sing.* form its initial *con.* is *aspd.* after *τρι, οείτρε, ούίς, ρέ*, but (*sing.* or *plu.* form) is eclipsed after *ρεάτ, οείτ, ναοί, ὀειό*.

169. The υ of $\upsilon\acute{\epsilon}\acute{\alpha}\delta\varsigma$ is aspd. (a) when the word following $\upsilon\acute{\alpha}$ or $\delta\omicron\eta$ ends in a vowel, and (b) when the sing. form is used after $\tau\pi\acute{\iota}$, etc., to $\upsilon\epsilon\acute{\iota}\varsigma$, unless the final con. of the noun is τ , υ , η , ι , ρ . Examples:— $\delta\omicron\eta$ ($\upsilon\acute{\alpha}$) $\rho\acute{\omicron}\varsigma\acute{\alpha}$ $\upsilon\acute{\epsilon}\acute{\alpha}\delta\varsigma$, (b) $\tau\pi\acute{\iota}$ $\acute{\epsilon}\alpha\pi\tau\acute{\alpha}$ $\upsilon\acute{\epsilon}\acute{\alpha}\delta\varsigma$, $\omicron\epsilon\tau$ $\beta\rho\acute{\omicron}\varsigma\acute{\alpha}$ $\upsilon\acute{\epsilon}\acute{\alpha}\delta\varsigma$. $\tau\pi\acute{\iota}$, $\rho\acute{\epsilon}$, $\acute{\epsilon}\epsilon\acute{\iota}\tau\eta\epsilon$, prefix η - to the initial vowel of a noun which is in the plu. form. The ϵ of $\acute{\epsilon}\epsilon\acute{\iota}\tau\eta\epsilon$, $\acute{\epsilon}\upsilon\eta\varsigma$ is aspd. in M . when these numerals precede nouns.

170. $\rho\acute{\iota}\epsilon$ * and its compounds (e.g., $\upsilon\acute{\alpha}\acute{\epsilon}\acute{\alpha}\upsilon\upsilon$, or $\upsilon\acute{\alpha}$ $\rho\acute{\iota}\epsilon\upsilon\upsilon$), $\acute{\epsilon}\acute{\epsilon}\acute{\alpha}\upsilon\upsilon$ (100) and $\mu\acute{\iota}\tau\eta$ (1,000) are now usually followed by the nom. sing. form of the noun ($\rho\acute{\iota}\epsilon$ bean).

171. When we require to emphasise the *number* of objects we use the word $\acute{\epsilon}\acute{\alpha}\nu\eta$ in the requisite form, e.g. :—

$\eta\acute{\iota}'\iota$ $\acute{\alpha}\zeta\alpha\mu$ $\acute{\alpha}\epsilon\tau$ $\acute{\epsilon}\acute{\alpha}\nu\eta$ ($\upsilon\acute{\alpha}$ $\acute{\epsilon}\acute{\alpha}\nu\eta$).
 $\tau\acute{\alpha}$ $\rho\acute{\epsilon}$ $\acute{\epsilon}\iota\eta$ ($\rho\acute{\epsilon}\acute{\alpha}\epsilon\tau$ $\zeta\epsilon\iota\eta$) $\upsilon\epsilon$ $\lambda\epsilon\alpha\beta\eta\alpha\iota\beta$ $\acute{\alpha}\zeta\alpha\mu$.

Lesson 82.—PERSONAL NUMERALS (V.)

172. (V) The forms of the numeral nouns applied to persons from two to ten, and twelve, are called **personal numerals**. They govern a following noun in the gen. plu., as $\tau\pi\acute{\iota}\mu\upsilon$ $\beta\alpha\eta$.

In (I.) and (II.) the numerals are used in the abstract, as counters ; in (III.) and (IV.) as adjectives, which, unlike the corresponding numerals in Eng., cannot stand apart from the nouns to which they refer, and in (V.) as nouns.

REVISION QUESTIONS. (M)

—(o)—

Revise Lessons 76 to 82.

1. Give examples of four idiomatic uses of the possessive adjective $\acute{\alpha}$ (' its ').
2. Give examples of proleptic pronouns.
3. Name some (a) demonstrative, and (b) indefinite adjectives.
4. What is meant by " cardinal," " ordinal " and " personal " numerals? Give examples of each.
5. What numerals affect the initial letters of nouns and how ?
6. How does the numeral $\upsilon\acute{\alpha}$ affect the following noun and adjective ?

* $\rho\acute{\iota}\epsilon$. plu., and dat. sing., $\rho\acute{\iota}\epsilon\upsilon\upsilon$. gen., $\rho\acute{\iota}\epsilon\acute{\epsilon}\upsilon\upsilon$. Also used in counting, as $\acute{\alpha}$ $\rho\acute{\iota}\epsilon$.

THE PRONOUN.

—(o)—

Lesson 83.—PERSONAL PRONOUNS.

173. A Pronoun is a part of speech which stands *for a noun*. **Personal Pronouns** are so called because they stand for the three persons: 1st, 2nd and 3rd.

174. The forms **é, í, íað** (**Disjunctive Pronouns**) are now used (a) with **í**, (b) in the acc. case, or (c) as nominatives separated from their verbs.

175. **Sé, rí, ríað** (**Conjunctive Pronouns**) are used immediately after a verb as subject. The personal pronouns are not used in the genitive case *vide* § 153, and, in the dative, they combine with prepositions (Lesson 84) to form Prepositional Pronouns.

176. **Demonstrative Pronouns** point out or distinguish persons or things. **É, í,** and **íað** with **reo, rín,** or **ríuð** (as **é reo, í ríuð**) discharge the function of dem. prons. So, **rúð,** and **rín** are sometimes used as independent prons., as **Þó bí ré að bættaist þó á r rúð orím.** This use of **rín,** as **ran** (usually meaning 'that circumstance'), is frequent in M., as **Þú átt líom ran; þó þáraní ran í.**

177. A **Reflexive Pronoun** refers back to the subject of the sentence, as **Þó buatt ré é réin,** in which the object of the action (**é réin**) is identical with the subject (**ré**).

Lessons 84.—PREPOSITIONAL PRONOUNS.

178. **Prepositional Pronouns** (**líom,** etc.) are formed from the pronoun (**mé,** etc.) and the preposition (**íe,** etc.)

179. **Pron.** In the prepl. prons, from **að,** the stress is on the 2nd syll. in M. (**aðam'**), but on the 1st syll. in U. and the greater part of C. (**að' am**). The forms **éuðam,** etc., are pron. **éum, éut, éuise, éúthe; éúinn, éúv, éúna** in M., but **nuðam, nuðat,** etc., in C. and U. In the 3rd plu. (**leó, acá,** etc.), a form in **-b** (as **leób, acáb,** etc.) is used in W. Galway. The form of the 3 sing. masc. is, in some cases, used for that of the simple prep., as **þaóí, éuise'** in C. and U., and **þoimíj** (**-þoimie**) in M. In the forms from **þó** and **þe** (**þom,** etc.; **þíom,** etc.) the initial (**þ**) is usually aspd. after a vowel.

Lesson 85.—THE RELATIVE.

(I.)—NOMINATIVE (A) AND ACCUSATIVE CASES (B).

180. Except under the government of prepositions, there is, historically, no special independent form of the relative. The **Relative Clause** always immediately follows its antecedent, as *an fear do bí i gcóircais i nDó, tá ré annro i nDóiu*, in which *do bí i gcóircais i nDó* is a relative clause qualifying (as an adjective) the antecedent, *fear*.

181. The connexion between the relative clause and its antecedent is, in **nom.** and **acc.*** relation, shown by:—

- (a) *The Relative Form of the verb* in the affirmative. In this form *-(e)ar* is added to the stem of the verb in the pres., as...*an fear tuiscear iad*; *-f(e)ar* or *-(e)ócar*, in the fut., as ...*an fear tuiscear iad*, and an initial con. is aspd. This form of the verb, common in C. and U., is now rarely used in M.
- (b) When the verb in a relative clause is in the past, past-hab., or condl., affirmative, the particle *do*, which usually accompanies these forms of the verb, discharges the function of a relative. In such clauses *do* is pronounced (and frequently written) *da* before an initial con., but *o'* or *da o'* before vowels, as *an fear da (-do) buail é*; *an fear da o' (-o') éiriu*.
- (c) Where the rel. form of the verb is not used for the pres. and fut., as usually in M., the particle *a* (aspg.) appears before the ordinary pres. or fut. form of these verbs, and has the office or value of a relative, as ...*an fear a tuisceann iad*; ...*an fear a tuisfiró iad*.

[In Keating, this *a* does not appear before the relative form of the verb, ...*an fear bíor ann*. Compound verbs (*i.e.*, verbs with prefixes) as *(do-)bairim*, *(a)obairim*, as a rule, have not the relative form, ...*an fear do-šní an obair*. In relative clauses, the prefix *do-* is prond *a*.]

- (d) When the verb is in the negative, the relative form of the verb is not used, the connection between the relative clause and its antecedent being in all cases shown by the (dependent) form of the negative particle, *i.e.*, *nac*, *ná*, or *nár* (and not *ní*, or *níor*).

182. 15. In relative clauses containing any part of the copula, no special relative form is now used. The forms *ir*, *ba* (affirm.); and *nac*, *nár*, *náró* (neg.), which contain the rel., are employed. *Ar* (pres.) and *bur* (fut.) were used as rel. forms of the copula in early modern Irish.

**I.e.*, acc. governed by a verb. A few preps. govern nouns and pers. prons. in the acc. (*vide* § 116), but all preps. govern the relative in the dative.

Lesson 86.—THE RELATIVE.

(II).—DATIVE CASE

183. (C.) When governed by a preposition, a distinct form of the Relative, viz., **Δ**(n-), appears. The n, which, earlier, formed part of the relative after a prepn.

(a) is carried on as n-prefixed to an initial vowel, as "1^o mó cum **Δ** n-**Δ*** n-oirpeadó rcoilínis bó."

(b) causes eclipsis of an initial con., as "Mí raib don beart eile **Δ**ca le n-**Δ** otiocraioir **Δ**ir." but

(c) before verbs which take the particle **no** (*vide* § 85), n of the rel. is assimilated, resulting in **Δn** [-rel. **Δ**(n) + particle **n**(o)], as, "Sin é an ball in **Δn** fásar an bó."

184. In the above three examples, the prepn. precedes the rel. The more usual construction now is to place the prepn. at the end of the rel. clause in the form of the corresponding prepl. pron. *E.g.*, ...an buacail **Δ**s **Δ** bfuil mo leabhar is now usually ...an buacail **Δ** (**so**, M.†) bfuil mo leabhar **Δ**ise. Similarly, in the past tense, Sin é an buacail ó n-**Δ**r tósar an leabhar is now usually Sin é an buacail ar (**sup**, M.†) tósar an leabhar uairó.

185. This development of **so** (and **sup**), the usual form of the dat. rel. used in affirmative sentences in M.†, has been as follows:—(a) ...an buacail **Δ**s **Δ** bfuil an leabhar became (b) ...an buacail 's**Δ** (-**Δ**s **Δ**) bfuil an leabhar **Δ**ise, where the prepn. is seen both before the rel. and at the end of the clause; and (c) an buacail **so** bfuil an leabhar **Δ**ise. The **so** (for 's**Δ**) finally extended to all dat. rels. (in the affirm.) ...an bopea **so** bfuil mo peann ann, ...an buacail **sup** tósar an leabhar uairó. A prepn. cannot be used before **so** or **sup** in such clauses, but a prepl. pron. may, as **Δn** t-é leir **sup** cumhans fásaró.

186. Verbs which have a *dependent form* use this form after the dat. rel., ...an uaine **Δ** (**so**, M.) raib rúil **Δ**sam leir; ...an fear **Δ** (**so**, M.) bfa^sam consnam uairó.

* The n- before **Δ** is (as the n in, *e.g.*, 'Do tós ré ó n-**Δ** mac é) inserted after the prepn. ending in a vowel (but **oe** or **oo** before the rel. **Δ** is contracted to **o'Δ**).

The n- before the verb is the original n of the rel., **an**.

† Except in the Decies, where **Δ** and **ar** are in use.

187. **IS.** The dative relative in **1P** clauses, being in frequent and idiomatic use, should be particularly noted. In accordance with the general rule in § 186, the form in dependent clauses is used, viz.: **-P(Δ)b** (but **-P** before cons.) in the pres.; and **-P(Δ)b'** (but **-P**, aspg., before cons.) in the past and condl. When these forms are combined with **Δ(n)**, i.e., the dat. case of the rel., the **n** becomes assimilated before **P**, as in (c) above, resulting in **ΔPb, ΔP, ΔPb'**, and in M., **ΣuPb, ΣuP, ΣuPb'**.

Hence, **ο'αPb** in, e.g., ...**ρεαP ο'αPb α1nM**, is **-prepn. (οο) + rel. (Δ) + dept. pres. form of copula (-Pb)**. This will explain the rel. form of the copula in such constructions as:—

Σ1n ε αn buαcα11 ΔP (ΣuP, M.) λe1P αn λeαbαP P1n.
 "...αn α1c υ'ο 1 n-αPb' αο1b1n1 b1n1-Σuε εαn."
 C1α (n-1αο αn οPεαM Δ [οr Σο])P ο1οb ε?

Δ (or **Σο**), before **ba** or **ba'o**, is sometimes used instead of **αPb**, etc., as, "...αn μ1u1n1c1P Σο (-Δ) mba λeο 1α'o," the **n** of **Δ(n)** being represented in the eclipsis of **b**.

188. (D.) Although the relative in such sentences as **1P ε S. Ο Ο. αn buαcα11 ΔP** (or **ΣuPb'**) **ε1Σ1n ο'α αcα1P οul cαP Pα1te** is equivalent, in a general way, to a genitive relation, it is really in the dative case gov'd. by a preceding prepn., usually **αΣ** or **οο**, understood. The complete form is...**αn buαcα11 αΣ ΔPb'** **ε1Σ1n ο'α αcα1P...**, i.e., '...the boy in whose case (at whom, or concerning whom) it was necessary for his father...' All instances of apparently genitive relatives can be similarly explained, viz., as being really dat. rels. governed by a prepn. understood.

189. (E.) There is a *Compound Relative* meaning 'all which,' 'all that,' of the same form as the rel. in the dat., viz., **Δ** (originally **Δn**). It becomes **αP** in combination with the particle **πο**, and is followed by the dependent form of the verb as in § 186.

190. **Summary.** To sum up, relativity is expressed as follows:—

- (1) In pres. and fut. tenses, affirm., by the **relative form of the verb**, nom. and acc. cases.
- (2) By the particles **οο** or **Δ** where rel. form is not used; nom. and acc. cases.
- (3) In neg. clauses, by the negative particles **nά, nαc, nάP**, followed by dependent form of verb; nom., acc. and dat. cases.
- (4) By **Δ** (orig. **Δn**) in dat. case, affirm.; and as comp. rel.: always followed by dependent form of verb.

Lesson 87.—INTERROGATIVE PRONOUNS.

191. An Interrogative Pronoun is one that introduces a question.

Note that the *relative* following the interrogative aspirates the initial consonant of the verb. As a relative clause always follows the interrog. pron., the rel. form of the verb may be used in the pres. and fut. as *Cia* (*h-é an* *buine*) *bíor annro* *ḡac oíðce* ?

Lesson 88.—EMPHATIC SUFFIXES.

192. Emphasis has an important influence in determining the position, and even the form, of words in an Irish sentence. The English sentence " Did you walk to Bangor yesterday evening ? " may assume at least seven different shades of meaning according to the word which gets the chief voice stress. Read the sentence with emphasis on, *e.g.*, ' walk ' and note the change in meaning ; similarly emphasise ' yesterday ' and note the further change, and so on. When we require to attach special importance to any particular idea in an Irish sentence we do so

(a) by means of emphatic suffixes ; or

(b) by bringing to the beginning of the sentence with *Ír* the particular part or idea to be emphasised.

The latter (b) method is used, as in *Ír é Seasán do buail tu*, when we want to exclude all other possible alternatives. The former (a) in cases of simple contrast, comparison, or when the object is pointed out. *E.g.*, *Tá cáirta aḡam-rá, tá leabair aḡac-rá* ; *Ír é mo haḡa-rá, ríú é do haḡa-rá*, etc. Both methods may, if necessary, be used in a sentence, as *Ír buit-re a ḡuḡar an leabair*.

The student must be careful to use the emphatic mode when the sense requires it. Constructions such as, *Sin é mo leabair, ríú é do leabair* ; *Tá haḡa ort, tá cairín ort* ; *ḡuḡarí réat dom, ḡuḡaré réatling dom* (though, on the analogy of the English mode of emphasising, becoming very common with students) must be carefully avoided ; the emphatic suffixes (...mo leabair-rá, etc.,) must be used in all such cases.

193. (a) In Irish, a personal pronoun, whether occurring (I.) in its simple form (*mé*) ; (II.) as a prepositional pronoun (*liom*) ; (III.) in the allied form of a possessive adjective (*mo*) ; or (IV.) as the pronominal ending of a verb (*ḡuḡar*) must never be emphasised. The language provides us with emphatic suffixes (*tu-rá, liom-rá, mo cárdḡ-rá, ḡuḡar-rá*).

The word *féin* may, similarly, be used for purposes of emphasis. Note that in *É féin do buail é féin*, the first *féin* is an emphatic suffix, and the second combines with *é* to form the reflexive pronoun, *é féin*.

1. $\text{Oo } \underline{\text{Zeapn}} \text{ } \underline{\text{Pilib}} \text{ an } \underline{\text{cápta}} \text{ } \underline{\text{bán}} \text{ le } \underline{\text{m'rciam-re}} \text{ } \underline{\text{i n'óé.}}$

The above sentence, *e.g.*, may be written in various ways, according to the particular idea we wish to emphasise:—

2. $1r \quad \underline{\text{é Pilib}} \quad \text{oo } \underline{\text{Zeapn}} \text{ an } \underline{\text{cápta}} \text{ } \underline{\text{bán}} \text{ le } \underline{\text{m'rciam-re}} \text{ } \underline{\text{n'óé.}}$

3. $1r \quad \underline{\text{cápta}} \quad \text{oo } \underline{\text{Zeapn}} \text{ } \underline{\text{Pilib}} \text{ le } \underline{\text{m'rciam-re}} \text{ } \underline{\text{i n'óé.}}$

4. $1r \text{ é an } \underline{\text{cápta}} \text{ } \underline{\text{bán}} \quad \text{,,} \quad \text{,,} \quad \text{,,} \quad \text{,,}$

5. $1r \quad \text{le } \underline{\text{rciam}} \quad \text{oo } \underline{\text{Zeapn}} \text{ } \underline{\text{Pilib}} \text{ an } \underline{\text{cápta}} \text{ } \underline{\text{bán}} \quad \text{,,}$

6. $1r \text{ le } \underline{\text{m'rciam-re}} \quad \text{,,} \quad \text{,,} \quad \text{,,} \quad \text{,,}$

7. $1r \quad \underline{\text{i n'óé}} \quad \text{,,} \quad \text{,,} \quad \text{,,}$

(1) simply relates what occurred. Here the action ($\text{oo } \underline{\text{Zeapn}}$) is the leading idea in the sentence.

In each of the other sentences, the underlined word denotes the part of the sentence to which special importance is attached. (2) *i.e.*, not *Tadhg*, etc.; (3) not a *paper*, etc.; (4) not a *red* or any other colour card; (5) not with *scissors*, etc.; (6) not with *your* or his own, etc., knife; (7) not any other day. In these sentences (2-7) we emphasise, respectively, the *agent*, *object*, *instrument*, and *time* of action.

REVISION QUESTIONS. (N)

—(o)—

Revise Lessons 83 to 88.

1. What is a Pronoun ?
2. Give instances of the various classes of pronouns.
3. Name the (a) disjunctive and (b) conjunctive forms of the personal pronouns, and state when these forms are used.
4. Give examples of Relative Clauses.
5. Give instances of the forms of the relative in use in (a) nom. and acc. cases, and (b) dative case.
6. When may the relative form of the verb be used ?
7. Give examples of the use of the compound relative.
8. When is the dependent form of a verb used after the relative ?
9. Give examples of clauses containing the copula, pres. and past tenses, in which the relative is in the (a) nom., and (b) dative.
10. How do the dat. rel., and compound rel., affect the following verb ?
11. How do you emphasise a particular word or phrase in an Irish sentence ? Give examples.
12. To what words may emphatic suffixes be applied ? Give examples

Lesson 89.—ASPIRATION.

195. [When, for instance, a stop consonant, as *b*, becomes, under the influence of a preceding word, the corresponding continuant or spirant, *h*, the phonetic change is usually termed **Aspiration**.]

We may (having now met all the forms) summarise the examples of **Aspiration**, and infer the following rules therefrom.

Aspiration of an initial (aspirable) consonant, takes place :—

196. I.—Of the initial consonant of a Verb.

- (1) After the compounds of *po*, viz.:—*ap*, *nap*, *cap*, *nip*, *sup*, *munaip* etc.
- (2) After the particles *ni* and *oo*, and the conjunction, *ma*.
- (3) After the nominative or accusative case of the relative (affirm.)
The initial con. of the relative form of the verb is *aspd*.

197. II.—Of the initial consonant of a noun.

- (1) After the article (*an*) nominative or accusative case, fem., sing.
- (2) After the article (*an*) genitive case, masculine, singular; also of the initial con. of a proper noun in the gen. case (except after the nouns *Ó* and *Mac*, in surnames, and *féite*).
- (3) In the vocative case (after particle *a*) masc. and fem.
- (4) When it is the second word of a compound (unless it be in the genitive case, e.g., *oitecéille*).
- (5) After the possessive adjectives, *mo*, *oo* and *a* ('his').
- (6) After the prepositions, *ó*, *fé* (*fa*, *faoi*) *ap*, *apé*, *um*, *oo*, *oe*, *ioin*, *cap*; and also after *oe'n**, *oo'n**.
- (7) After the numerals, *don*, *óá*; *éá*, *cap*; and after *api*, *ceitpe*, *óúg*, *fé* when followed by the singular form of the noun.

198. III.—Of the initial consonant of an Adjective.

- (1) When (being used attributively) it follows a feminine noun in the nominative or accusative case, singular.
- (2) When (being used attributively) it follows a masculine noun in the genitive case singular.
- (3) When it follows a noun, masculine or feminine, in the vocative singular.
- (4) When the preceding noun, nominative or accusative, is plural and ends in a slender consonant, the adj. being used attributively.
- (5) When the preceding noun is aspirated by a preposition, or by *prep.*+*article*. *Vide* § 149.
- (6) When it is the second word of a compound.
- (7) When the noun it qualifies (attributively) is in the dual number.

* In Kerry, *eclipsis* after *oe'n*, or *oo'n*, is the rule.

Lesson 90.—ECLIPSIS.

199. [When a breath con. (as c , τ or p) is changed into the corresponding voice con. (ζ , υ , b), or a voice con. (ζ , υ , b) into the corresponding nasal con. ($\eta\zeta$, n , m) the phonetic change is termed Eclipsis.]

As with aspiration, we may infer the following rules for Eclipsis.

Eclipsis of an initial (eclipsable) consonant takes place :—

200. I.—Of the initial consonants of a Verb.

- (1) After the particles $\alpha\eta$, $c\acute{\alpha}$, $\eta\acute{\alpha}\zeta$; also after the conjunctions, $\zeta\sigma$, $\eta\acute{\alpha}\zeta$, $\mu\eta\eta\alpha$ ($\mu\alpha\eta\alpha$) and $\upsilon\acute{\alpha}$.
- (2) After the relative α , when (a) it means 'all that'; and (b) when in the dative case.

201. II.—Of the initial consonants of a Noun.

- (1) After the numerals $\rho\epsilon\acute{\alpha}\zeta\tau$, $\sigma\acute{\alpha}\tau$, $\eta\acute{\alpha}\sigma\iota$, $\upsilon\epsilon\iota\zeta$.
- (2) After the possessive adjectives $\alpha\eta$, $\upsilon\eta\eta$, α ('their').
- (3) After the article $\alpha\eta$ preceded by a preposition (except $\upsilon\sigma'$ and $\upsilon\epsilon'$, which usually cause aspiration); also, after the preposition ι . (In U., aspiration takes place after all preps. + art.)
- (4) After the article ($\eta\alpha$) in the genitive plural; also when following another noun or numeral which is in the gen. plu., with or without the article.

202. III.—Of the initial consonant of an Adjective.

- (1) When the noun it qualifies is preceded by a prepn. + art., as in II. (3) above.
- (2) When it follows, used attributively, a noun in the gen. plural.
- (3) When it is a numeral adjective used in the gen. after the article ($\eta\alpha$), as $\beta\epsilon\alpha\eta$ $\eta\alpha$ $\upsilon\tau\eta\iota$ $\mu\beta\acute{\alpha}$.

203.

η— is prefixed (1) to the initial vowel of (a) Verbs, (b) Nouns, and (c) Adjectives, generally, under the same circumstances as when an initial consonant would be eclipsed in these words. *Vide* § 200, 201, and 202.

(But [II. (3), III. (1)] η-is not prefixed to the initial vowel of nouns or adjectives after a prepn. + art.)

(2) to the possessive adjectives, ἀρ, συρ, α, when preceded by any of the prepositions ὀ, ρέ, τῆ, σο, τε, ι.

204.

τ— is prefixed (1) to the initial vowel of masculine nouns preceded by the article ἀν, in the nominative or accusative case, singular.

(2) After the art. ἀν, to initial ρ of feminine nouns in nom. or acc. case.

(3) After the art. ἀν, to initial ρ of masculine nouns, genitive case.

(4) After ἀον, to nouns whose initial consonant is ρ.

In (2), (3), and (4), except words beginning with ρσ, ρρ, ρτ, ρμ.

(5) After the art. ἀν, to the numerals ἀον, ἀονῆαὐ, and οὐτῆαὐ, and their compounds.

205.

η— is prefixed to the initial vowel of—

(1) Nouns, masculine and feminine, in the nominative, accusative, and dative, plural, after the article (ηα).

(2) Feminine nouns, in the genitive singular, after the article (ηα).

(3) Nouns after the possessive adjective α ('her').

(4) Nouns after the prepositions σο, τε.

(5) Nouns after the numerals τῆ, ρέ; ὀαηα, and all ordinal numbers ending in -ῆαὐ.

(6) Predicate following ηῖ in 1η sentences; and, similarly, sometimes after βα, βαὐ, as βα η-έ, σο ηβαὐ η-έ.

(7) Verbs, after the conjunction, or particle, ηδ.

(8) Adjectives used adverbially, after σο.

(After particles, etc., which do not aspirate or eclipse, η-is, generally speaking, prefixed to initial vowels).

REVISION QUESTIONS. (O)

—(o)—

Revise Lessons 89 to 91.

1. What is meant by the Aspiration of a consonant?
2. When is the initial consonant of (I.) a Verb, (II.) a noun, (III.) an Adjective aspirated?
3. Define Eclipsis.
4. When is the initial consonant of (I.) a Verb, (II.) a Noun, (III.) an Adjective eclipsed?
5. Under what circumstances is
 - (a) η- prefixed to the initial vowel of words?
 - (b) τ- " " " ?
 - (c) η " " " ?

THE VERB. (III.)

THE SUBJUNCTIVE MOOD.

Lesson 92.—I.—PRESENT.

- (a) $\text{Cuir umac anoir é go bpreicead an mbéir ré a'o' sordusaó}$
 (b) $\text{Go bprása dia do pláinte asat.}$

206. Verbs indicate the mental attitude, *the mood*, of the speaker. "Verbs have moods because speakers have moods." The speaker may simply give information or ask a question: he then uses the indicative mood of the verb. He may command or request: he then uses the imperative mood. He may, in a subordinate clause, express doubt or contingency, or a wish: he then uses the **Subjunctive Mood**.

The **Subjunctive Present** is used:—

207. (a) in a *future reference* to express an element of *doubt or indefiniteness*. It usually follows such conjunctions as go ('until') ruí a, rana (M.) ('before') mun a, mar a ('unless').

208. (b) to express a *wish*. This, the most frequent use of the subj. pres., is also called the *Optative Mood*. The latter is, however, merely the subj. in an optative sense. The subjunctive of wish is preceded by the conjunction go ('that') in affirmative sentences, and by ná n (aspg.) in negative sentences but the neg. form before raib is ná , as ná raib maic asat . In a sentence containing a subj. of wish, the main clause, though usually understood, is occasionally expressed, as " Ír í mo surlóe (main clause) ... $\text{go maire ar nsaóitís rlan}$ (subordinate clause)."

209. Person.	SINGULAR.	PLURAL.
1st	óúnao.	óúnaimíó.
2nd	óúnaip.	óúna (rīb).
3rd	óúna.	óúnaíó

The subjunctive present is formed from the stem, *i.e.*, imper. 2 sg., of the verb. The 3 sg. ending, *viz.*, -e after a slender consonant and -a after a broad consonant, is sometimes spelled -íó and -aíó , respectively.

There are three exceptions:—(a) (óó)-bheirim forms its subj. from tús , as go ótusaó , etc.; (b) tísim from tís , or tás , as go ótísead , etc., or go ótásaó , etc.; and (c) the forms of the subj. pres. of tá are: $\text{(go) raabaó, raabaip, raib, rabmuíó, raib (rīb), raabaíó}$. The forms of the subj. pres. of the Copula are: suraib, náraib (somet. with -ó omitted); also baó , as in go mbaó n-é óuit .

210. [There is also a *Secondary Form* of the subjunctive present, used when the verb in the main clause is in the *past tense*.

E.g., Ían go ócéigeaó (Subj. Pres.) $\text{abaité. Óubairt leat panaimaint go ócéigínn}$ (Secondary Form of Subj. Pres.) abaité . This latter form must not be confounded with the **Subjunctive Past**, Lesson 93. *Vide* § 30 and 44.]

Lesson 93.—THE SUBJUNCTIVE. II.—PAST.

Μά θυαίτ (A) Πάσπισ Σεζάν, το ζοίτ (A) Σεζάν
 Όά mbυαίτεαό (B) Πάσπισ Σεζάν, το ζοίτρεαό (C) Σεζάν.

211. In this lesson are given examples of three moods, the Indicative (A), the Subjunctive Past (B.), and the Conditional (C.)

A condition is expressed in both A., (with μά...) and B., (with όά...). The part of the sentence which contains the condition (A., μά θυαίτ P.S. ; or, B., Όά mbυαίτεαό P. S.), we may call the conditional or hypothetical clause (the *protasis*, i.e., something assumed before). The other (A., το ζοίτ Σεζάν ; or C., το ζοίτρεαό Σεζάν) is the main clause (the *apodosis*, i.e., something given as a result).

(A.) Here the verb is in the Indicative Mood in both parts of the sentence, because the supposition stated is assumed to be an actual fact, or to be very probable.

212. (B.) Here, the condition is assumed (a) *not* to be a fact ; or (b) to be improbable, or a pure supposition. The form of the verb used in the hypothetical clause is the **Subjunctive Mood Past**. The verb in the main clause is in the Conditional Mood.

213.	Person.	SINGULAR.	PLURAL.
	1st	όύναίνη.	όύναίμιρ.
	2nd	όύντά.	όύναό (ριό).
	3rd	όύναό.	όύναίσιρ.

214. Μά is followed by the Indicative. Όά in *protasis* is followed by the Subjunctive Past. The Subjunctive Past of τά has the same form as the condl., viz. :— βέαό. In "Όά mbέαό ριορ άζατ, το βέαό λειζεαρ άζατ," the first verb is Subj. Past and the second Cond. The Past-Hab. is θιοό. With this exception, the Subj. Past and the Past-Hab. of all verbs have the same form, but discharge quite different functions. The Subj. Past of the Copula is βαό, which is also the form of the Cond.

215. The form of the Cond. Mood is frequently used instead of the Subj. Past, e.g., όά οτιορεαό, όά ζεπιυνηόέαό, instead of όά οταζαό, όά ζεπιυνηζεαό. The student is, however, recommended to use the Subj. Past, the more correct form, with όά in *protasis*, and to reserve the Cond. for *apodosis*.

THE AUTONOMOUS FORM. (A) REGULAR VERBS.

Lesson 94. (I).—PAST INDICATIVE.

Ἦο ὀύνηαὸ ἀη ὀοηαη.

216. (The sentences in the lesson describe certain actions which took place yesterday in the school and shop. Who performed these actions? We are not told: *the subject is not mentioned in these sentences.* The verb in Irish has a special form for this purpose. Ἦο ὀύνηαὸ, etc., are examples of this form in the past tense).

As the subject is completely suppressed in such sentences, this form of the verb has neither number nor person, in any of its moods or tenses. It can stand alone, and thus make a complete sentence by itself, and hence it has been called by ἀη τ-ἀέαιη ῤεαὸαιη ὀ λαοξάηηε (who has given much prominence to this form in his grammatical contributions) the **Autonomous Form**: in Irish, ἀη ὀηηαέαιη Ḃαοηη, because the Auton. Verb is *free* from denotation of number and person. The subject, though not expressed, is, generally, felt to be a *personal* subject (somebody, we, they, people, etc.)

All verbs, transitive and intransitive, (except ἦη, which is simply a copula) have this form. The noun or pronoun following the Autonomous Form is in the accusative case. (Ἦο ὀύνηαὸ ἔ).

217. **Pron.** The ending of the Auton. Past, viz., -(e)αὸ added to the stem of the verb, is variously pronounced; e.g., in ὀύνηαὸ:—

as -uʒ in the Decies, E. and Mid. Cork, and Clare, *i.e.*, ὀύνηuʒ.

as -uv in W. and S.W. Cork, and South Con., *i.e.*, ὀύνηuv.

as -uē in Kerry, *i.e.*, ὀύνηuē.

as -ū (unstressed) in North Con. and U., *i.e.*, ὀύνηū.

The initial con. of the autonomous form, in all moods and tenses, is not usually aspd. (except in the Decies and a few other districts, where aspn. is the rule). After ὀο and all the compounds of ῤο (ηδῤη, etc.), η- appears before an initial vowel (ηἦοη η-οηέαιαὸ, usually pronounced as if spelled η-οηέαιαὸξεαὸ; *vide* § 10 as to verbs lending in ηλ, ημ, ην, ἦη, ἦη, and ηξ). Ἦο is frequently omitted.

Lesson 95.—(II). FUT., PRES.-HAB. and PAST-HAB. TENSES.

218. The endings for these tenses are:— η-(e)αηη, -(e)ὀέέαηη (fut.); η-(e)αηη (pres.-hab.); ηαοηη or ηίη (past-hab.)

219. **Pron.** In M., the fut. ending of 2nd conj. verbs is pronounced -ὀηαηη, and of all other verbs, ηαηη. Outside of M., the η- is usually pronounced. η- and -(e)ὀέέαηη is pronounced. -ὀηαηη (ὀ unstressed.) In parts of C., the older fut. form in η-(α)ἦὀηαηη is used.

* Usually in M., η- is broad in pres.-hab., and past-hab., and is not aspd., *i.e.*, ηαηη; ηαοηη (Cork, ηίη.) Elsewhere, as a rule, the law ααοηη ηε ααοηη is followed, and the η- is aspd. as in the verbal adjective (Less. 11). After ηί, the initial con. is not, as a rule, aspd., and η- appears before initial vowels. Note that the initial con. of a verb in the auton. form is liable to eclipsis, as in § 200.

Lesson 96.—(III.) SUBJ., CONDL. and IMPER. MOODS.

220. The ending in Pres. Subj. and Imper. is the same as in the Pres. Indic., viz., $-\tau(\epsilon)\Delta\eta$; and the ending of the Past Subj. is the same as in the Past-Hab., viz., $-\tau\Delta\omicron\iota$, or $-\tau\acute{\iota}$. The notes on the pron. of the $-\tau$ - of these endings given above in § 219 apply here also.

The ending for the Condl. is $-\rho(\lambda)\iota\theta\epsilon$; or $-(\epsilon)\acute{\omicron}\acute{\epsilon}\tau\Delta\omicron\iota$.

221. Pron. In M., these Condl. endings are prond., respectively, $-\rho\Delta\omicron\iota$ (Cork, $-\rho\acute{\iota}$); $\acute{\omicron}\rho\Delta\omicron\iota$ (Cork, $\acute{\omicron}\rho\acute{\iota}$). In other words, in M., there is an $-\rho$ - sound in the fut. and condl. autonomous of all verbs, the $-\rho$ - being always broad in the fut., but broad or slender in the condl. Vide § 47. Outside of M., the $-\rho$ - is usually prond. n -, and $-\acute{\omicron}\acute{\epsilon}\tau\Delta\omicron\iota$ is prond. $-\acute{\omicron}\eta\Delta\omicron\iota$.

Lesson 97.—(IV.) $\Delta\tau\acute{\alpha}\tau\alpha\rho$.

222. The autonomous forms of all the tenses and moods of this verb are given in the lesson).

223. Pron. The initial cons., ρ and b , of these forms are usually aspd. after $\eta\acute{\iota}$, $\omicron\omicron$, or $m\acute{\alpha}$. In M., $-\rho$ - is prond. in the fut. and condl. forms, viz., $-\rho\Delta\eta$, $-\rho(\lambda)\iota\theta\epsilon$. In C. and U., the following are the usual forms: $\beta\acute{\iota}\tau\acute{\iota}$ ($\beta\acute{\iota}\tau\acute{\iota}$, M.); $\beta\acute{\iota}\tau\epsilon\Delta\eta$ ($\beta\acute{\iota}\tau\Delta\eta$, M.); $\beta\epsilon\acute{\iota}\tau\epsilon\Delta\eta$ ($\beta\epsilon\acute{\rho}\Delta\eta$, M); $\beta\epsilon\acute{\iota}\tau\acute{\iota}$ ($\beta\epsilon\acute{\rho}\Delta\eta\theta\epsilon$, M., but $\beta\epsilon\acute{\rho}\rho\theta\epsilon$, in Cork). There is a large variety of these forms in colloquial use

Lesson 98.—(V.) VOICE.

224. When (a) the subject is the actor (or agent) the verb is in the active voice, as:—

$\Delta\omicron$ $\rho\epsilon\rho\acute{\iota}\omicron\beta$ $\tau\Delta\omicron\varsigma$ $\Delta\eta$ $\lambda\acute{\iota}\tau\eta\rho$ $\rho\eta\eta$.
 $\Delta\omicron$ $\rho\epsilon\rho\acute{\iota}\omicron\beta\Delta\acute{\omicron}$ Δ $\lambda\acute{\alpha}\eta$ $\lambda\acute{\iota}\tau\eta\epsilon\Delta\acute{\alpha}$ $\Delta\eta\eta\rho\omicron$ $\acute{\iota}$ $\eta\acute{\omicron}\acute{\epsilon}$.
 $\tau\acute{\alpha}\tau\Delta\eta$ $\Delta\varsigma$ $\beta\upsilon\alpha\lambda\Delta\acute{\omicron}$.

225. When (b) the subject of the verb represents the object of the action, we have the passive voice, as in the passive phrases of the following sentences:—

$\Delta\omicron$ $\beta\acute{\iota}$ $\lambda\acute{\iota}\tau\eta\rho$ $\Delta\varsigma$ $\tau\Delta\omicron\varsigma$ $\omicron'\acute{\alpha}$ $\rho\epsilon\rho\acute{\iota}\omicron\beta\Delta\acute{\omicron}$ $\eta\upsilon\alpha\eta\rho$...
 $\Delta\omicron$ $\beta\acute{\iota}$ $\Delta\eta$ $\lambda\acute{\iota}\tau\eta\rho$ $\rho\epsilon\rho\acute{\iota}\omicron\beta\acute{\epsilon}\Delta\acute{\omicron}$ $\Delta\iota\varsigma\epsilon$ $\eta\upsilon\alpha\eta\rho$...
 $\tau\acute{\alpha}\tau\Delta\eta$ $\rho\acute{\epsilon}$ $\beta\upsilon\alpha\lambda\Delta\acute{\omicron}$.

The autonomous verbs in (a) and (b) include the subject.

226. There are, also, instances of an impersonal active verb with passive meaning, or "middle voice," as:—

" $\Delta\omicron$ $\acute{\omicron}\epsilon\eta\eta$ $\epsilon\lambda\omicron\acute{\epsilon}\Delta\acute{\omicron}$ $\acute{\omicron}\acute{\iota}\omicron\beta$." " $\Delta\omicron$ $\xi\epsilon\alpha\tau$ $\Delta\eta$ $\rho\rho\epsilon\acute{\iota}\rho$."

(Lessons 99, 100.—(VI.) (B) IRREGULAR VERBS.

227. These lessons give the autonomous forms, in all the moods and tenses, of the irregular verbs.

Note that the auton. endings of these verbs are, generally, the same as the corresponding endings of the regular verbs. Cf. the ordinary forms of the irregular verbs in Lessons 42 to 50.

Pron. The colloquial variants of the irregular verbs, as given in notes to Lessons 42 to 47, apply also to the corresponding forms of the same verbs in Lessons 99 and 100).

APPENDIX.

Notes on the Formation of the Irregular Verbs.⁽¹⁾

228. The forms of the Irregular Verbs, which are so puzzling to students, are by no means arbitrary, but rather admit of interesting explanation. An inspection of these forms shows that they do not conform with the usual manner of verbal inflexion in two respects:—

I. In Tense or Mood formation.

E.g., *cuir*; *past*: *ṽo cuir*—regular;
but *beir*; *past*: *ruṽ*—irregular.

II. Some verbs have Double Forms in the same tense or mood.

E.g., *Past*: *ṽo bí*; but, *ní raib*, *an raib* ?
Condl.: *ṽo-círeab*; but, *ní feicreab*.

229. These irregularities are due to the following causes:—

A. *DIFFERENT ROOTS*. The forms of a verb used to express a difference in tense or mood are sometimes derived from different roots.

E.g., *beireab* from *ber*, but *ruṽ* from *ugg*.

B. *CHANGE IN STRESS*. The double forms of a verb in the same tense or mood are chiefly caused by a change in voice stress from one syllable of a verb to the preceding syllable.

Note, as an illustration of *change* in stress, the weaker pronunciation of the second part of the compound in the following pairs of words:—

Day, Monday; *man, Frenchman*; *ways, always*.

230. In Irish, change in stress occurs in the case of most compound verbs, *i.e.*, verbs composed of a root and a prefix such as *ṽo*-⁽²⁾*cuaid*, *ṽo-beir*: *ṽo*-, in these, being the prefix. Compound verbs, whose composite nature is, to some extent, still felt, are subject to stress change when preceded by any of the following:—*an, ní, éa, cá, ṽo, ná, ná, muna, dá*, or by the *dative relative, or compound relative* (Lesson 86). *An, ní, ṽo*, etc., are not emphasised in speaking, but are usually pronounced weakly. Each of these *leans forward* (and hence is termed a *PROCLITIC*) on the following word, to which it is attached as an unstressed syllable. Consequently,

(1) This appendix may, in the case of young students, be postponed until the book is being studied a second time. The more difficult matter, which is given in small type at bottom of pages, is intended for advanced students.

(2) The prefix *ṽo*- in such cases has long been an integral part of the word. It must not be confounded with the particle *ṽo* which appears in the regular *past, past-hab., and condl.*, (e.g., *ṽo buair, ṽo buaireab, ṽo buaireab*). In compound verbs the hyphen is sometimes not used, as, *ṽocuaid, ṽobeir*.

voice stress on the second syllable of each of the verbs above referred to is, under the influence of a proclitic, placed on the preceding syllable.

E.g., in the $\text{oo-}\acute{\text{cu}}\text{a}\text{i}\acute{\text{o}}$, the stress is on the 2nd syllable, but in [$(^1)$ $\text{nac}\text{o}\text{e}(\Delta)\acute{\text{c}}\text{a}\text{i}\acute{\text{o}}$] (2) $\text{-}\text{o}\text{e}\Delta\acute{\text{c}}\text{a}\text{i}\acute{\text{o}}$, it is, owing to the influence of nac , transferred to the 1st syllable (originally oe) of the verb. The weak proclitic nac , leaning on the 1st syllable, causes this syllable to be stressed accordingly, i.e., strengthened to give the necessary support to the proclitic, nac . This is in accordance with the alternation of weak and strong stress, characteristic of Irish, and of English. Note the pronunciation of 'fantastic,' in which the stress of the 1st syllable is *weak*; that of the 2nd, *strong*; and of the 3rd, *weak* again. In $\text{nac}\text{o}\text{e}\Delta\acute{\text{c}}\text{a}\text{i}\acute{\text{o}}$ there is a similar alternation of *weak*, *strong*, and *weak*: the original root syllable ($\text{cu}\text{a}\text{i}\acute{\text{o}}$), yielding to the stressed or strengthened prefix. The most weakly accented syllable is that immediately following the strong stress (-tic , $\text{-c}\text{a}\text{i}\acute{\text{o}}$).

231. The form $\text{-}\text{o}\text{e}\Delta\acute{\text{c}}\text{a}\text{i}\acute{\text{o}}$ is called the *PROTOTONIC FORM*, because the stress is, as shown by the arrow, on the *first* syllable, $\text{o}\text{e}\Delta\acute{\text{c}}\text{a}\text{i}\acute{\text{o}}$, $\text{oo-}\acute{\text{cu}}\text{a}\text{i}\acute{\text{o}}$ (or, $\text{oo}\acute{\text{c}}\text{u}\text{a}\text{i}\acute{\text{o}}$) is called the *DEUTEROTONIC FORM*, because the stress is on the *second* syll., $\text{oo}\acute{\text{c}}\text{u}\text{a}\text{i}\acute{\text{o}}$.

(o)

Each of the irregular verbs may now be considered in the light of the above general explanation. Forms derived from different roots are given under *A*. Those due to change in stress are classed under *B*. The examples (3) are from Keating's works. Different, or alternative, forms (equivalent in meaning) which are now in use colloquially, are given within square brackets. Forms marked *, as $\text{*}\text{be}\text{i}\text{r}\text{i}\text{m}$, are rarely found in recent writings.

232. I. $\text{be}\text{i}\text{r}\text{i}\text{m}$.

A.—From the root **ber** (to bring, take, etc. *Cf.*, *L.*, *fero*, *E.*, *bear*) are derived all forms of the verb, except the past:—

<i>Pres. Ind.</i> : $\text{*}\text{be}\text{i}\text{r}\text{i}\text{o}$, $\text{-}\text{be}\text{i}\text{r}\text{e}\text{a}\text{n}\text{n}$ [$\text{be}\text{i}\text{r}\text{e}\text{a}\text{n}\text{n}$].	<i>Pres. Subj.</i> : $\text{-}\text{be}\text{i}\text{r}\text{e}$.
<i>Past-Hab.</i> : $\text{be}\text{i}\text{r}\text{e}\Delta\acute{\text{o}}$ (4).	<i>Past Subj.</i> : $\text{-}\text{be}\text{i}\text{r}\text{e}\Delta\acute{\text{o}}$.
<i>Fut.</i> : $\text{b}\acute{\text{e}}\Delta\text{r}\Delta(\text{i}\text{o})$ [$\text{b}\acute{\text{e}}\Delta\text{r}\text{r}\Delta(\text{i}\text{o})$], <i>rel.</i> $\text{b}\acute{\text{e}}\Delta\text{r}\Delta\text{r}$.	
<i>Condl.</i> : $\text{b}\acute{\text{e}}\Delta\text{r}\Delta\acute{\text{o}}$ (4) [$\text{b}\acute{\text{e}}\Delta\text{r}\text{r}\Delta\acute{\text{o}}$].	

(1) nac is not followed by eclipsis of initial consonant of the verb in Keating's writings.

(2) - before a verb indicates that one of the proclitics mentioned at p. 182 (with resulting *aspn.* or *ecl.*) is understood.

(3) These examples are 3 *sing.*, and are arranged in the following order:—*pres. ind.*, *past-hab.*, *fut.*, *condl.*

The *past*, usually from a different root or special formation, is given apart from these. The *imper.* (2 *sing.*) and *verbal noun* are given in the summary at p. 191.

(4) For the sake of simplicity, the usual *aspn.* (or *ecl.*) of the initial consonant in the *past-habitual*, or *conditional*, is not marked in these notes.

The *Past*, $\mu\sigma\zeta$, is from a different root, viz., *ugg*: with prefix $\rho\sigma$ ($\rho\sigma\text{-}\sigma\zeta\text{-}$) $\mu\sigma\zeta$.

B.— $\beta\epsilon\iota\mu\mu$, being a simple verb (*i.e.*, the root *ber* is not, here, compounded with a prefix), there are no forms due to change of stress.

233. II. $\sigma\sigma\text{-}\beta\epsilon\iota\mu\mu$.

A.—The root *ber* above appears here in $\sigma\sigma\text{-}\beta\epsilon\iota\mu$, from which are derived the forms of this verb (*subjunctive* and *past indicative* excepted). The prefix should be written as (a) it shows the connexion between the deuterotonic and the prototonic forms, and (b) it changes the meaning of the root: *ber*—to take, but *do ber*—to give.

Pres. Ind.: $\sigma\sigma\text{-}\beta\epsilon\iota\mu$ [$\beta\epsilon\iota\mu\epsilon\alpha\eta\eta$, $\tau\zeta\alpha\eta\eta$].
Past-Hab.: $\sigma\sigma\text{-}\beta\epsilon\iota\mu\epsilon\alpha\theta$ [$\beta\epsilon\iota\mu\epsilon\alpha\theta$, $\tau\zeta\alpha\theta$].
Fut.: $\sigma\sigma\text{-}\beta\epsilon\alpha\mu\alpha(\iota\theta)$ [$\beta\epsilon\alpha\mu\mu\alpha\iota\theta$, $\tau\alpha\beta\alpha\mu\mu\alpha\iota\theta$].
Concl.: $\sigma\sigma\text{-}\beta\epsilon\alpha\mu\alpha\theta$ [$\beta\epsilon\alpha\mu\mu\alpha\theta$, $\tau\alpha\beta\alpha\mu\mu\alpha\theta$].

$\tau\zeta\sigma$, used in *subj.* and *past ind.*, is derived from the root *ugg* (1) (as in last verb) with prefix $\sigma\sigma$.

Past Ind.: $^*\tau\zeta\sigma$ [$\epsilon\tau\zeta\sigma$].
Pres. Subj.: $\text{-}\tau\zeta\sigma\alpha$.
Past Subj.: $\text{-}\tau\zeta\sigma\alpha\theta$.

B.— $\sigma\sigma\beta\epsilon\iota\mu$ (2), with stress of voice on 2nd syllable, becomes after a proclitic, e.g., $\eta\alpha\epsilon$ ($\eta\alpha\epsilon\tau\alpha\beta\alpha\mu\mu$ (3)), $\text{-}\tau\alpha\beta\alpha\mu$, with stress on 1st syllable.

Prototonic forms are:—

Pres. Ind.: $\text{-}\tau\alpha\beta\alpha\mu$ [$\text{-}\tau\zeta\sigma\alpha\eta\eta$].
Past-Hab.: $\text{-}\tau\alpha\beta\mu\alpha\theta$ [$\text{-}\tau\zeta\sigma\alpha\theta$].

and, from $\sigma\sigma\text{-}\beta\epsilon\alpha\mu\alpha$ with the usual stress retraction after a proclitic,

Fut.: $\text{-}\tau\iota\upsilon\beta\mu\alpha$ (O.Ir., $\tau\iota\beta\acute{\epsilon}\mu\alpha$) [$\text{-}\tau\iota\upsilon\beta\mu\alpha\iota\theta$, $\text{-}\tau\alpha\beta\alpha\mu\mu\alpha\iota\theta$ (4) (M.)]
Concl.: $\text{-}\tau\iota\upsilon\beta\mu\alpha\theta$ [$\text{-}\tau\alpha\beta\alpha\mu\mu\alpha\theta$ (4) (M.)]

(1) Note that different roots (*e.g.*, *ber* and *ugg*) obviate the possible confusion between forms of different verbs (*e.g.*, of some forms of $\beta\epsilon\iota\mu\mu$ with those of $\sigma\sigma\text{-}\beta\epsilon\iota\mu\mu$). In O. Ir., the *spelling* is "ucc."

(2) Capitals show the syll. which has the strong stress.

(3) The prefix ($\sigma\sigma$, orig.) in $\tau\alpha\beta\alpha\mu$ becomes $\sigma\sigma$ when pretonic, *i.e.*, before a stressed syllable, as $\sigma\sigma\text{-}\beta\epsilon\iota\mu$ (*Cf.*, $\tau\acute{\alpha}\tau\alpha\mu$, τ ' (not $\sigma\sigma$), because immediately before a stressed vowel with $\sigma\sigma$ $\eta\alpha\epsilon\alpha\mu$: $\sigma\sigma$, because not immediately before a stressed vowel). Generally, the prototonic form of a compound verb shows the original form of the prefix $\sigma\sigma\text{-}$. *E.g.*, $\text{-}\beta\epsilon\alpha\epsilon\alpha\iota\theta$, and $\text{-}\beta\epsilon\alpha\mu\mu\alpha$, show that the prefix in these verbs was originally $\sigma\sigma$.

(4) Or rather, $\tau\iota\upsilon\beta\mu\alpha\theta$, $\tau\iota\beta\mu\alpha\theta$: the τ (of $\tau\iota\upsilon\beta\mu\text{-}$) has been broadened on analogy of τ in $\tau\alpha\beta\alpha\mu$, and the ρ inserted on analogy of ρ future verbs.

A.—From the root **ber** are also derived the parts of ΔΟΥΡΙΜ. With prefix ΔΡ (out of) we get the verbal stem ΔΡ-βερ (to say), and, later, ΔΟΥΡ(¹), ΔΟΥΙΡ.

From ΔΟΥΙΡ are the forms:—

Pres. Ind. : ΔΟΥΙΡ [ουίρ].

Past-Hab. : ΔΟΥΙΡΕΑΘ [ουίρεαθ].

In the fut. (²) and condl., the forms are:—

Fut. : ΔΟΥΕΡΑ [ουέραραθ].

Condl. : ΔΟΥΕΡΑΘ [ουέραραθ].

The verbal noun ΡΑΘ is from the same root as the (nearly obsolete) verb ΟΟ ΡΑΘ (ρε) — (he) said.

B.—After a proclitic, the form of the verbal stem is -ΔΒΑΙΡ, with stress on first Δ (*i.e.* of prefix). Hence:—

Pres. Ind. : -ΔΒΑΙΡ [-ουίρ].

Pres. Subj. : -ΔΒΡΑ.

Past-Hab. : -ΔΒΡΑΘ [-ουίρεαθ].

Past Subj. : -ΔΒΡΑΘ.

Fut. : * -ΔΙΒΕΘΡΑΘ (³) (O.Ir., ερέρα) [-ΔΒΡΟΘΑΘ, -ουέραραθ].

Condl. : * -ΔΙΒΕΘΡΑΘ [-ΔΒΡΟΘΑΘ, -ουέραραθ].

ΔΟΥΘΑΙΡΤ. In this form (occurring, as *perfect tense*, in O.Ir. as ΔΡΡΟΥΘΑΙΡΤ, in Mid.Ir. as ΔΡΡΟΥΘΑΙΡΤ, and later as ΔΘΡΟΥΘΑΙΡΤ (⁴) the stress is, under the influence of the weakly-accented prefix, placed on the 2nd syllable (ου). After Δη, νί, etc., the prefix is dropped, giving the prototonic form -ΟΥΘΑΙΡΤ, which is also, relative clauses excepted, now colloquially used instead of the deuterotonic ΔΟΥΘΑΙΡΤ.

(1) ΔΟΥΙΡ from Δ(ο)—ο—βερ, the ο being a fossilized infixed *pronoun* (3 *sing.*, *neuter*, *accusative*: "says *it*") and hence *asp.* following *con.*, *b.* The forms with infixed *pron.* have supplanted the older forms without infixed *pron.*

(2) The long é in the fut. and condl. of βεριμ, ο-βεριμ, and ΔΟΥΙΡΙΜ is due to reduplication of βε of βερ; as, βε-βρ, βέρ, βέρ. In the fut. of ΔΟΥΙΡΙΜ, the initial *con.* of the root is *aspd.*, as above, after the infixed *pron.*, ο. Hence, Δο-ο-βέρ, ΔΟΥΙΡ, ΔΟΥΕΡ.

(3) In Keating, verbal stems of more than one syllable ending in slender *l*, *m*, *n*, *μ*, *νς*, or *r* took εó in the fut. before the final consonant of the stem.

E.g., stems: *con.*αίτ, ΔΒΑΙΡ, *inn.*ρ.

Fut.: *sg.*, *I.*, *con.*εóλαθ, ΔΙΒΕΘΡΑΘ, *inn.*εóραθ.

*inn.*εóραθ is still in use in *M.*, but in *C.* and *U.* it has, on the analogy of other verbs, become *inn.*εóαθ; whilst the form ο'ΑΙΤΡΕΘΡΑΙΝ, extant in *C.*, has, similarly, become ο'ΑΙΤΡΕΘ(έ)ΑΙΝ in *M.*

This ó (δó) was, at an earlier stage, é. *Cf.* ερέρα, ζέαδα, ο-ζέαδα in which the vowel of the fut. inflexion is now ó.

(4) The form is derived as follows:—prefix + infixed *pron.* ο (as in ΔΟΥΙΡ) + ηο or ηυ (a particle used with *perf.* tense) + root βερ (β becoming *aspd.* between vowels) + τ an inflexion of certain verbs for the preterite in O.Ir. *i.e.*, Δ(ο)—ο—ηυ—βερ—τ, ΔΡΡΟΥΘΑΙΡΤ, ΔΟΥΘΑΙΡΤ, the loss of η (of ηυ) being due to the analogy of ΔΟΥΙΡ helped by the fact that the particle ηο, ηυ, was going out of use and ΟΟ taking its place.

235. IV. ἄραμαι.

A.—This verb, which is conjugated regularly except in the *fut.* and *condl.*, is derived from the root *gab* (to accept, receive, seize).

Fut.: *ἄραμα(ιὸ) [ἄραμαι].

Condl.: *ἄραμα(ι) [ἄραμα].

B.—As ἄραμαι is not a compound verb, there are no deuterotonic forms. Cf. *beipim*.

236. V. ὄραμαι.

A.—The compound verb ὄραμαι⁽²⁾ is from the root *gab*, and appears in the following deuterotonic forms:—

Pres. Ind.: ὄραμαι [ἄραμαι, ἄραμαι].

Past-Hab.: ὄραμασθε [ἄραμασθε].

Fut.: ὄραμα(ιὸ) [ἄραμαι].

Condl.: ὄραμασθε [ἄραμασθε].

The *Past*, *ραμαι*, is from a different root.

B.—In prototonic forms, the prefix used is *ro-* (not *oo-*). *ρο-ἄραμα* owing to change in stress, e.g., *ναρφαρσθ* (—*ναρ φαρσθ*), becomes *-φαρσθ*, now usually *-φασθ*, *-φαισθ* (M.), or *φασθ* (C., U.) Hence:—

Pres. Ind.: *-φασθαι* [*-φασθαι*].

Pres. Subj.: *-φασθα*.

Past-Hab.: *-φασθασθε* [*-φασθασθε*].

Past Subj.: *-φασθασθε*.

In *fut.* and *condl.*, there is, after *an*, *ναρ*, etc., the usual change in stress: *ρο-ἄραμα* becomes (e.g., *ναρφο(ι)σθε* —) *-φαισθε*. Hence:—

Fut.: *-φαισθε* [*-φαισθε(ι)*].

Condl.: *-φαισθασθε* [*-φαισθασθε(ι)*].

(1) The 2 *sing. condl.* (*ἄραμα*), *fut. auton.* (*ἄραμαι*), and *condl. auton.* (*ἄραμαι*) of this verb are (in M.) *prond.*, respectively, *ἄραμα*, *ἄραμαι*, and *ἄραμαι* (or *ἄραμαι*). To the analogy of the *-r-* in the pronunciation of these words, may (according to Dr. Bergin. *Eriu*, II., 38) be traced the *-r-* which has forced its way into the (M.) pronunciation of these three forms in all verbs, reg. and irreg. Hence the colloquial double forms (i.e., *-ó-* and *-r-*) in 2nd conj. verbs, e.g., *ορτόρα*, *ορτόραμαι*, and *ορτόρα* (or *-ραοι*). As regards 1st conj. verbs, it should also be noted that if the ending of the 2 *sing. condl.* were *prond.* *há* or *heá*, a probable result would be the confusion of this form (e.g. *ὄραμα*) with the 2 *sing. past hab.* (*ὄραμασθε*).

(2) "Mid. Ir. *ἄραμαι* is probably modelled on *beipim* on the analogy of the future *ἄραμασθε* and *ἄραμασθε*. So the compound *ρο-ἄραμαι* becomes *ρο-ἄραμαι* and *ὄραμα* after *ὄραμα*." BERGIN. *Eriu*, III., 75.

(3) In M., the *-αισθ-* of these forms is (analogically) *prond.* like the *-ασθ-* of *φασθαι*, and *φασθασθε*.

From the root *gab* are also derived the verbal stems, *ῑḁḡ, ῑḁḡ,* *congḁḁ.* These are now conjugated regularly as simple verbs, their composite character being no longer felt. A summary of some of the forms of these five verbs is given:—

DERIVATION.	IMPERATIVE.	PAST.	VERBAL NOUN.
<i>gab</i>	ḡḁḁ	ḁḁ ḡḁḁ	ḡḁḁḁḁ
<i>fo-gab</i>	ῑḁḡ(ḁḁḁ)		ῑḁḡḁḁḁ
<i>fo-aḁ-gab</i>	ῑḁḡ(ḁḁḁ)	ḁ'ῑḁḡ(ḁḁḁ)	ῑḁḡḁḁḁ
<i>to-oḁ-gab</i>	ῑḁḡ(ḁḁḁ)	ḁḁ ῑḁḡ(ḁḁḁ)	ῑḁḡḁḁḁ
<i>con-gab</i>	congḁḁḁ	ḁḁ congḁḁḁ	congḁḁḁḁ

Forms now in use are: *ḡḁḁ* (M.), *ḡḁḁ*; *ῑḁḡ, ῑḁḡ, ῑḁḡ, ῑḁḡ*; *congḁḁḁ, congḁḁḁ, etc.*; *ḁ'ῑḁḡḁḁḁ* (C.), *ḁ'ῑḁḡ.* The *ḁ* of the root is now frequently omitted from all forms, except those from *ḡḁḁ.* *ῑḁḡḁḁḁ* and *ῑḁḡḁḁḁ* are also used colloquially.

237. VI. ḁḁ-ḡḁḁ (ḁḁ-nḁḁ).

The root is *ḡḁḁ* (to act; *cf.*, *ḡḁḁḁḁ*) always with a prefix (*ḁḁ*, originally *ḁḁ*), *ḁ* (of prefix) and *n* (of root) occur in all forms of the verb.

DEUTEROTONIC FORMS (with prefix *ḁḁ-*) are:—

Pres. Ind.: *ḁḁ-ḡḁḁ* or *ḁḁ-nḁḁ* [*ḁḁḁḁḁḁḁ, ḁḁḁḁḁḁḁ*].

Past-Hab.: *ḁḁ-ḡḁḁḁḁ* or *ḁḁ-nḁḁḁḁ* [*ḁḁḁḁḁḁḁ, ḁḁḁḁḁḁḁ*].

Fut.: *ḁḁ-ḡḁḁḁḁ* ⁽¹⁾ [*ḁḁḁḁḁḁḁ*].

Condl.: *ḁḁ-ḡḁḁḁḁḁ* ⁽¹⁾ [*ḁḁḁḁḁḁḁ*].

Past: *ḁḁ-ḡḁḁḁḁ* or *ḁḁ-ḡḁḁḁḁ* [*ḁḁḁḁḁḁḁ, ḁḁḁḁḁḁḁ*].

In this form (*perfect* originally) the particle *ḁḁ* is infixed (as *ḡḁḁ*) between the prefix and root, and the voice stress is, consequently, on the 2nd syllable, R1.

(1.) Of the two chief classes of Mod. Ir. *futs.*, viz., (I.) *-ó-* (or *-óḁ-*) and (II.) *-ῑ-*, the former, *-ó-* was an *é fut.* or *reduplicated fut.* The long vowel of *ḁḁ-ḡḁḁḁḁ* is due to a repetition, or prefixing, of the 1st syll. of the root: *ḡḁḁ* from *ḡḁ-ḡḁḁ*. The latter (*-ῑ-*) was a *-b fut.*, the *b* changing into *ῑ* which is, in turn, now pron. *h*. The modern pron. of *-ḡ-* in *ḁḁḁḁḁḁ, ḁḁ-ḁḁḁḁḁḁ, ḁḁḁḁḁḁḁ*, viz., *ḡḁ*, is on the analogy of the *h* of the *-ῑ fut.*, and hence these are frequently written with *-ḡῑ-*, as *ḁḁḁḁḁḁḁ*, etc. Similarly, the pron. *-nh-* (written *-ḡῑ-*) in the *fut.* of *ḁḁ-ḡḁḁḁḁ*.

PROTOTONIC FORMS (with original prefix *ue-*) are:—

Past: -*uearua*(*ro*) [-*uinne*, -*uinn*, -*uén*].

uorinne, with stress on 2nd syllable, becomes, when preceded by a proclitic, e.g., *naé* (*naé'uear'ne-*), -*uearua*, with stress on 1st syllable.

Pres. Ind.: -*uén* [-*uéimeann*, -*uéanann*].

Past-Hab.: -*uéimead* [-*uéanad*].

-*uén* (or -*uéan*), derived under the usual influence of a proclitic (-*ue-én'*) is, in M., usually treated as the stem of a regularly conjugated verb.

Fut.: -**uingsne* [-*uéanraio*].

Condl.: -**uionsnao* [-*uéanrao*].

-*uéanr*—, a simple *fut.* and *concl.* stem from the prototonic *uéan*— is now used instead of the other forms (*).

Pres. Subj.: -*uéana*.

Past Subj.: -*uéanad*.

238. VII. *uo-cluinnim*.

A.—From the root *clu* (to hear; cf., *cluair*, *clú*) is derived *cluin*, which is used regularly as a stem for all the parts of this verb, except the following, viz.:—

Past: *uo-cluala*(*ro*) (¹) [*clualaró*].

A regular conjugation from the stem *cluir* (*past*, both *cluala* and *cluirair*) is in use in M.

B.—The stress is always on the root syllable. When preceded by *ní*, *an*, etc., the prefix is omitted, -*cluin*, -*clual*.

239. VIII. *uo-cíim* (*uo-cím*).

A.—From *uo-cí* or *uo-cí* (to see, but root in earlier writings always with prefix) are:—

Pres. Ind.: *uo-cí*, *ac-cí*, or *uo-cí* [*cióinn*, '*tcí*].

Past-Hab.: *uo-cíod* [*ciód*, '*tcíod*].

Fut.: *uo-cípe* [*cípeó*, '*tcípeó*].

Condl.: *uo-cípead* [*cípead*, '*tcípead*].

(1.) A reduplicated *perfect* stem derived from *clu* (viz., *co-cl* giving -*clual*). The ending -*ro* is modern, on the analogy of *uo-clualó*. Cf. -*ueannaró* (occasionally) instead of -*uearua*.

From the root *dere* (-to look; *cf.*, modern *deairc*), with infix *con*, is derived a form for the *past tense* (*doconoidairc*, 3 *sg. perf.*):—

do(*do* or *de*)-**connairc*, *do-connaic* (1) [*connaic*].

B.—*do*-C1, with stress on C1, becomes -*aic*(*c*) after a particle; *e.g.*, after *ní*, with stress on 1st syllable, *ní doC1*, — *ní aC1* by assimilation. Owing to influence of final *i*, the guttural is slender (*aicc1*), and the final vowel, being unstressed, is lost; hence the prototonic stem -*aic*(*c*). To this stem an *f* is now prefixed (-*faic*). The *f* is analogical: as, *e.g.*, *fásaim*, *ní fásaim*, so *ní aicim* was supposed to be the neg. of *faicim*. *Cf.* *forcait*, in C. and U., instead of *orcait*; and *fanaim* instead of the earlier *anaim*.

Pres. Ind.: **-faiceann* [-*faiceann*]

Past-Hab.: **-faicead* [-*faicead*].

Fut.: **-faicfid* [-*faicfid*].

Condt.: **-faicfead* [-*faicfead*].

The prototonic form in the *past* is, historically, -*acca*(²), *e.g.*, *ní acca*, but later *ní faca*(²), *f* being inserted by analogy as in *faic*.

Pres. Subj.: **-faice* [-*faice*].

Past Subj.: **-faicead* [-*faicead*].

240. IX. *téigim*.

A.—The forms of this verb are from many roots.

From *tias*, *tés* (O. Ir. *tiasu*, 'I go,' *tési*, 'you go,') are the forms of the *pres.* and *past-hab.*, except

the 3 *sg. pres.*, which is, historically, *téio* (O. Ir., *téit*, 'goes,') *téio* (or *téio*) still survives in parts of Ulster, but the more general form now is *téigeann* (*ré*) on the analogy of *téigim*, etc., *Past-Hab.*: *téigead*.

Imper. sg. 2: *éiuig* (which has the form of the *imper.* of *éiuigim*, but the meaning of O. Ir., *eiugis*, 'go,') Other forms of the *imper.* are: *téig* [*téigir*, *téiuig*].

(1.) *do* (or *do*)-*connaic* is from the perfect *do-con-oidairc*, later (with infixed neuter pron.) *de-conoidairc*, and *do-connairc* (*nn* from *no*). The loss of *n* is due (a) to analogy with the prototonic -*acca*: *ní acca*, *co n-acca* (-*so b'acca*); and (b) in the plu. forms, the *n* frequently disappeared. *E.g.*, *de-conn(n)caidairc*, *do-connaidairc*, which, with helping vowel between *n* and *c*, became *do* (or *de*) -*connaic-oidairc*. *do-connaic* as 1 sing., *do-connaic* as 3 sing.: *cf.* *do-connaic* and *do-connaic*, *tánaid* and *táinig*, *doibairc* and *doibairc*. The forms *do-connaic* and *do-connaic*, with same meaning, long existed together.

(2.) O. Ir., -*accae* the prototonic reduplicated past (from *ad-sechae*).

(3.) -*peaca* in M., owing to influence of slender *f* in *faic*.

In the *fut.* and *condl.*, the stem is $\mu\alpha\zeta\text{-}$ or $\mu\alpha\acute{\sigma}\text{-}$, as:—

$\mu\alpha\zeta\alpha\iota\acute{\omicron}$ (M.) and $\mu\alpha\acute{\sigma}\alpha\iota\acute{\omicron}$ ⁽¹⁾; $\mu\alpha\zeta\alpha\acute{\omicron}$ (M.) and $\mu\alpha\acute{\sigma}\alpha\acute{\omicron}$ ⁽¹⁾.
(O. Ir., $\mu\epsilon\zeta\alpha\iota\acute{\omicron}$ O. Ir., $\mu\omicron\mu\zeta\alpha\acute{\omicron}$).

Past: $\mu\omicron\text{-}\acute{\sigma}\alpha\iota\acute{\omicron}$, $\mu\omicron\acute{\sigma}\alpha\iota\acute{\omicron}$ [$\acute{\sigma}\alpha\iota\acute{\omicron}$].

Pres. Subj.: $\text{-}\acute{\tau}\epsilon\iota\zeta\epsilon$.

Past Subj.: $\text{-}\acute{\tau}\epsilon\iota\zeta\epsilon\alpha\acute{\omicron}$.

B.—When preceded by a proclitic, $\mu\omicron\text{-}\acute{\sigma}\alpha\iota\acute{\omicron}$ (stress on $\acute{\sigma}$) becomes $\text{-}\mu\omicron\epsilon\alpha\acute{\sigma}\alpha\iota\acute{\omicron}$ (with stress on 1st syll., $\mu\omicron$ being the original form of the prefix).

$\text{-}\mu\omicron\epsilon\alpha\acute{\sigma}\alpha\iota\acute{\omicron}$ ⁽²⁾ [$\text{-}\mu\omicron\epsilon\alpha\zeta\alpha\iota\acute{\omicron}$ ⁽¹⁾ and $\text{-}\acute{\sigma}\alpha\iota\acute{\omicron}$ (M.)]

241. X. $\tau\iota\zeta\iota\mu$.

From the root *igg* ('to come') are derived all parts of this verb. With prefix $\mu\omicron\text{-}$, it becomes $\tau\iota\zeta$, the stem for *pres.* and *past-hab.*

(a) *Pres. Ind.*: $\tau\iota\zeta$ [$\tau\iota\zeta\epsilon\alpha\mu\mu$, $\tau\alpha\zeta\alpha\mu\mu$],

Past-Hab.: $\tau\iota\zeta\epsilon\alpha\acute{\omicron}$ [$\tau\alpha\zeta\alpha\acute{\omicron}$],

and also for *imper.* (except 2 *sg.*), *viz.*, $\tau\iota\zeta\epsilon\alpha\acute{\omicron}$, etc. [$\tau\alpha\zeta\alpha\acute{\omicron}$, etc.]

(b) The *imper.* 2 *sg.* is $\tau\alpha\mu$, $\tau\alpha\mu\mu\alpha$, or $\tau\alpha\mu$ (from $\mu\omicron\text{-}\alpha\iota\mu\text{-}\iota\zeta\zeta$), the root, *igg*, being lost.

(c) The *past* is formed from $\mu\omicron\text{-}\acute{\alpha}\mu\text{-}\iota\zeta\zeta$.

$\tau\acute{\alpha}\mu\iota\zeta$ ⁽³⁾ [$\acute{\epsilon}\acute{\alpha}\mu\iota\zeta$, $\acute{\epsilon}\acute{\alpha}\mu\iota\epsilon$, $\acute{\epsilon}\acute{\alpha}\mu\iota\epsilon$].

(d) In the *fut.* and *condl.*, the stem is $\tau\iota\omicron\sigma\tau\text{-}$, as:—

$\tau\iota\omicron\sigma\tau\alpha\iota\acute{\omicron}$, $\tau\iota\omicron\sigma\tau\alpha\acute{\omicron}$. *Fut. rel.*: $\acute{\tau}\iota\omicron\sigma\tau\alpha\mu$.

(e) *Pres. Subj.*: $\text{-}\tau\epsilon\alpha\zeta\alpha$ [$\text{-}\tau\iota\zeta\epsilon$, $\text{-}\tau\alpha\zeta\alpha$] and $\text{-}\tau\acute{\iota}$; hence $\zeta\omicron$ $\mu\tau\acute{\iota}$, which is now used as a *prepn.*

Past Subj.: $\text{-}\tau\epsilon\alpha\zeta\alpha\acute{\omicron}$ [$\text{-}\tau\iota\zeta\epsilon\alpha\acute{\omicron}$, $\text{-}\mu\epsilon\alpha\zeta\alpha\acute{\omicron}$].

From the root *igg*, also, with prefix $\mu\omicron$ ($\mu\omicron\text{-}\iota\zeta\zeta$ = 'reaches') is derived the form now used as *past* of $\mu\iota\zeta\iota\mu$, *viz.*, $\mu\acute{\alpha}\mu\iota\zeta$ ($\text{-}\mu\omicron\text{-}\acute{\alpha}\mu\text{-}\iota\zeta\zeta$) *cf.*, $\tau\acute{\alpha}\mu\iota\zeta$.

(1) In M., older $\mu\epsilon\alpha\acute{\sigma}\text{-}$ has become $\mu\epsilon\alpha\zeta\text{-}$, from pronunciation of $\mu\alpha\zeta\text{-}$. Outside of M., older $\mu\alpha\zeta$ " $\mu\alpha\acute{\sigma}$, " " " $\mu\epsilon\alpha\acute{\sigma}\text{-}$.

(2) $\text{-}\mu\epsilon\alpha\acute{\sigma}\alpha\iota\acute{\omicron}$ and $\text{-}\mu\epsilon\alpha\mu\mu\alpha$ are occasionally found as *pres. subj.* forms, and $\text{-}\mu\epsilon\alpha\acute{\sigma}\alpha\acute{\omicron}$ " $\text{-}\mu\epsilon\alpha\mu\mu\alpha\acute{\omicron}$ " " " as *past. subj.* forms.

(3). In Keating the τ of $\tau\acute{\alpha}\mu\iota\zeta$ and $\tau\mu\zeta$ is not aspd. Owing to pressure of analogy, the τ is now aspd., except in a few districts. In O. Ir., 'igg' is spelled 'icc.'

The more important of the preceding (Keating) forms are tabulated below. Verbal stems are those of the (a) *pres.* and *past-hab.*; (b) *fut.* and *cond.* From these the synthetic forms (*e.g.*, *beipim*) and the autonomous (*e.g.*, *beip̄ceap̄*) are formed regularly. The verbal stems I., IV., IX. and X., being monosyllabic, cannot have special deuterotonic and prototonic forms. (Colloquial forms are given in Lessons 48 and 49).

		VERBAL STEMS					
ROOTS	DEUTEROTONIC PROTOTONIC	IMPER.	VERBAL NOUN	PAST: SG. 3			
I.	ber ugg	(a) beip (b) beap	berip	berip̄	rip̄s

X.	igg teg	(a) tip̄s (b) tip̄oipf	tap̄	rip̄o rip̄o	rip̄o rip̄o	rip̄o rip̄o	

243. THE SUBSTANTIVE VERB.

—(o)—

A.—The parts of this verb are derived from three roots:—

Pres. Ind. : ἀτά [τά] (*Cf.* L. *status*; Gr., *stasis*; E., *state*).

„ „ after a proclitic: -πίπλ. This is the only instance of the special form after a proclitic being derived from a different root.

The other forms contain **β** of the third root employed in this verb, viz.:—

Past Ind. : το βί.
Pres.-Hab. : βί [βιονν].
Past-Hab. : το βίοῦ (¹).
Fut. : *βιατό [βείτο, βειτό] *-βια.
Concl. : το βιάθ [το βέαθ, το βεαθ].
Pres. Rel. : βίον.
Fut. Rel. : *βιαρ, βεαρ.
Imper. : βίοθ.

Past Ind. : -ραιβε [-ραιβ].
Pres. Subj. : „ „ (O. Ir., -bé).

Past Subj. : -βεῖτ [-βέαθ](¹).
Verbal Noun : *βεῖτ, βειτ.

B.—In the following paradigm, present-day forms are given in square brackets:—

SING.		PLU.
1. το βά(θ)αρ [το βίον]		το βάμαρ [το βιομαρ]
2. το βά(θ)αιρ [το βίρ]		το βάβμαρ [το βιοβμαρ]
3. το βί		το βάτμαρ [το βιοτμαρ]

Earlier, the prefix **π** was used instead of the particle **το** in these forms; e.g., **π**ο-βάτμαρ. Under the influence of a proclitic (**αν**, **νι**, etc.), the voice stress was transferred from the 2nd syll. in **π**ο-βά to the prefix **π**ο, giving the prototonic -ραιβε, with slender ending (*i.e.*, ραιβε not ραβδ) on the analogy of the *pres. subj.* (O. Ir., -bé).

(1.) This is the only verb in which different forms are in use for the *past-hab.* (βίοῦ) and *past subj.* (-βεῖτ, now, more frequently, βεαθ [be'ε] or βέαθ). βέαθ is also the modern *concl.* form. A form βίοθ, given in some textbooks as the *past-subj.* of this verb, has never been used as a *past-subj.*

—(o)—

The Copula occurs in the following forms:—

I. *Pres. Ind.*: ιρ. (*Cf.*, L. *esse*; E., *essence*, *is*).

ιρ, following νί, appears before vowels as η-, *i.e.*, νί η-.

The ρ, at an early stage of the language, became *aspd.* between vowels.

II. Forms with β (of the substantive verb, p. 192):—

Past: βα, οο βα; also *ρα, *ρα η- before vowels.

Fut.: *βυθ [ιρ].

Fut. Rel.: *βυρ.

Condl.: βαθ (βυθ).

(b) Forms in *dependent clauses*:—

Pres. Subj.: -β (1) and, earlier, -ρ (1).

Past Subj.: -βαθ (-βυθ).

Pres. Ind.: -β.

Present: -β is usually appended to the particle ρα (2) (ρο), *e.g.*, ζο ρα β (-ζυραβ) αmlατθ ουιτ. The use of ρα with the *pres. subj.* of the copula is on the analogy of ρα (or ρο) with the *pres. subj.* of other verbs (*e.g.*, ζο ρα ιβ μαιτ αζατ) This -ραβ, originally *subj.* only, was early used (instead of the old -ιθ (3) or -αθ) after verbs of *saying*, etc. (αυειριμ ζυραβ - - -) and, hence, generally as the *pres. ind.* form in all dependent clauses. In such clauses, the form may occur (a) without ρ (of ρα) as *munab*, or (b) without -β, usually before *cons.*, as ιρ οθιζ λιομ ζυρ μαιτ - - -.

In *Past*, with prefix ρο, the copula in dependent clauses is ρο βα (*asp.*). ρ(ο)βα is now -ρ (*asp.*) before *cons.*, as αουβαριτ ζυρ βρεδζ - - -, and -ρβ' before vowels, as αουβαριτ ζυρβ' ε ρ. ε.

The form of the copula in dependent clauses is always joined to *conj.*, *particles*, or *relative gov'd. by a prepn.* (§ 187); *e.g.*, ζυραβ, ο'αραβ, (*present*); and ζυρβ', ο'αραβ', νιοραβ' (*past*).

Vide Summary of forms of the Copula, p. 143.

(1.) Hence the form ζιβε or 'πε, which is thus derived:—

ce or ζε (*conj.*) + -β or -ρ (*copula in dept. pres. clause*) + ε (*pron.*)

(2.) -β (*pres.*) or -β' (*past*) combines with ρα for copula of *dept. clauses*. -β, or -β' should, therefore, not be joined to the initial letter of the predicate. Hence, ζυραβ ε, ζυρβ' ε, ζυρβ' φαα, and not ζυρα β'ε, ζυρ β'ε, ζυρ β'φαα.

(3.) ciθ or ζιθ contains both *conj.* (ce, or ζε) and *copula* (-ιθ); and ζιθεαθ = *conj.* (ζε) + *copula* (-ιθ) + *pron.* (εαθ).

SUMMARY OF GRAMMAR.

245.

Article.

		SINGULAR.	
		Masculine.	Feminine.
Nom., Acc.	Αη, Αη τ-	(before vowels):	Αη ^c , Αη τ- (before †)
Gen.	Αη', Αη τ-	(" †)	ηΑ, ηΑ η- (" vowels)
Dal.	{ Αη ⁿ Αη (before vowels)		
		PLURAL.	
Nom., Acc. } Dal. }	{ ηΑ ηΑ η- (before vowels)		
Gen.	ηΑ ⁿ		

^c (as in Αη') indicates that the initial con. of the following noun is aspd.
ⁿ (as in Αηⁿ) indicates that the initial con. of the following noun is eclipsed, and that n- is prefixed to the initial vowel of following noun. (After dat. sing. of art., the initial con. of noun is aspd. in U.) *Vide* Less. 70 and §§ 134-7.

246. NOTES ON THE ARTICLE.

(a) *τ- before vowels* (as Αη τ-όρι). An early form of the art. in the nom. sing. is assumed to have been ρινοσϱ, e.g., ρινοσϱ αϱιη (= modern Αη τ-αϱιη), the development of the latter from the former being:—

1. [with aspn. of final † between vowels*] } ... (ρ)ινοσ(†) αϱιηη
2. [and loss of initial † (Cf. αμαστ < ραμαστ)] } ... ινοσ αϱιηη (†=η)
3. [unvoicing of σ of ινο by a following η- sound] ιντ αϱιηη
4. [Mod. Ir., τ- of art. being joined to follg. vowel]... Αη τ-αϱιηη

(b) *τ- before †* (as Αη τ-φίη, ηατΑ Αη τ-φασαηητ). *Aspiration.* In the nom. sing. fem. (ρινοσ), and gen. sing. masc. (ρηνο), the art. originally ended in a vowel. The initial ρ of the noun, occurring between vowels, was aspd. The η- sound, of †, unvoiced the preceding σ of art., giving ιντ. The τ- of the art. is now shown prefixed to the following ρ (Αη τ-ρ, or Αη τρ)

As the gen. sing. masc. of the art. originally ended in a vowel, an initial con. of the noun, occurring between two vowels, was aspd.

(c) *η- before an initial vowel* is due to aspn. of final ρ of art. between vowels († = η) Cf. (a) I above.

(d) *Eclipsis of initial con. of noun in gen. plu.* In the gen. plu. (ρηνοσΑη > ιηηΑη > ηΑη), the article originally ended in η. This η, carried forward to the initial of the noun (gen. plu.), is now seen as η- prefixed to an initial vowel and in the resulting ecl. (ητ = σ, ηβ = μ, etc.) of an initial con. E.g., ιηση ηΑ η-όριόσς, σαηηη ηΑ ηβυαδσΑηη.

(e) *Acc. and Dat. sing.* Earlier, the acc. sing. of the art. was followed by ecl., and the dat. sing. by aspn. of the initial con. of the following noun. (I.) After a prepn. which governed in the acc. (as ιε, τρη, σο ('to') ση, ιση, σοΑη, ρεαδ, τΑη, and somet. ι, Αη, ρΑ) the sing. art. (Αη), being in acc., caused eclipsis, as ιεη Αη βρεΑη. But (II.) after a prepn. which governed in the dat. (as σο, σε, ό, Ας, Αρ) the sing. art. (Αη), being in dat., caused aspn., as σο'η βρεΑη. In M. and C., on the analogy of prepns. in (I.), nearly all prepns. + Αη are followed by ecl. of initial con. In U., on the analogy of prepns. in (II.), all prepns. + Αη are followed by aspn. of initial con.

(f) *Initial ρ of art. in, e.g., ιεηη Αη βρεΑη, ιηηηΑ ηορσαδ.* The initial ρ of the art. is still retained, regularly, after all prepns. which originally ended in a con., as ιε, ι, τΑη, τρη, and also after σο, ('to') Cf. ιε ρεΑη, but ιεηη Αη βρεΑη, ιεηη (ιερ) ηΑ ρεΑηΑδ. *Vide* § 257.

* In O. Ir. a single consonant occurring between two vowels was aspirated.

Declension of the Noun.

(For Explanation of Declensions, Cases, and Numbers, *vide* § 103-131.)

FIRST DECLENSION.

	SINGULAR.	PLURAL.	SINGULAR.	PLURAL.
<i>Nom., Acc.</i>	ἀματῶάν	ἀματῶάνη	ταοιρεᾶς	ταοιρίῳ
<i>Gen.</i>	ἀματῶάνη	ἀματῶάνη	ταοιρίῳ	ταοιρεᾶς
<i>Dat.</i>	ἀματῶάνη	ἀματῶάνηαιῶ	ταοιρεᾶς	ταοιρεᾶςαιῶ
<i>Voc.</i>	ἀ ἀματῶάνη	ἀ ἀματῶάνη	ἀ ταοιρίῳ	ἀ ταοιρεᾶς

PARTICIPLES.

The form of the Verbal Adj., or of the gen. of the Verbal Noun is used:—
 (a) *With the neg. of the Copula (as a rule), as the **Participle of Necessity**, denoting what is proper or necessary, as *νὴ ζεαίαντα ὄμω*;
 (b) Following some form of the Copula, with prefix *in-* or *ion-*, as "**Participle of Fitness**," denoting what is fit for, or worthy of, as *ἰον-μόλτα ἀν ὀβαιρ ἔ*.
 With prefix *ro-*, it denotes facility of, as *ἰρ ῥο-τέαντα ἀν ὀβαιρ ἔ*;
 and with prefix *uo-*, it denotes difficulty of, as *ἰρ ὑο-τέαντα ἀν ὀβαιρ ἔ*.
 These Participles are only rarely used.

253.—(II.)—The Copula.

		with ζο	with νί	with ναέ	with αν	with ναέ
<i>Pres. Ind.</i>	IS	ΣΥΗ ΣΥΗ(ΔΒ)	νί νί η-	ναέ	ΑΗ	ΝΑΕ
<i>Past Ind.</i>	ΒΑ	ΣΥΗ ΣΥΗΒ'	νίΟΗ νίΟΗΒ'	νάΗ νάΗΒ'	ΑΗ ΑΗΒ'	νάΗ νάΗΒ'
<i>Condl.</i>	ΒΑΘ	ΣΥΗ ΣΥΗΒ'	νίΟΗ νίΟΗΒ'	νάΗ νάΗΒ'	ΑΗ ΑΗΒ'	νάΗ νάΗΒ'
<i>Pres. Subj.</i>	-b	ΣΥΗΑ(β) ΣΥΗΑβ		νάΗΑ(β) νάΗΑβ		
<i>Past Subj.</i>	-ΒΑΘ usually with ΒΔ, as ΒΔ ΜΒΑΘ, ΒΔ ΜΒ'					

μα and μuna with COPULA.

μά with *Indicative*: *Pres.*: μά'ρ. *Past*: μά ΒΑ, μά Β'.

μuna with *Ind.*, *Pres.*: μuna (μαρα) μunaβ; *Past*: μunaη, μunaηβ'.

Notes: (1) When two forms are given (as νί, νί η-; ΣΥΗ, ΣΥΗΒ'), the second form is that used before a vowel.

(2) The forms of the *Past Ind.*, *Condl.* and *Past Subj.* usually aspirate.

(3) With ζο and ναέ, alternate forms of the *Condl.* are, ζο (ναέ) ΜΒΑΘ.

254.—THE RELATIVE COPULA (*Vide* The Relative §§ 180-190).

As relative clauses containing the Copula present some difficulty to many students, the following examples of relative + copula are appended:—

NOM. RELATIVE.

(1) *Pres. Ind. of Copula*: Ση ε αν ουine ιρ ('who is') μύιντεοιρ ανηρο.
neg.: Τά ceól ναέ ('which is not') ε Δαα ανοιρ.

(3) *Past Ind.*: Οο β' ε ριν [αν ηυο] ΒΑ ('which was') βun leiρ.

(4) *Condl. Mood*: Οο β' ε ριν [αν ουine] ΒΑΘ ('who would be') μύιντεοιρ ανη, Βά ΜΒεΑΘ ρε...

(5) *neg. of (3) and (4)*: νάη (asp.), νάηβ' (before vowels): rarely used.

DATIVE RELATIVE.

(6) *Pres. Ind. of Copula*: (a) ... ρεαρ Β'ΑΗΒ' ('to whom is') Δηηη ΤΑΘΣ Ο Θρηαιη.
(b) ... ρεαρ ΣΥΗΒ' ('[to] whom is') Δηηη ΒΟ ΣεΑΘηΑ.
(c) ... αν μαθηα ΣΥΗ ('[with] which is') μαη leiρ...

(7) *neg.*: ... αν ουine ναέ ('[with] whom is not') μαη leiρ...

(8) *Past Ind.*: (a) ... ρεαρ Β'ΑΗΒ' ('to whom was') Δηηη ΤΑΘΣ Ο Θρηαιη. Ορ,
(b) ... ΣΥΗΒ' ('[to] whom was') Δηηη ΒΟ...
(c) ... αν ουine ΣΥΗ ('[with] whom was') μαη leiρ (ΣΥΗΒ' Δοιβηηη leiρ) αν ρυαηηηηεαρ (ορ, ... ζο ΜΒΑΘ Δοιβηηη leiρ αν ρ.).

(9) *Condl. Mood*: ... αν ρεαρ ΣΥΗΒ' ('[with] whom would be') Δοιβηηη leiρ (ΣΥΗ μαη leiρ) Βεητ ΔΣ εηρτεΑΘτ le ceól, Βά

(10) *neg. of (8) and (9)*: νάη (asp.), νάηβ' (before vowels).

Alternate forms to ΣΥΗ, ΣΥΗΒ', ΣΥΗΒ' are ΑΗ, ΑΗΒ and ΑΗΒ', respectively

Lesson 97, § 223 (Auton. Forms); § 243 (Formation).*

OTHER IRREGULAR VERBS: *Vide* Lessons 48 and 49, and §§ 82-99 (Personal Forms)
Lessons 99 and 100, and § 227 (Auton. Forms);
and § 228-242 (Formation of Irreg. Verbs).

Adverb.

An **Adverb** (Ἐπιρρητικόν) qualifies a verb, i.e., it describes the action or state denoted by the verb, as Ὁ ριπαῖται πέ **ῥο μεαν**, τὰ πέ **ῥο μαίτ**. Adverbs also sometimes qualify adjs., as **ῥεαρ** **κουτρας** ἄρο ἦ εὰο ἐ ; or other adverbs, as τὰ πέ 1 **ῥεαδ** **νίος** ῥεαρρ 'νά μαρ **οο** **ῥι** πέ.

Nearly every adj. can, with ῥο placed before it, be used as an adverb, as ῥο μαίτ, ῥο ἡ-ἀλουιν. (After ῥο, ἡ- is prefixed to an initial vowel). Adverbs may be classified according to their meanings, as:—

1. **Adverbs of Time** (Ἐπιρρητικὰ Διαρρητικὰ), as κατὰιν? ἀνοιρ, ἀνοετ, ῥο μοε, 1 **νοιου**, **ῥια** **ῥοῖναις**, etc.

[Note that ἀρείρ, 1 **ῥεάραε**, **ῥια** **λουαίν**, etc., are adverbs, the corresponding nouns being:—ἀν οἰῶε ἀρείρ, ἀν **ῥά** 1 **ῥεάραε**, ἀν **λουαίν**, etc.]

2. **Adverbs of Place** (Ἐ. Ὑδαίν), as **κά?** ἀνηρ, **ἐατ**, **ῥεαρ**, ἀνίος, **ροίρ**, ἦρτεαε, ἀμυίς, etc. *Vide Lessons 6 and 22.*

3. **Adverbs of Frequency** (Ἐ. Ἰαίρη), as **υαίρ** ἀμήαίν, **υαίρ**, πέ **ῥο**, πέ **ῥηί**, ἀρῖρ, **ῥε** **ῥηάε**, **ῥο** ἡ-ἀνναῖν, **ῥια**ῖν, **ῥοῖ**ε, etc.

4. **Adverbs of Manner** (Ἐ. Μοῦα), as **κίοννρ?** **ῥο** **μαίτ**, **ῥο** **ῥοα**, **ῥρ** ἄρο, **ῥορ** 1 **ἡ-ἀίρ**ε, etc.

5. **Adverbs of Degree** (Ἐ. Σέιμη), as **ῥεας** **ῥεάε**, **ῥεάε** **ῥοῖ**, etc.

[Note that ἀν(ἄ)-, ῥο-, and ῥάρ- are *prefixes*. The adv. ῥο-ῥεάε, *e.g.*, is an Adv. of Manner.]

6. **Adverb of Negation** (Ἐ. Ὀιῦταε), **ῥι** (**ῥίος**), [**εα** (ἔαρ), **U**].

Preposition.

A **Preposition** (ῥέαῖν-ῥοκαλ) is placed before a noun, and shows the relation in which a thing (or some action, or attribute of a thing) stands to something else, as τὰ **οο** **ῥεανν** **ῥε**'**ῥ** **ῥεά**ῥεαρρ **ῥο**, **νά** **ῥεάε** ἦρτεαε **ῥηί**ο **ἀν** **ῥεῥινηεῖς** **ῥο**, τὰ πέ 1 **ἡ-ἄ** **ῥεαρρ** **ἄς** ἀν **ῥοῥαρ**.

(a) **Case.** Most of the simple prepositions are now followed by the *dat. case*.

The prepns. followed by the *acc. case* are: ῥαν, ἦοίρ (in sing., when not = 'including'), **μαρ**, **ῥεάε**(αρ).

ῥο ῥοί (orig. 3 sg. pres. subj. of ῥίςῥιμ) is generally followed by *nom. case*.

Ῐμ (**οο-ῥο**), **ῥιῥεατ**, **ῥεαρρ**, **ῥά** and **ῥαν** ('along'), which are now regarded as prepns., are followed by the *gen. case*.

Prepositional phrases (or Compound Preps.) composed of a prepn. followed by a noun, such as 1 ἡ-ἄε, ἀρ **ῥο**, 1 **ῥεαο**, ῥρ **ῥοῖ**, **ῥαρ** ἔίρ, (le) **ῥοί** are followed by the *gen. case*, as 1 ἡ-ἄε **ῥιῥνηεῖς**, or take a *poss. adj.*, as τὰ πέ 1 ἡ-ἄ **ῥεα**. *Vide* § 115.

(b) **Aspiration and Eclipsis.** The initial con. of a noun, in the sing., is eclipsed when preceded by any of the following preps. + art. (an) :—
 ΔΣ, Δρ, Δρ, πέ (ραοι), λειρ, ό, ποιή, έαρ, τρέ (τρίο), um; as ...ΔΣ an ύρεαρ. (In U., aspn. of the initial con. is the rule in such cases).

The initial con. of a noun is *aspd.* when immediately preceded by :—
 Δρ, οε, οο, πέ, ό, ποιή, έαρ, τρέ (τρί), um, as ...Δρ έρεαρ.
 † immediately before the noun eclipses, as ...† mboρca.

After οο'n, οε'n, and in M. 'ρα (or ιηρα, for ιηραν) an initial con. is *aspd.*, as ...οο'n έρεαρ. (In Kerry οο'n and οε'n cause eclipsis)

(c) **n-**. n- is prefixed to Δ, Δρ (άρ), ύυρ (ύύρ) when any of these is preceded by πέ, ζο, ιε, ι, ό, or τρέ, as ιρ ιε n-Δ μάc έ.

(d) **h-**. After ζο, ιε, or Δ (= Δρ), h- is prefixed to an initial vowel as ...ζο h-έιρυνν. Note, as to Δρ, that the full form is used before unaccented words, e.g., the art., poss. adjs., and ζαc. Otherwise, Δ (Δ h-, before vowels) is still frequently employed (as in O. Ir.):—
 Δρ an υτίρ ρεο, Δ h-έιρυνν; Δρ Δ πόca, Δ πόca.

(e) **le έρεαρ, λειρ an ύρεαρ.** The ρ in λειρ an ύρεαρ is the ρ which was originally the initial letter of the article. *Vide* § 246. This ρ is retained, regularly, in λειρ an, λειρ na; ιηραν, ιηρνα; τρέραν (τρίο an), τρέρνα; ζυραν, ζυρνα (rarely used). On the analogy of these, the following are used (M.): οερνα, οορνα, πέρνα, όρνα.

258.

Conjunction.

A **Conjunction (Cóm-narc)** joins the clauses or phrases of a sentence together, as **οειρ πέ ζο ύρεiceann πέ tú.** Conjunctions sometimes join words, as (ιρ ιαο) **ταός Δζυρ Όόήnαιι Δ ύειρτ μάc.**

Such groups of words as **μαρ ριν πέιν, οε ύμζ ζο, πέ μαρ,** are **Compound Conjunctions.**

The following **Subordinating Conjunctions** introduce :—

(I.) **Adverbial Clauses** (a) of Time, viz., ό, ρυι, ραρ, ζο ('until'), an έαιο ιρ;

(b) of Cause, ,, όιρ, μαρ, οε ύρζ ζο;

(c) of Condition, viz., οά, muna, μά, Δcτ ζο;

(d) of Concession, viz., cέ, cέ ζο, ριύο ιρ;

(e) of Comparison, viz., πέ μαρ, Δήαιι ('as')

(II.) **Noun Clauses**, viz.:—ζο (ζυρ), nά, nac (nάρ). *Vide* § 80.

Δζυρ, Δcτ, 'nά (ionά) and nά join *Co-ordinate Clauses.*

259.

Interjection.

An **Interjection (ιαιιύρεαρ)** is a word or phrase used by way of exclamation, to call attention, or to express vaguely some emotion of the mind. It does not enter into the construction of sentences. Examples: **Ό! Οc! Οc, Οcόν! Ραιρ!**

Many phrases used as interjections are elliptical sentences, as (ιρ) **μαίc an έεαρ (cú)! (Δβαιρ) Δρίρ (έ)! (ζο ραιύ) Όια unη!**

260.—Irregular Nouns.

	<i>Sing.</i>	<i>Plu.</i>	<i>Sing.</i>	<i>Plu.</i>	<i>Sing.</i>	<i>Plu.</i>
<i>N., A., V.</i>	βαν	μνά	βό	βα	ῥιαβ	ῥλείβτε

ANALYSIS OF SENTENCES: OUTLINES.

262. The **Analysis** (Θεαλυζαθ) of a sentence consists in breaking it up into its component parts, naming these parts, and showing their mutual relation.

263. A **sentence** (Ραθ) is the *complete* expression of a thought in words. (The term is applied to the *entire* statement, question, command, etc., *i.e.*, from one full stop to the next.)

264. The first step in the analysis of a sentence should be to divide it into its **Predicate** and **Subject*** parts. That part about which something is said is called the Subject (αδδαν ςαινητε); that which is said about the Subject is called the Predicate (ϕαιρηειρ).

A. Simple Sentences. (Ραειρτε Θιυιρε).

265. A **simple sentence** contains only one verb, expressed or understood (*i.e.*, only one predication).

ϕαιρηειρ.	αδδαν ςαινητε.
Θο λαδαιρ	βεαν
Θο ζαειρ	ϕεαρ
Θο τειτ	βυαδαιλλ

266. The Predicate part may include the **Object** (ςυρρδρη) of a transitive verb (§17), as (1) below. The *Adverb* (3) qualifies the verb Θο τειτ, and the *Adjective* (2) qualifies the noun ϕεαρ. (1 η-α τεδρηαινη Θο is used in the following Analysis in the sense of qualifying, or limiting, and τεδρηαινηα = qualifications, limitations.)

ϕαιρηειρ.	αδδαν ςαινητε.
Θο ϕυαιρ	βεαν
(1) αιρζεαθ. (ςυρρδρη)	
Θο ζαειρ	ϕεαρ (2) ϕαιρδβιρ.
Θο τειτ	βυαδαιλλ
(3) αιρειρ.	

267. Phrase (ϕο-μαθ). A *part* of a sentence consisting of a group of words which does the work of a (1) Noun, (2) Adjective, or (3) Adverb, but *not containing a verb* (expressed or understood) is called a (1) **Noun Phrase** (ϕο-μαθ ανημα), (2) **Adjective Phrase** (ϕο-μαθ αιτιαιατα), or (3) **Adverb Phrase** (ϕο-μαθ Θοδρηαιαρηα), respectively:

ϕαιρηειρ.	αδδαν ςαινητε.
Θο ϕυαιρ	βεαν
(1) λαν ϕραραιν ο'αιρζεαθ.	
Θο ζαειρ	ϕεαρ (2) αν αιρζιθ ζο λειρ.
Θο τειτ	βυαδαιλλ
(3) ςυρλα ο'ιθδε ο ϕιν.	

* Such sentences as "Θο ειυινηζ αι αν οδρηιηζ," where the verb is used *impersonally*, and "οο βυαλαθ αν οοιαρ," where the verb is *autonomous*, have no subject expressed.

B. Complex Sentences (Ῥάρτε Καρτα).

268. **Clause** (Κλάρα). A part of a sentence consisting of a group of words which does the work of a (1) Noun, (2) Adjective, or (3) Adverb, and containing a verb, is called a (1) **Noun Clause** (Κλάρα Ἄμμα), (2) **Adjective Clause** (Κλάρα Ἀποιδάτα), or **Adverb Clause** (3) Κλάρα Ὀυβριαταρῶα), respectively :

<p>Ῥαιρνήρ.</p> <p>Ὀυβαιρε λιom (1) ῆο πῶυβαιρε βεαν λέι. Ὀο ῆάηρ</p> <p>Ὀο εῦτε (3) πῶυαιρ ῶο βί ρέ αῆ ουτ ἀβαίτε.</p>	<p>Ἀὐθαη Καηητε.</p> <p>βεαν</p> <p>αν ρεαρ (2) ἀρῶαιρ αν τ-αιρῆεαο. αν βυαάαιλ ῆο</p>
--	---

269. Each of the above clauses, (1), (2), or (3), is a **Subordinate Clause** (Κλάρα Ῥο-έειμνεαά), i.e., it depends for its full meaning on the **Main Clause** (Ἄρῶ-κλάρα), viz., Ὀυβαιρε βεαν λιom, Ὀο ῆάηρ αν ρεαρ, Ὀο εῦτε αν βυαάαιλ ῆο, respectively. Each clause has a Subject and Predicate of its own, the Main Clause containing the chief Subject and Predicate.

270. A **Complex Sentence** (Ῥάὐ Καρτα) consists of a Main Clause and one or more Subordinate Clauses. Example :

πῶυαιρ ῶο-έονηαιε αν καίηη αν μαῶρη ῶο βί αῆ τεαάτ ρέ η-α ῶείη, Ὀο έεαρ ρί (Ἄρῶ-κλάρα) ῆο η-ιοραὐ ρέ ι.

<p>Ῥαιρνήρ.</p>	{	Ὀο έεαρ	ΚΛΑΣΑΙ	η η-α έεορ- αιηη ῶο	<p>κλάραι Ῥο-έειμνεαά.</p>
		πῶυαιρ ῶο-έονηαιε αν καίηη αν μαῶρη ...	Ὀυβριαταρῶα	‘ῶο έεαρ’	
		ῶο βί αῆ τεαάτ ρέ η-α ῶείη ...	Ἀποιδάτα	‘μαῶρη’	
		ῆο η-ιοραὐ ρέ ι. ...	Ἄμμα (Curpóρη)	‘ῶο έεαρ’	

Ἀὐθαη Καηητε, ρί

271. When the part of a complex sentence which is not subordinate, has no subject and predicate of its own, that part is the **Main Predicate** (Ἄρῶ-Ῥαιρνήρ), as **ηρ ῶόηῆ λιom** (Ἄρῶ-Ῥαιρνήρ) ῆο ἔρῶηη αν έεαρτε αῆεατ.

C. Double and Multiple Sentences (Ῥάρτε Ὀυβαίτα, ἡ Ῥ. 1οηα).

272. A sentence which can be divided into two independent parts of co-ordinate (or equal) rank, is called a **Double Sentence** (Ῥάὐ Ὀυβαίτα), as :

Ὀ’ορκαί ταὐῆ αν ῶορηρ (a), αῆρη ῶο βυαι ρέ ηρτεαά (b).

273. Similarly, when a sentence can be divided into three or more co-ordinate parts, it is called a **Multiple Sentence** (Ῥάὐ 1οηα), as Ὀ’ορκαί ταὐῆ αν ῶορηρ (a), ῶο βυαι ρέ ηρτεαά (b), ἡ ῶο ρῶὐ ρέ ρα έαάοηη (c).

274. The independent parts [as (a), (b), (c) in above] of which a Double or Multiple Sentence is composed are termed **Co-ordinate Clauses** (Κλάραι έόη-έειμνεαά). The latter may contain Subordinate Clauses.

275. The Copula (Ἀν Ναρσ). Vide §§ 54-57.

In a sentence or clause containing the Copula in any of its forms (ἸS, ὅA, etc.) the full predicate consists of the Copula together with the predicative noun, pronoun, etc., which follows the Copula.* Examples:

Ἰαιρηήρ.		Ἀῶθαι Καηητε.	
nasc.			
1.	Ἰρ ὅρσα	ἔ ρη.	
2.	Ἰἷη- ἔ μολεῶθαι-ρα	(Ἀη λεῶθαι) Ἀτᾶ Ἀρ Ἀη ὑπῆλᾶρ.	
3.	Ἰρ ὀδῖξ τιom	ῶ ὀτιορᾶῶ ῤῆ ἰ μῶᾶρᾶ.	

Following such a general analysis as the above, a clause occurring in the subject or predicate part of the sentence should be analysed separately. In 3., e.g., ῶ ὀτιορᾶῶ ῤῆ ἰ μῶᾶρᾶ is a Noun Clause with a predicate (τιορᾶῶ, ἰ μῶᾶρᾶ) and subject (ῤῆ).

Note that a conjn. introducing a clause is not included in the analysis of such clause. Similarly, in analysing an Adjective Clause (i.e., a relative clause) the antecedent is supplied in lieu of the relative (vide § 280, III., A¹).

276. Ἀτᾶιμ (The Substantive Verb).

Ἰᾶ (or any part, βῆρῶ, etc., of this verb) usually expresses (a) position, (b) condition (§ 63), as (a) Ἰᾶ Ἀη ἔαιτε 'ρα ὅρσα, (b) Ἰᾶ Ἰᾶῶξ ῶ ἰᾶῶιρ. The part of the sentence which denotes position or condition, e.g., 'ρα ὅρσα, ῶ ἰᾶῶιρ, is an adverbial qualification of Ἰᾶ.

277. Synthetic Form of Verb (Ἰυηημ Ἰᾶητε).

This form of the verb shows the pronominal subject. The latter should be shown separately in the analysis. Example:

Ἰαιρηήρ.		Ἀῶθαι Καηητε.	
Ὅ ὅυαηεῶθαι [Ἰυηημ Ἰᾶητε]		cuspōin.	
(Ὅ ὅυαη)		ἔ	
			(ῤᾶῶ)

278. Autonomous Form (Ὅρᾶῶθαι ῤᾶῶρ).

In the Autonomous Form of the verb, the subject is suppressed. A sentence or clause containing an autonomous verb is, in form, predicative solely, and in the Analysis the verb should be noted as Autonomous [Ὅρᾶῶθαι ῤᾶῶρ].

279. Interrogative Sentences.

The form of the answer will usually guide as to the Analysis of the question, e.g.,

Ἰαιρηήρ.		Ἀῶθαι Καηητε.	
nasc.			
Ḳᾶ η-		ἔ ρη?	
(Ἰρ ἔ) ῤᾶῶᾶη		(ἔ).	
Ḳᾶῶ (Ἰρ)		(Ἀη ῤᾶῶ) Ὅ ὅυηη ῤῆ?	
(Ἰρ ἔ) Ἀη ὅρσα		(Ἀη ῤᾶῶ Ὅ ὅυηη ῤῆ).	

* In §§ 49-61, dealing with the forms and functions of the Copula, the latter term is, for clearness, shown separately in the Analysis. In analysing such sentences, it will be found convenient to note, as in the above examples (§ 275), that the Predicate includes the Copula.

Ráð nó Cláral le Dealuḡað.	A raḡar ran.	Cóm- narca.
I. D'innir múinteóir na rcoite reo rceal dear d'inn i noé.	Ráð Dúiro.
