Utrecht University Botanic Gardens

P.O. Box 80.162 3508 TD
Utrecht The Netherlands

Index Seminum No. 62 - 2020-21

In response to the Convention on Biological Diversity (**CBD**), the Utrecht University Botanic Gardens supplies seeds and other plant material in accordance with the Code of Conduct for Botanic Gardens and similar collections. We are **IPEN**-member (International Plant Exchange Network) and can exchange material with other IPEN-members without bi-lateral agreements.

For a list of current IPEN-members check the web-site of BGCI (Botanic Gardens Conservation International).

http://www.bgci.org/resources/History_of_IPEN/

Non **IPEN**-members have to return the "*Agreement on the supply of living plant material for non-commercial purposes leaving the International Plant Exchange Network (IPEN version 2b)*" which must be signed by **authorized staff**. This agreement can be made valid for 1, 3 or 5 years and is printed on the back-side of the order form.

Notes on ordering:

- Correspondents are asked to use the order-form provided, **which must be signed by authorised staff**, and send it to the address mentioned upon it. Furthermore, they should check with their own authorities concerning import-regulations and include any necessary permits with their order.
- The first distribution will be shortly after **April 1, 2021**. Many seeds of limited amount will be out of stock shortly afterward, so please order before this date. Requests, with a maximum of 25 packets will be handled in sequence of entry.

Staff

General Department:

Drs. Fenna F. Hanraets, General Director	<i>F.F.Hanraets@uu.nl</i>
Dr. Edwin T. Pos, Scientific Director	<i>E.T.Pos@uu.nl</i>
Drs. Akkie J. Joosse, Communications Officer	<i>A.J.Joosse@uu.nl</i>
Mrs. Christine Das-van der Knaap Secretary	<i>c.j.m.vanderknaap@uu.nl</i>

Curators' Department:

Drs. Hans Persoon Curator and Deputy Director	<i>J.G.M.Persoon@uu.nl</i>
Drs. Gijs Steur Curator and Research	<i>G.Steur@uu.nl</i>
Drs. Eric J. Gouda Curator and Research	<i>E.J.Gouda@uu.nl</i>
Mr. Lennart Everts Assistant	<i>M.L.Everts@uu.nl</i>

Educational Department:

Drs. Nick A.J. Meijdam Education officer	<i>N.A.J.Meijdam@uu.nl</i>
Ir. Ruth C. de Visser-de Jonge, Coordinator Theme Garden Project	<i>R.C.deVisser@uu.nl</i>

Technical/collecting staff (Utrecht)

Gerard van Buiten Hortulanus	<i>G.vanBuiten@uu.nl</i>
Roel Vonk	<i>R.Vonk@uu.nl</i>
Fred H.J. Siesling	<i>F.H.J.Siesling@uu.nl</i>

Further (collecting) gardeners: G.E. Bruinenberg, I. van Capel, W. Jansen, A.A. Jongerius, R. Koops, , H.W.M. Noordman, B. Valstar and J.J.C.C.M. van Velthoven.

Situation and climate:

Geographical position of the Main Garden	52° 06' N : 5°11' E
Altitude	2 m above sea level
Mean daily minimum of the coldest month	- 0,6°C
Mean daily maximum of the warmest month	+ 21,6°C
Highest temperature	+ 36,8°C *
Lowest temperature	- 24,8°C *
Average rainfall	803 mm

*Monitored since 1849

From the Curator's Department

With the presentation of this Index Seminum No. 62-2020-21 we take the opportunity, as usual, to inform you on the latest developments in Utrecht University Botanic Gardens.

In general, the activities of the curators are divided in the following main groups:

- Hans Persoon [HP] and Gijs Steur [GS]: Systematic Garden, Theme Garden, Central Route and student courses.
- Eric Gouda [EG]: Greenhouse Collections (focal point: Neotropical Collections) and the Rock Garden

Specializations:

In the framework of the National Plant Collection (NP), Utrecht University Botanic Gardens are maintaining specializations on the following groups and taxa:

- Flora of the Neotropics: [EG]
- Flora of the Guianas, with special emphasis on:
 - Bromeliaceae* [EG]
 - Orchidaceae* [EG]
 - Costaceae* [EG]
 - Annonaceae* (Research Collection) [EG]
 - Cecropiaceae* [EG]
 - Rhipsalis* [EG]
 - Aeonium*[EG]
 - Alpines [EG]
 - Penstemon* [EG]
 - Eriogonum* [EG]
 - selected woodland plants (*Arisaema*, *Asarum*, & *Trillium*) [EG]

These specializations are given extra attention regarding verification, nomenclature, wild source material, etc.

We are especially interested in material from natural sources of the groups and taxa mentioned above. We seek cooperation with gardens with identical specializations. If you are interested, please contact us and we will provide additional information.

Bromeliaceae:

Study and development in the *Bromeliaceae* collection has several focus points. In the first place the *Bromeliaceae* research project for the "Flora of the Guianas" and for the Flora of Ecuador: we try to grow all possible species from this area. Beside this, the *Tillandsioideae* collection (as Subfamily of the *Bromeliaceae*) is part of the National Plant Collection (NP). The genus *Tillandsia* of the Andean countries (especially Bolivia & Ecuador) has a special attention because of the various taxonomic problems on species level in these areas. To increase the general knowledge about the recognised genera in the Family we try to grow representatives from all genera. It is evident that our *Bromeliaceae* Collections will increase dramatically in both size and quality.

Arisaema:

The last few years we have been very active with this group, increasing the number of wild collected species in the collection. Some areas, like the Peat Garden, have been improved to grow more *Arisaemas*. International contact with various *Arisaema* (*Araceae*) specialists caused considerable improvement of the collection.

Last but not least, the living collections have been enriched this year. Many new accessions from natural sources replaced accessions from cultivated origin, as part of the long-term collection strategy to replace plants of cultivated origin for wild- collected stock.

Codes used

Verification:

The seeds in this list have been taken from verified plants and only if we were reasonably sure that cross-pollination with related species would be unlikely. Verification codes used:

- 0= not been determined by any authority;
- 1= determined by comparison with other named plants;
- 2= determined by a taxonomist or other competent person;
- 3= determined by a specialist (taxonomist working on that group)

Explanation of provenance codes of the plants:

W= Accession of wild source (treat as 'Z' because the donor plant is cultivated in our B.G., except W*, which is wild collected seed, distributed as such.)

Z= from a wild source plant in cultivation.

G= Garden origin.

IPEN-Number:

The first two positions are the iso-code of the country of origin. xx means: country of origin unknown.

The next position is a digit meaning: special restrictions (1) or not (0).

The next position is the abbreviation of the garden introducing the material in IPEN (in this seed-list only u).

The rest consists of the internal accession number:

The first four digits of it indicate the year of registration, (1900 = unknown year of entry).

The next two characters are coding for the garden location or specific group of plants: **GR**=Green houses; **BL**=Rock Garden; **ZG**=Orig. Von Gimborn Arboretum; **RD**=Woody Plants; **SL**=Seedlist only; **ZE**=Annuals and Biennials; **ZS** and **ZB**= Perennials. The other five digits are a sequence number within a year.

The IPEN-number as a whole stays attached to the accession, wherever it may go, so that it is always possible to trace back its origin.

The * at the end of the description is followed by the seed-list collecting year.

Alstromeriaceae

1. 2W *Bomarea edulis* (Tussac) Herb.
[IPEN sr0u-1980GR00248] Suriname , Kabelebo area, along
Barieba Creek,
Coll.: Lindeman,J.C. & A.R.A.Görts 455 *2020

Annonaceae

2. 3W *Mkilua fragrans* Verde.
